Corporate Profile

CIBC FirstCaribbean is a relationship bank offering a full range of market leading financial services through our Corporate and Investment Banking, Retail and Business Banking and Wealth Management segments. We are located in seventeen (17) countries around the Caribbean, providing the banking services that fit our customers' lives through approximately 3,000 employees in 68 branches and offices. We are one of the largest regionally listed financial services institutions in the English and Dutch speaking Caribbean, with over US\$11 billion in assets and market capitalization of US\$2 billion. We also have a representative office in Hong Kong providing business development, relationship management and fund administration. The face of banking is changing throughout the world and CIBC FirstCaribbean intends to lead these changes with the expertise, integrity and knowledge gained from banking in the Caribbean since 1836.

The Bahamas Operating Company comprises operations in The Bahamas and Turks and Caicos Islands where there are sixteen (16) branches and agencies, sixty-two (62) Instant Teller Machines, and Wealth Management and Corporate Investment Banking centres spread over New Providence, Grand Bahama, Abaco, Eleuthera and the Turks and Caicos Islands.

Vision

To be the leader in client relationships - we put our clients at the centre of everything we do in order to be the first choice for financial services in the region.

Mission

To achieve our vision by fulfilling commitments we have made to our stakeholders:

- **Clients** - To deliver to our clients banking that fits their lives
- **Employees** - To create an environment where all employees can excel
- **Communities** - To make a real difference in our communities
- **Shareholders** - To generate strong total returns for our shareholders

Succeeding will mean living by our values - Trust, Teamwork, Accountability - and creating value for all who invest in CIBC FirstCaribbean.

Values - Trust, Teamwork, Accountability

Values define the character of both individuals and organisations. At CIBC FirstCaribbean, they shape our everyday decisions.

- **Trust** - We believe in, empower and support each other. We act with respect, integrity, honesty and transparency in our relationships with each other and with our clients.
- **Teamwork** - We believe in CIBC FirstCaribbean and work together to promote a sense of pride and purpose in all we do for our clients and for our Bank.
- **Accountability** - We do what we say, because this is what our clients expect and deserve. If we make a mistake, we admit it and fix it.

Strategic Priorities

We have three key strategic priorities: focusing on our clients, building on our technology base to create a regionally leading digital experience for our clients and simplifying the way we do business.

- **Client Relationships** - We aim to grow our share of wallet with our existing clients, attract new clients, further improve sales and service capability by making it personalized, responsive and easy.
- **Modern Digital Banking Experience** - We are building digital capabilities across our sales and delivery channels to provide our clients with a modern omni-channel, banking experience.
- **Simplification** - We are optimizing our processes and cost structure by simplifying the way we do business. We aim to remove paper from our processes, and we are investing in next generation compliance and frictionless key customer experiences.

2018 Highlights

First for Clients

Ever mindful that a key contributor to our business success rests in the advocacy of our clients, in 2018 our lines of business held steadfast to their mission of deepening client relationships and enhancing value to the client. As a result, The Bahamas received the prestigious “Bank of the Year (Bahamas) Award” for the third consecutive year.

Retail and Business Banking

- The Retail and Business Banking segment continued its positive track record in 2018 despite a sluggish economy and aggressive competition. Good growth was experienced across all of our key client offerings - Platinum Banking, Business Banking, Retail, Cards and Insurance.
- We expanded our reach via a new Sales and Service center launched at Baha Mar, which caters strictly to the resort’s employees - the first of its kind in the country.
- The Governors Harbour Branch was recognized as the top performing branch of the year across the region.
- The Bahamas Retail and Business Banking Segment celebrated two Annual Achiever Award Winners who were recognized across the seventeen territories in which we operate.
- We continued to build our digital capabilities as we strive to provide our clients with a modern omni-channel, banking experience. During the year we delivered multiple upgrades to our award-winning Mobile Banking app and Online Banking offering, which further enhanced our client experience and overall security.
- Our Automated Banking (ABM) network expanded again in 2018 with the addition of ABM machines at Baha Mar, British Colonial Hilton, and the Freeport International Airport Terminal in Grand Bahama.

Corporate and Investment Banking

- Corporate and Investment Banking’s 2018 performance improved over the previous year, driven by continued loan bookings. Loans were booked in industries including, but not limited to, oil and gas; marine; construction; tourism and real estate.
- Providing support to various state-owned entities resulted in increased profits as the business continued to curtail expenses which remained relatively flat.
- Corporate & Investment Banking continues to make client centricity its top priority by striving to provide exceptional service and deepen client relationships in an effort to become our clients’ leading financial partner. We have launched several initiatives to simplify products and processes to speed-up our response times and improve the customer experience. Improving

customer experience and upgrading and promoting our digital channels will be a key focus again for 2019.

- Private Wealth Management In 2018 we continued to provide our clients with customized solutions in five key areas of wealth management - investment planning and asset management, credit planning, wealth protection and structuring, cash management and business planning. The Private Wealth Management segment saw many rewards in 2018 including new client referrals from existing clients who were pleased with our services. We were also selected by World Finance as the Best Wealth Management Provider in The Bahamas for the second year in a row.
- The launch of our Investment Advisor platform at the start of fiscal 2018 has yielded positive results. In 2018, we laid the framework for the addition of our Mosaic investment portfolio construction platform powered by a major American investment house’s software.

First for Employees

- In 2018 we continued our focus on making our bank a great place to work for our employees, as well as a great place to do business for our clients, by enhancing our employee programs to support our corporate strategy, to embed our client centric culture and to help our employees develop and fulfill their career ambitions.
- We remain on the cutting edge of technology, training and development and believe that empowering our team members and providing them with the best tools and resources available, will assist them in readily achieving their goals.
- A Branch Manager & Country Head Development Program was launched in 2018 to ensure that we offer the best training opportunities to our managers and leaders.
- Two of only eight employees recognized regionally through the Bank’s Achiever’s Program, hailed from the Bahamas.
- We are also working hard to build a culture within our bank where our employees feel comfortable raising issues and concerns, and can see that these are taken seriously and that steps are taken to deal with the issues raised.
- Our engagement activities were a central focus in our team building initiatives in 2018. Career planning sessions, benefits refreshers and financial presentations together with our recognition of various occasions like Valentine’s Day, International Women’s Day, Thanksgiving and Employee Appreciation Day were all well received.
- We have also been focused on simplification within our bank and making our operational processes easier, both

2018 HIGHLIGHTS

for our employees and our clients. Our employees have begun to recognize our progress in this area and this will be a key theme for 2019 and beyond.

First for Communities

- The bank continued to reach out and partner with individuals and organisations to make life better for many in the communities that we serve. In 2018, CIBC FirstCaribbean gave back to numerous important causes in the areas of Health & Wellness, Youth Empowerment & Education, and Community & Environment. Not only were substantial donations made, employees also gave their time and talents to ensure that the needs of our communities were met through various Adopt-A-Cause initiatives.
- Our flagship charitable event Walk for the Cure was again an incredible success attracting new corporate sponsors and donors and a record number of participants in both The Bahamas and the Turks and Caicos Islands (TCI).
- The Bahamas raised a record amount for cancer support organizations in New Providence, Grand Bahama, Abaco and Eleuthera through Walk for the Cure. The TCI team also exceeded last year's total and donated funds to two local groups.
- We contributed to several of the Salvation Army of The Bahamas' outreach programs including providing school uniforms to children in need, purchasing and packing grocery parcels for those who cannot afford to purchase their own and serving holiday meals to the less fortunate.

- The commitment to education continued in 2018 with donations to several annual summer programs as well as other programs aimed at educating and empowering young people in The Bahamas and the Turks and Caicos Islands.
- Our TCI operations made a sizeable donation to three public schools on Grand Turk - HJ Robinson High School, Ona Grinton Primary School and Eliza Simons Primary School - that were still recovering from the devastating 2017 hurricane season.
- Our Bank continues to support communities through Junkanoo. A sizeable donation was made to A and B Junkanoo Groups in 2018 with the aim of preserving Bahamian Culture and fostering community and creativity.
- A sizeable donation was made to the Bahamas Feeding Network to assist with their Feed 5000 initiative.
- Donations were made to the Ranfurly Home for Children, Billney Lane Children's Home, Elizabeth Estates Children's Home and the Nazareth Centre.

Financial Performance

- In 2018, the Bank reported net income of \$85 million, an increase of \$8.3 million from 2017. This was largely due to earnings from our performing loans and rising US interest rates.
- The Bank maintained strong capital levels in excess of applicable regulatory requirements, and at the end of the fiscal, both the Tier 1 capital and Total capital ratios were at 25%.

A Successful Year For Our Bank

Marie Rodland-Allen
Managing Director,
Bahamas Operating Company

For a third consecutive year, CIBC FirstCaribbean was named “Bank of the Year.” The Bahamas Operation has been crowned “Bank of the Year” eight times in the past 12 years under The Banker Magazine’s prestigious annual international financial industry awards program. The recognition is one of several accolades received by the bank in 2018 - a testament to our success and our commitment to deliver on our brand promise to provide personalised, responsive and easy service.

Financial Performance

Notwithstanding a challenging economic and operating climate, the Bank had a successful year with reported net income of \$85 million compared to \$77 million in the prior year. Our results were largely impacted by earnings from performing loans and rising US rates. We are pleased to report that this has been our best performance since 2007. The Bank has preserved strong capital levels with both Tier I and Total Capital ratios of 25%, which are both well above the minimum regulatory requirements.

Retail and Business Banking

Fiscal 2018 was a year of credit growth and sustainment for the Retail and Business Banking Segment. The Bank was committed to customer service excellence and embraced several initiatives, both technological and people driven, to embed the service culture to all internal and external clients.

The segment experienced moderate growth despite a sluggish economy, and aggressive competition within the market. We remained resilient by continuing to expand our

reach via a new Sales and Service center launched at Baha Mar.

Our strategy in 2018 was focused on accelerating profitable growth by building a sustainable sales and service culture across product suites - lending, credit cards, deposits and insurance - and improving operational efficiency. Our strategy also included improving our operating model by encouraging the migration of over-the-counter (OTC) transactions to alternate channels and improving the sales to service mix to enhance operational efficiency and sales capacity.

The Governors Harbour Branch was recognised as the top branch of the year regionally in performance for the Caribbean. Additionally, The Bahamas Retail and Business Banking Segment celebrated two top Annual Achiever Award winners across the seventeen territories in which CIBC FirstCaribbean operates.

In keeping in line with the goal of ensuring accessibility of banking services to clients anywhere in The Bahamas, we continued to expand our Instant Teller (Automated Banking Machine/ABM) footprint through the introduction of new

MESSAGE FROM THE MANAGING DIRECTOR

access points in Baha Mar, British Colonial Hilton, and the Freeport International Terminal in Grand Bahama.

Corporate and Investment Banking

The Corporate & Investment Banking Division had a strong year driven primarily by continued loan bookings with improvements year over year. For the period, loans were booked in industries including, but not limited to, oil and gas; marine; construction; tourism and real estate. We also continue to provide support to the Government's financing initiatives through the funding of various state-owned entities. The aforementioned resulted in increased profits as the business continued to curtail expenses which remained relatively flat.

Our focus continues to be the delivery of a superior customer experience while offering customised financing solutions to meet our customers' financial needs.

Wealth Management

In 2018, we continued to successfully build sustainable, dedicated client relationships that were both personalised and responsive. We did this through our integrated client service model, using our strengths in trust & wealth planning, core banking, investment advice and discretionary portfolio management to ensure we deliver a solution tailored to our clients' needs. These efforts have been rewarded, not only through new client referrals from existing clients who were pleased with our services, but also by being selected by World Finance as the Best Wealth Management Provider in The Bahamas for the third year in a row. Our experience in building strong, long-term client relationships enables us to increase share of wallet by retaining our existing clients and attracting additional wealth management business across the four pillars.

The launch of our Investment Advisor platform at the start of fiscal 2018 has also yielded positive results. We have laid the framework for the addition of our Mosaic investment portfolio construction platform powered by a major American investment house's software.

Community Partnership

In 2018, our contribution to the fight against cancer increased substantially through our signature fundraising event, Walk for the Cure. Our teams in The Bahamas and Turks and Caicos Islands (TCI) raised a record amount. Proceeds from the walk's fundraising activities were donated to several cancer support organizations in New Providence, Grand Bahama, Abaco and Eleuthera, and two organizations in TCI. Walk for the Cure 2018 attracted a record number of corporate sponsors and

participants in both countries. I would like to thank all of our team members, corporate sponsors, participants and everyone who contributed to the success of our walks on Saturday, October 6 and our overall fundraising efforts.

Our Bank made a significant impact on the communities that we serve in The Bahamas and TCI through our ComTrust Foundation and Adopt-A-Cause initiatives, which focus on the following areas: Health & Wellness, Youth Empowerment & Education, Community & Environment and Staff Volunteerism. We assisted the Salvation Army of The Bahamas with several initiatives including providing school uniforms to children in need, purchasing and packing grocery parcels for those who cannot afford to purchase their own and serving holiday meals to the less fortunate. Donations were also made to a number of other non-profit organizations in 2018 such as Aids Foundation of The Bahamas, Project Read, Bahamas Feeding Network, The Bahamas Crisis Centre and several children's homes throughout The Bahamas, just to name a few.

The commitment to education continued in 2018 with donations to several annual summer programs as well as other programs aimed at educating and empowering our youth such as the Junior Achievement scholarship program. Our TCI operations made sizeable donations to three public schools on Grand Turk that were still recovering from the devastating 2017 hurricane season. The funds will go towards their final restoration efforts as the schools work to return to a state of normalcy.

A sizeable contribution was made to Bahamian culture once again. In 2018, donations were made to 20 Junkanoo Groups in the A and B Categories to assist them with their preparations for the annual Boxing Day and New Year's Day Junkanoo parades.

People

Our people continue to be our number one focus. We believe that empowering our team members and providing them with the tools and resources they need will assist them in readily achieving their goals.

To ensure that we stay on the cutting edge of technology, training and development was a priority in 2018. Learning opportunities are continuously provided through the courses offered by our Learning and Development team. This year in particular, a key focus by the Bank was ensuring that we develop the leadership capabilities of our managers and, in that regard, a Branch Manager & Country Head Development Program was launched.

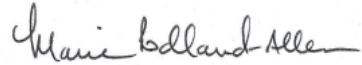

Rewarding and recognising employees who exemplify the behaviors consistent with the ethos of our organisation is done regularly either informally, within the various units

MESSAGE FROM THE MANAGING DIRECTOR

or formally through the Bank's Achiever's Program. This year we are proud to announce that two of only eight employees recognised regionally, hailed from the Bahamas.

To balance the formal demands of the workplace we recognize that a highly engaged and highly motivated workforce is a necessity. Hence, our engagement activities continue to play a central focus in our team building initiatives. Career planning sessions, benefits refreshers and financial presentations together with our recognition of various occasions like Valentine's Day, International Women's Day, Thanksgiving and Employee Appreciation Day are all highly anticipated and well received.

I would like to thank our board, shareholders, clients and employees for their continued support in building this great franchise. We will continue striving to be the best.

MANAGEMENT'S DISCUSSION & ANALYSIS

Management's discussion and analysis (MD&A) is provided to enable readers to assess CIBC FirstCaribbean's financial condition and results of operations as at and for the year ended October 31, 2018, compared with prior years. The MD&A should be read in conjunction with the audited consolidated financial statements included in this Annual Report. The consolidated financial statements have been prepared in accordance with International Financial Reporting Standards and are expressed in thousands of Bahamian dollars. Certain comparative amounts have been reclassified to conform to the presentation adopted in the current year.

Overview

FirstCaribbean International Bank Limited is a leading Caribbean financial institution providing individual and business clients with a full range of products and services through our four (4) segments - Retail and Business Banking, Corporate and Investment Banking, Wealth Management and Administration.

The business segments are supported by the Administration segment which includes Finance, Human Resources, Risk, Technology & Operations, Treasury, and other support units. Highlights and commentary on business segments can be found in 2018 Highlights Section of this annual report.

The following discussion and analysis is based on the Bank's overall results and financial position with commentary referring to segments and geographic operations when deemed relevant.

Nature of the business

The Bank offers traditional banking solutions that fit our clients' lives in the markets in which it operates. It maintains capital well in excess of the regulatory minimum requirements and deploys this capital together with other deposits in interest earning assets within its managed risk appetite. The Bank operates and is regarded one of the largest banks in two main geographic markets - The Bahamas and Turks and Caicos Island. The macroeconomic environments in these territories influence the Bank and its results. The Bank is also affected by the global macroeconomic environment to the extent they affect the drivers of financial risks to which the Bank is exposed such as credit and liquidity risk and other market risks such as currency risk, interest rate risk and other pricing risk.

Objectives and strategies

The Bank continues to focus on four strategic priorities to address market trends: Focusing on our client relationships, building our technology base to create a regionally leading digital and modern day experience for our clients, simplifying the way we do business and developing our people.

Resources, risks and relationships

The most important resources and relationships available to the Bank are driven by its clients, employees, communities (including its regulators) and its shareholders. Over the years, the Bank has developed these resources and relationships to synergistically deliver banking that fits our clients' lives.

Using the capital provided by shareholders and other funding from clients, the Bank, through the work of its employees is able to provide a stable affordable source of funding to its clients, contributing to building the communities in which the Bank resides.

The risks faced by the Bank (including credit, market, compliance, operational, and liquidity) and our approach to managing these risks are discussed further under the heading "Risk Management Approach" in this discussion and analysis section.

MANAGEMENT'S DISCUSSION & ANALYSIS

Review of results, performance measures and indicators

Review of the Consolidated Statement of Income

B\$ thousands except per share amounts, as at or for the year ended October 31	2018	2017
Total revenue	188,122	180,286
Net income for the year	85,060	76,759
Total assets	3,499,627	3,522,156
Basic earnings per share (cents)	70.8	63.9
Dividend per share (cents)	88.0	30.0
Closing share price per share (cents)	9.25	8.60
Return on equity	12.6%	11.4%
Efficiency	48.4%	50.6%
Tier I capital ratio	25%	27%
Total capital ratio	25%	28%

Net income for the year was \$85 million, compared to \$77 million in 2017.

The year over year results were affected by certain significant items as follows:

2018

- \$9 million increase in net interest income primarily due to increased cash placements volumes, interest on performing loans and rising US rates.
- \$4 million decrease in other income primarily due to higher securities losses.

2017

- \$3 million increase in loan loss impairment expense largely due to non-recurring impact of hurricanes Irma and Maria.

MANAGEMENT'S DISCUSSION & ANALYSIS

Net interest income and margin

B\$ thousands for the year ended October 31	2018	2017
Average total assets	3,510,892	3,375,545
Net interest income	148,036	138,814
Net interest margin	4.22%	4.11%

Net interest income increased year on year by \$9.2 million (7%) largely as a result of higher productive/performing loan earnings and rising US rates

Operating income

B\$ thousands for the year ended October 31	2018	2017
Fee & commission income	31,522	29,780
Foreign exchange earnings	11,697	10,895
Net losses	(4,141)	(147)
Other	970	944
	40,086	41,472

Operating income decreased year on year by \$1.4 million (3%) primarily due to higher securities losses, net of higher service based fees.

Operating expenses

B\$ thousands for the year ended October 31	2018	2017
Remuneration and benefits:		
Wages and salaries	23,248	22,848
Benefits	7,236	6,403
	30,484	29,251
	8,719	8,617
Business license	10,421	10,437
Occupancy and maintenance	4,562	4,532
Depreciation	2,423	2,380
Communications	23,293	22,468
Professional and management fees	11,075	13,534
	90,977	91,219

Operating expenses remained flat year over year, as the Bank continues to closely manage its controllable expenses.

MANAGEMENT'S DISCUSSION & ANALYSIS

Credit loss expense on financial assets

B\$ thousands for the year ended October 31	2018	2017
Expense on impaired loans - Stage 3		
Mortgages	2,798	(207)
Personal	2,500	971
Business & Sovereign	8,733	8,382
	14,031	9,146
Expense on non-impaired loans		
Stage 1	(6,083)	3,162
Stage 2	1,484	
Total loans credit loss expense	9,432	12,308
Expense on debt securities		
Stage 1	(109)	-
Stage 2	(1,855)	-
Stage 3	4,617	-
Total debt securities credit loss expense	2,653	-

Loan credit loss expense remained relatively flat year on year. Loss expenses on impaired loans increased by \$5 million due to the implementation of IFRS 9. Loss expenses on non-impaired loans decreased by \$8 million due to the implementation of IFRS 9 and migration of loans Stage 3 (impaired).

The ratio of credit loan allowances to gross loans was 0.4% compared with 0.6% at the end of 2017. Non-performing loans to gross loans declined to 5.2% at the end of 2018 compared to 6.8% at the end of 2017.

Debt securities credit loss expense was \$3 million compared to \$nil last year due to the implementation of IFRS 9.

Review of the Consolidated Statement of Comprehensive Income

B\$ thousands for the year ended October 31	2018	2017
Net income for the year	85,060	76,759
Other comprehensive income/(loss)		
Net losses on available-for-sale investment securities	-	(7)
Net losses on debt instruments at fair value through OCI	(4,164)	-
Re-measurement losses on retirement benefit plans	(2,043)	(2,560)
Other comprehensive loss	(6,207)	(2,567)
Total comprehensive income	78,853	74,192

Other comprehensive income increased year on year as a result of net losses on debt instruments at fair value through Other Comprehensive Income (FVOCI). The reduction in the net losses on available-for-sale investment securities was due to the adoption of IFRS 9 and reclassification of balances to debt instruments measures at FVOCI in the current year.

MANAGEMENT'S DISCUSSION & ANALYSIS

Review of the Consolidated Statement of Financial Position

B\$ thousands for the year ended October 31	2018	2017
Assets		
Cash & balances with The Central		
Bank and due from banks	576,110	512,736
Investment securities	782,708	799,966
Loans and advances:		
Mortgages	1,006,030	1,013,870
Personal	210,342	208,775
Business & Government	894,763	965,500
Provision for impairment (net of recoveries and write-offs)	(111,649)	(119,917)
Interest receivable	13,087	14,130
Unearned fee income	(11,171)	(9,858)
	2,001,401	2,072,500

Individuals	932,104	877,587
Business & Sovereign	1,557,791	1,590,409
Banks	270,110	280,286
Interest payable	2,765	2,566
	2,762,770	2,750,848
Other liabilities	84,289	78,164
Equity	652,568	693,144
	3,499,627	3,522,156

Total assets decreased by \$23 million (1%) primarily due to higher cash & balances with banks, net of a decrease in loans and advances to customers.

Total liabilities increased by \$18 million (1%) predominantly due to normal core deposit movements.

Equity has decreased year on year by \$41 million (6%) due mainly to net income for the year of \$85 million, other comprehensive loss of \$6 million and dividends of \$105 million and adjustment to opening retained earnings for adoption of IFRS 9.

Our capital strength protects our depositors and creditors from risks inherent in our business, allows us to absorb unexpected losses and enables us to take advantage of attractive business opportunities. The Bank continues to maintain strong capital ratios of Tier I and Tier I & II of 25%, each, at the end of 2018, well in excess of regulatory requirements.

Business Segment Overview

Management monitors the operating results of its business segments separately for the purpose of making decisions about resource allocation and performance assessment.

Transactions between the business segments are on normal commercial terms and conditions.

MANAGEMENT'S DISCUSSION & ANALYSIS

Retail and Business Banking

Retail & Business Banking includes Retail, Business Banking and Cards businesses. Retail and Business Banking provides a full range of financial products and services to individuals, which can be accessed through our network of branches and ABMs, as well as through internet and telephone banking channels, inclusive of our Mobile Banking App. Business Banking clients are provided with products and services to satisfy their day to day operational and working capital business needs. Cards offering include both the issuing and acquiring business.

Total revenues increased year on year by \$7 million primarily due to higher performing loan revenue, fees and commissions. Net income for the year increased year on year by \$8 million driven by higher revenues and lower operating expenses and credit loss expenses.

Corporate & Investment Banking

This segment comprises: Corporate Lending, Investment Banking and Forex & Derivatives Sales businesses.

Corporate & Investment banking provides a full range of corporate and commercial banking services to large and mid-size corporate businesses, governments, financial institutions, international trading companies and private wealth vehicles.

Investment Banking provides debt, equity, capital markets and corporate finance products and services to large corporations, financial institutions and governments.

Clients are also provided with derivative and other risk mitigating products through the Forex & Derivatives Sales Group.

Total revenue remained flat year on year as, higher loan earnings was offset by lower internal revenue and fee income. Net Income increased \$5 million year on year as the flat revenue was accompanied by lower credit loss expense and allocated indirect expenses.

MANAGEMENT'S DISCUSSION & ANALYSIS

Wealth Management

Wealth management comprises Private Wealth Management, International Corporate Banking and Investment Management.

Dedicated wealth management relationship managers provide traditional core banking, complex credit, investment advice, discretionary portfolio management, trust services and wealth planning to the high and ultra-high net worth clients.

International Corporate Banking is a specialised business that facilitates leveraging of legislation and incentives in the international financial services jurisdictions to offer international clients a wide range of products, services and financial solutions.

Total revenue increased year on year as a result of higher internal revenue and fees and commissions.

Net income increased year on year by \$1.5 million driven by the higher total revenue, and lower operating and indirect expenses.

Administration

The Administration segment includes Finance, HR, Risk, Technology & Operations, Treasury, and other units, which support the business segments. The revenues and expenses of the functional groups are generally allocated to the business segments. The administration segment retains earnings on excess capital and the offset to capital charges allocated to the business segments.

Treasury is responsible for balance sheet and liquidity risk management for the Bank. Securities and cash placements are normally held within the Treasury unit included in the Administration segment.

Risk Management Approach

The Bank assumes a variety of risks in its ordinary business activities. Risk is defined as any event that could: damage the core earnings capacity of the Bank; increase earnings or cash flow volatility; reduce capital; threaten business reputation or viability; and/or breach regulatory or legal obligations.

The Bank's approach to risk management is based on sound banking principles and a robust governance structure. Risk is managed within tolerance levels established by our management committees and approved by the Board of Directors and its committees (the Board). This is achieved through a comprehensive framework of measurement, monitoring and control policies, procedures and processes. Further information on credit, market and liquidity risks within the Bank can be found in note 27 of the consolidated financial statements.

Primary responsibility for the identification and assessment of risk lies with line management in our various strategic business units. The Risk Management department, which reports to the Chief Risk Officer, develops risk policies and procedures and provides independent oversight, analysis and adjudication through centrally based teams which manage credit risk, market risk, and operational risk.

The Bank's risk management policies and procedures are designed to identify and analyse these risks, to set appropriate risk limits, and to monitor and enhance risk management practices to reflect changes in markets, products and evolving best practice.

MANAGEMENT'S DISCUSSION & ANALYSIS

A robust control and governance structure is embedded within each strategic business unit. Representatives from Risk Management interact with the senior leadership of each strategic business unit in order to identify and manage risks in the respective businesses. This approach is supported by comprehensive enterprise-wide reporting.

Credit Risk

Credit risk is defined as the risk of financial loss due to a borrower or counterparty failing to meet its obligations in accordance with agreed terms. Credit risk primarily arises from direct lending activities, as well as trading, investment and hedging activities.

Credit risk is managed and controlled on the basis of established credit processes and policies operating within a framework of delegated authorities. In addition to approving the Bank's key credit policies and setting credit risk appetite and tolerances, the Risk Committee of the Board also delegates credit approval limits to the Credit Committee of the Bank. The Credit Committee is chaired by the Chief Risk Officer. There is appropriate segregation of duties between customer facing functions responsible for originating and managing exposures, the Credit Risk Management function responsible for credit adjudication and oversight, and the Operations function responsible for disbursing loans and safekeeping security.

Credit grading, scoring and monitoring systems facilitate the early identification and management of deterioration in loan quality. Delinquent facilities are subject to separate and additional oversight by specialised loan restructuring teams. Classification is automated and operates strictly in line with regulatory and accounting standards. Credit provisions are independently calculated in accordance with International Financial Reporting Standards (IFRS) for statutory reporting and in accordance with the Bank and Trust Companies Regulation Act, 2000 to meet regulatory requirements by the central risk and financial controls teams.

Market Risk

Market risk is the measurement of potential loss arising from adverse movements in interest rates, foreign exchange rates, equity and commodity prices, and credit spread risk in the Bank's investment portfolios. It arises in trading activities, as well as in the natural course of wholesale and retail business. The principal aim of the Bank's market risk management activities is to limit the adverse impact of interest rate and exchange rate movements on profitability and shareholder value and to enhance earnings within defined limits.

The Risk Committee of the Board reviews market risk strategy and establishes overall limits. It approves key policies, oversees the measurement, monitoring and control regime, and delegates market risk limits to the Chief Risk Officer.

There is no single risk measure that captures all aspects of market risk. The Bank uses several risk measures including Value at Risk ('VaR'), sensitivity measures and stress testing. Market risks are managed by setting limits based upon the specific markets and products where the Bank is involved, as well as the amount of the Bank's capital at risk. These measurement methodologies utilise international best practice. There is a centralised, dedicated Market Risk Management team charged with the responsibility to ensure that the risk measurement methodologies used are appropriate for the risks being taken and that appropriate measurement, monitoring and control procedures are in place.

Compliance Risk

Compliance risk is associated with failures to comply with laws, regulations, rules, and the codes of ethics and conduct applicable to our business activities. Such failures can give rise to legal or regulatory sanctions, material financial loss, or a loss of reputation to the Bank.

Primary responsibility for compliance lies with territorial line management. The compliance team within the Risk Management department is tasked with identifying the compliance obligations in each country where the Bank operates. It also provides advice and guidance to the business lines on compliance risks and the development of appropriate policies and procedures to ensure compliance with all legislation and internal code of conduct and ethics policies. It independently assesses and monitors compliance and reports to the Audit & Governance Committee of the Board.

Operational Risk

The Bank defines operational risk as the measurement of potential loss or damaged reputation from failed or inadequate internal processes, people and systems or from external events. Operational risks are inherent in all activities within the Bank, including in outsourced activities and in all interactions with external parties.

MANAGEMENT'S DISCUSSION & ANALYSIS

Strong internal governance and controls, including a fraud framework, operational risk testing, and trained staff, is the key to successful operational risk management. Each strategic business unit is primarily responsible for identifying, assessing and managing operational risks in that business unit. An Operational Risk Management team develops and maintains the framework for identifying, monitoring and controlling operational risks and supports each business unit in implementing the framework and raising awareness of operational risks. This team also sets policy and monitors compliance. Operational risk management activities across the Bank are reported regularly to the Audit Committee and Risk Committee.

The Bank's operational risk management framework includes ongoing monitoring through self-assessment of control deficiencies and weaknesses, and the tracking of incidents and loss events to ensure that, once identified, control deficiencies are communicated and remedied in a timely fashion across the Bank.

Liquidity Risk

Liquidity risk is defined as the risk that the Bank will experience difficulty in financing its assets and meeting its contractual payment obligations, or will only be able to do so at an unacceptably high cost. The Bank is exposed to liquidity risk through our general funding activities and in the management of our assets and liabilities. The Bank's exposure to liquidity risk is governed by a Liquidity Management Policy and Framework approved by the Board. The operation of the policy is delegated to Management in the form of the Asset and Liability Committee (ALCO). The Bank and individual operating company ALMTs (Asset and Liability Management Teams) are responsible for monitoring liquidity risk and adherence to the Liquidity Management Policy. Day-to-day management of liquidity is handled by the Treasury team.

The Bank performs stress tests and scenario analyses to evaluate the impact of stresses on its liquidity position. These tests are at both a Bank specific and systemic risk level. The results are independently reviewed by the market risk function and reported to the Board quarterly.

Independent Auditors' Report

The Shareholders and Directors
FirstCaribbean International Bank (Bahamas) Limited

Report on the Audit of the Consolidated Financial Statements

Opinion

We have audited the consolidated financial statements of FirstCaribbean International Bank (Bahamas) Limited (the “Bank”) which comprise the consolidated statement of financial position as at October 31, 2018, and the consolidated statement of income, consolidated statement of comprehensive income, consolidated statement of changes in equity and consolidated statement of cash flows for the year then ended, and notes to the consolidated financial statements, including a summary of significant accounting policies.

In our opinion, the accompanying consolidated financial statements present fairly, in all material respects, the financial position of the Bank as at October 31, 2018, and its financial performance and its cash flows for the year then ended in accordance with International Financial Reporting Standards.

Basis for Opinion

We conducted our audit in accordance with International Standards on Auditing (“ISAs”). Our responsibilities under those standards are further described in the *Auditors' responsibilities for the audit of the consolidated financial statements* section of our report. We are independent of the Bank in accordance with the International Ethics Standards Board for Accountants' *Code of Ethics for Professional Accountants* (“IESBA Code”), and we have fulfilled our other ethical responsibilities in accordance with the IESBA Code. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Key Audit Matters

Key audit matters are those matters that, in our professional judgment, were of most significance in our audit of the consolidated financial statements of the current period. These matters were addressed in the context of our audit of the consolidated financial statements as a whole, and in forming our opinion thereon, and we do not provide a separate opinion on these matters. For each matter below, our description of how our audit addressed the matter is provided in that context.

We have fulfilled the responsibilities described in the *Auditors' responsibilities for the Audit of the Consolidated Financial Statements* section of our report, including in relation to these matters. Accordingly, our audit included the performance of procedures designed to respond to our assessment of the risks of material misstatement of the consolidated financial statements. The results of our audit procedures, including the procedures performed to address the matters below, provide the basis for our audit opinion on the accompanying consolidated financial statements.

Key Audit Matter

How our Audit Addressed the Key Audit Matter

Expected credit loss allowances

Related disclosures in the consolidated financial statements are included in Note 2.3, Adoption of new accounting policies, Note 2.4, Summary of significant accounting policies—Impairment of financial assets, Note 7, Securities, Note 8, Loans and advances to customers and Note 27, Financial risk management.

The Bank early adopted IFRS 9: Financial Instruments effective 1 November 2017. The standard changes the evaluation of credit losses from an incurred approach to an expected credit loss model (“ECL”) which requires significantly greater management judgement and incorporation of forward looking information. IFRS 9 requires the Bank to record an allowance for ECLs for all loans and advances to customers and other financial assets not held at fair value through profit and loss, together with loan commitments and financial guarantee contracts. The Bank estimated a total ECL allowance of \$124M as at October 31, 2018.

This is a key audit matter as the estimation of ECLs is inherently uncertain and requires the application of judgement and use of subjective assumptions by management. Furthermore, models used to determine credit impairments are complex, and certain inputs used are not fully observable. Management compensates for any model and data deficiencies by applying judgmental overlays to ECL model outputs.

- We evaluated the modelling techniques and methodologies developed by the Bank in order to estimate ECLs, and assessed their compliance with the requirements of IFRS 9.
- We assessed and tested the design and operating effectiveness of management’s controls over the process for estimation of ECLs.
- We tested the completeness and accuracy of input data to the models used to determine the ECLs. We assessed the methodologies and assumptions applied in determining 12 month and lifetime probabilities of default (“PD”), loss given default (“LGD”), exposure at default (“EAD”) and staging. We assessed external source of data and assumptions, particularly with respect to forward looking information (“FLI”) by testing to independent sources.
- We involved our internal financial services risk management and economics specialists to evaluate the methodology for validating models and analyzing modelling accuracy and consistency of impairment parameters. They also assessed the generation of FLI. We used our internal real estate specialists to access the methodology used and values obtained for the third party appraisals for real estate held as collateral for loans.
- We assessed the qualitative adjustments or overlays derived outside of specific model output.
- We assessed the adequacy of the related disclosures in the consolidated financial statements.

Key Audit Matter

How our Audit Addressed the Key Audit Matter

Goodwill

Related disclosures in the consolidated financial statements are included in Note 2.4, Summary of significant accounting policies—Goodwill and Note 11, Goodwill.

Goodwill of \$73M represents the excess of the cost of an acquisition over the fair value of the identifiable net assets of the acquired subsidiary and in accordance with International Accounting Standard 36, management is required to annually test goodwill for impairment. Goodwill is deemed to be impaired if the carrying value of a cash generating unit (“CGU”) is in excess of its recoverable amount.

This is a key audit matter since impairment requires significant estimation and judgement relative to assumptions used for projected cash flows for CGU (e.g. growth rates, terminal values and discount rates).

This impairment testing is sensitive to variations in estimates and assumptions that can result in significantly different conclusions.

- We assessed key assumptions used by management in the determination of cash flow projections and discount rates. We compared these assumptions to historical performance, growth rates in light of expected future economic conditions and independent sources of information.
- We evaluated whether the impairment testing methodology met the requirements of International Accounting Standard 36, Impairment of Assets.
- We assessed the sensitivity of the assumptions to reasonable possible changes that could result in the carrying value of CGU exceeding their recoverable amount.
- We assessed the accuracy of management’s historic forecasting performance in light of actual results.
- We involved an internal valuation specialist to assist us in evaluating the methodology and assumptions used by management in performing the impairment test.
- We assessed the adequacy of the related disclosures in the consolidated financial statements.

Key Audit Matter	How our Audit Addressed the Key Audit Matter
<p><i>Fair value of investment securities</i></p> <p>Related disclosures in the consolidated financial statements are included in Note 2.4, Summary of significant accounting policies—debt instruments at FVOCI—equity instruments at FVOCI, Note 7, Securities and Note 27, Financial risk management.</p> <p>This is a key audit matter due to the complexity of valuation models used to determine fair value. The valuation models can be subjective in nature and involve observable and unobservable data and various assumptions. These include the valuation of financial instruments with higher estimation uncertainty for which observable market prices or market parameters are not available. The use of different valuation techniques and assumptions could result in significantly different estimates of fair value. The associated risk management disclosure is also complex and dependent upon high quality data.</p>	<ul style="list-style-type: none"> • We assessed and tested the design and operating effectiveness of management’s controls over the investment securities valuation process • We reviewed the market prices applied to the Bank’s debt securities by comparing the prices used to an independent external source. • We involved internal valuation specialists to assess the fair value of investment securities which did not have observable market prices. • We assessed the adequacy of the related disclosures in the consolidated financial statements.

Responsibilities of Management and the Board of Directors for the Consolidated Financial Statements

Management is responsible for the preparation and fair presentation of the consolidated financial statements in accordance with International Financial Reporting Standards, and for such internal control as management determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the consolidated financial statements, management is responsible for assessing the Bank’s ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Bank or to cease operations, or has no realistic alternative but to do so.

The Board of Directors is responsible for overseeing the Bank's financial reporting process.

Auditors' Responsibilities for the Audit of the Consolidated Financial Statements

Our objectives are to obtain reasonable assurance about whether the consolidated financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditors' report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these consolidated financial statements.

As part of an audit in accordance with ISAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the consolidated financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Bank's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Bank's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditors' report to the related disclosures in the consolidated financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditors' report. However, future events or conditions may cause the Bank to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the consolidated financial statements, including the disclosures, and whether the consolidated financial statements represent the underlying transactions and events in a manner that achieves fair presentation.

We communicate with the management and the Board of Directors regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

We also provide the Audit Committee with a statement that we have complied with relevant ethical requirements regarding independence, and to communicate with them all relationships and other matters that may reasonably be thought to bear on our independence, and where applicable, related safeguards.

From the matters communicated with management and the Audit Committee, we determine those matters that were of most significance in the audit of the consolidated financial statements of the current period and are therefore the key audit matters. We describe these matters in our auditors' report unless law or regulation precludes public disclosure about the matter or when, in extremely rare circumstances, we determine that a matter should not be communicated in our report because the adverse consequences of doing so would reasonably be expected to outweigh the public interest benefits of such communication.

The partner in charge of the audit resulting in this independent auditors' report is LaNishka F. McSweeney.

The signature 'Ernst & Young' is written in a black, cursive script font.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the year ended October 31, 2018
(Expressed in thousands of Bahamian dollars)

Note 1 | Corporate Information

FirstCaribbean International Bank (Bahamas) Limited (the “Bank”) was formerly named CIBC Bahamas Limited (“CIBC Bahamas”) and was controlled by Canadian Imperial Bank of Commerce (CIBC), a company incorporated in Canada. The Bank changed its name to FirstCaribbean International Bank (Bahamas) Limited on October 11, 2002, following the combination of the retail, corporate and offshore banking operations of Barclays Bank PLC in The Bahamas and the Turks & Caicos Islands (“Barclays Bahamas”) and CIBC Bahamas. The Bank is incorporated in The Commonwealth of The Bahamas and is licensed to carry on banking and other related activities.

The Bank is a subsidiary of FirstCaribbean International Bank Limited (the “Parent” or “FCIB”), a company incorporated and domiciled in Barbados, which owns 95.2% of the Bank. The Parent and its subsidiaries (collectively, the “Parent Group”) is owned by CIBC (the “Ultimate Parent”), a company incorporated in Canada. From October 11, 2002, the major shareholders of FirstCaribbean International Bank (Bahamas) Limited were jointly CIBC and Barclays Bank PLC, (“Barclays”), a company incorporated in England. On December 22, 2006, CIBC acquired Barclays’ interest in the Parent and now owns 91.7% of the shares of FirstCaribbean International Bank Limited.

The registered office of the Bank is located at the FirstCaribbean Financial Centre, 2nd Floor, Shirley Street, Nassau, The Bahamas. The Bank is listed on the Bahamas International Securities Exchange (“BISX”).

These consolidated financial statements have been authorised for issue by the Board of Directors on February 13, 2019. The Board of Directors has the power to amend these consolidated financial statements after issue, if required.

Note 2 | Basis of Preparation and Summary of Significant Accounting Policies

The principal accounting policies applied in the preparation of these consolidated financial statements are set out below.

2.1 Basis of preparation

The consolidated financial statements have been prepared on a historical cost basis, except for debt instruments at fair value through other comprehensive income (“FVOCI”), financial assets and liabilities at fair value through the profit or loss and derivative financial instruments, which have all been measured at fair value. The carrying values of recognised assets that are hedged items in fair value hedges, and otherwise carried at amortised cost, are adjusted to record changes in fair value attributable to the risks that are being hedged. The consolidated financial statements are presented in Bahamian dollars, and all values are rounded to the nearest thousand except where otherwise indicated.

The consolidated financial statements provide comparative information in respect of the previous period. In addition, the Bank presents an additional statement of financial position at the beginning of the earliest period presented when there is a retrospective application of an accounting policy, a retrospective restatement, or a reclassification of items in the financial statements.

Statement of compliance

The consolidated financial statements of the Bank have been prepared in accordance with International Financial Reporting Standards (“IFRS”) as issued by the International Accounting Standards Board (“IASB”).

Basis of consolidation

The consolidated financial statements comprise the financial statements of the Bank and its subsidiaries as at October 31, 2018 (the “reporting date”). The financial statements of the subsidiaries are prepared for the same reporting year as the Bank, using consistent accounting policies.

Subsidiaries

All subsidiaries, which are those companies controlled by the Bank, have been fully consolidated. The principal subsidiaries of the Bank are disclosed in Note 28.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the year ended October 31, 2018
(Expressed in thousands of Bahamian dollars)

Control is achieved when the Bank is exposed, or has rights, to variable returns from its involvement with the investee and has the ability to affect those returns through its power over the investee. Specifically, the Bank controls an investee if and only if the Bank has: 1) Power over the investee (i.e. existing rights that give it the current ability to direct the relevant activities of the investee); 2) Exposure, or rights, to variable returns from its involvement with the investee; and 3) The ability to use its power over the investee to affect its returns.

When the Bank has less than a majority of the voting or similar rights of an investee, the Bank considers all relevant facts and circumstances in assessing whether it has power over an investee, including: 1) The contractual arrangement with the other vote holders of the investee; 2) Rights arising from other contractual arrangements; and 3) The Bank's voting rights and potential voting rights.

The Bank re-assesses whether or not it controls an investee if facts and circumstances indicate that there are changes to one or more of the three elements of control. Consolidation of a subsidiary begins when the Bank obtains control over the subsidiary and ceases when the Bank loses control of the subsidiary. Assets, liabilities, income and expenses of a subsidiary acquired or disposed of during the year are included in the consolidated financial statements from the date the Bank gains control until the date the Bank ceases to control the subsidiary.

All inter-company transactions, balances and unrealised surpluses and deficits on transactions and balances have been eliminated.

2.2 Significant accounting judgments and estimates

The preparation of financial statements in conformity with IFRS requires management to make certain significant judgments and estimates that affect amounts reported in the financial statements and accompanying notes. Actual results could differ from these estimates.

Estimates and judgments are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

Other disclosures relating to the Bank's exposure to risks and uncertainties include:

- Capital management - Note 14
- Financial risk management and policies - Note 27
- Sensitivity analysis disclosures - Notes 10, 11, 27

The estimates and judgments that have a significant risk of causing material adjustments to the carrying amounts of assets and liabilities within the next financial year are discussed below.

Fair value of financial instruments

Certain financial instruments are recorded at fair value using valuation techniques in which current market transactions or observable market data are not available. Their fair value is determined using a valuation model that has been tested against prices of, or inputs to, actual market transactions and using the Bank's best estimates of the most appropriate model assumptions. Models are adjusted to reflect the spread for bid and ask prices to reflect costs to close out positions, counterparty credit, liquidity spread and limitations in the model.

Impairment losses on financial assets

The measurement of impairment losses both under IFRS 9 and IAS 39 across all categories of financial assets requires judgment, in particular, the estimation of the amount and timing of future cash flows and collateral values when determining impairment losses and the assessment of a significant increase in credit risk. These estimates are driven by a number of factors, changes in which can result in different levels of allowances.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the year ended October 31, 2018
(Expressed in thousands of Bahamian dollars)

The Bank's expected credit loss ("ECL") calculations are outputs of complex models with a number of underlying assumptions regarding the choice of variable inputs and their interdependencies. Elements of the ECL models that are considered accounting judgments and estimates include:

- The Bank's internal credit grading model, which assigns Probable Defaults ("PDs") to the individual grades
- The Bank's criteria for assessing if there has been a significant increase in credit risk, and so allowances for financial assets should be measured on a Lifetime ECL ("LTECL") basis and the qualitative assessment
- The segmentation of financial assets when their ECL is assessed on a collective basis
- Development of ECL models, including the various formulas and the choice of inputs
- Determination of associations between macroeconomic scenarios and economic inputs, such as unemployment levels and collateral values, and the effect on PDs, Exposure at Default ("EAD") and Loss Given Defaults ("LGD")
- Selection of forward-looking macroeconomic scenarios and their probability weightings, to derive the economic inputs into the ECL models.

It has been the Bank's policy to regularly review its models in the context of actual loss experience and adjust when necessary.

Retirement benefit obligations

Accounting for some retirement benefit obligations requires the use of actuarial techniques to make a reliable estimate of the amount of benefits that employees have earned in return for their service in the current and prior periods. These actuarial assumptions are based on management's best estimates of the variables that will determine the ultimate cost of providing post-employment benefits and comprise both demographic and financial assumptions. This includes assumptions about discount rates, expected rates of return on assets, future salary increases, mortality rates and future pension increases. Variations in the financial assumptions can cause material adjustments in future years, if it is determined that the actual experience differed from the estimate.

In determining the appropriate discount rate, management considers the interest rates of government bonds, in the absence of corporate bonds, in currencies consistent with the currencies of the post-employment benefit obligation with at least an 'AA' rating or above, as set by an internationally acknowledged rating agency, and extrapolated as needed along the yield curve to correspond with the expected term of the defined benefit obligation. The mortality rate is based on publicly available mortality tables. Future salary increases and pension increases are based on expected future inflation rates. Further details about pension obligations are given in Note 10.

Taxes

Income taxes

The Bank is not subject to income taxes in The Bahamas and the Turks and Caicos Islands.

Value Added Tax (VAT)

Effective January 1, 2015, the Government of The Commonwealth of The Bahamas implemented a value added tax (VAT). VAT is an indirect tax which is considered a broadly based consumption tax charged on the value added to goods and services. It applies to almost all goods and services that are imported, bought and sold for use or consumption. Conversely, exported goods and services supplied to customers abroad are exempted or zero-rated. Effective July 1, 2018, the VAT rate was increased from 7.5% to 12%. The Company is a VAT registrant.

Goodwill

In accordance with International Accounting Standards ("IAS") 36, goodwill is reviewed for impairment annually using the "value in use" method. This requires the use of estimates for determination of future cash flows expected to arise from each cash-generating unit and an appropriate discount rate to calculate present value.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the year ended October 31, 2018
(Expressed in thousands of Bahamian dollars)

Going concern

The Bank's management has made an assessment of the Bank's ability to continue as a going concern and is satisfied that the Bank has the resources to continue in business for the foreseeable future. Furthermore, management is not aware of any material uncertainties that may cast significant doubt upon the Bank's ability to continue as a going concern. Therefore, the consolidated financial statements continue to be prepared on the going concern basis.

2.3 Adoption of new accounting policies

The accounting policies adopted are consistent with those of the previous financial year with the exception of those impacted by new and amended standards and interpretations.

New and amended standards and interpretations

In these consolidated financial statements, the Bank early adopted IFRS 9 and the related IFRS 7R which are effective for annual periods beginning on or after January 1, 2018. These standards were applied on a retrospective basis, with certain exceptions. As permitted, prior period comparative consolidated financial statements were not restated. Differences in the carrying amounts of financial instruments resulting from the adoption of IFRS 9 are recognised in opening November 1, 2017 retained earnings and accumulated other comprehensive income (AOCI) as if the Bank had always followed the new requirements. As permitted, the Bank has elected to continue to apply the hedge accounting requirements of IAS 39.

In addition, the Bank applied amendments to IAS 7 Statement of Cash Flows.

The nature and the impact of the new standards and amendments is described below:

IFRS 9 Financial Instruments

IFRS 9 replaces IAS 39 as at November 1, 2017. The Bank elected, as a policy choice permitted under IFRS 9, to continue to apply hedge accounting in accordance with IAS 39. The Bank has not restated comparative information for 2017 for financial instruments in the scope of IFRS 9. Therefore, the comparative information for 2017 is reported under IAS 39 and is not comparable to the information presented for 2018. Differences arising from the adoption of IFRS 9 have been recognised directly in retained earnings as of November 1, 2017 and are disclosed below.

Changes to classification and measurement

To determine their classification and measurement category, IFRS 9 requires all financial assets, except equity instruments and derivatives, to be assessed based on a combination of the entity's business model for managing the assets and the instruments' contractual cash flow characteristics. The IAS 39 measurement categories of financial assets (fair value through profit or loss (FVPL), available-for-sale (AFS), held-to-maturity and amortised cost) have been replaced by:

- Debt instruments at amortised cost
- Debt instruments at fair value through other comprehensive income (FVOCI), with gains or losses recycled to profit or loss on derecognition
- Equity instruments at FVOCI, with no recycling of gains or losses to profit or loss on derecognition
- Financial assets at FVPL

The accounting for financial liabilities remains largely the same as it was under IAS 39, except for the treatment of gains or losses arising from an entity's own credit risk relating to liabilities designated at FVPL. Such movements are presented in OCI with no subsequent reclassification to the consolidated statement of income.

Under IFRS 9, embedded derivatives are no longer separated from a host financial asset. Instead, financial assets are classified based on the business model and their contractual terms, as explained in Note 2.3. The accounting for derivatives embedded in financial liabilities and in non-financial host contracts has not changed. The Bank's accounting policies for embedded derivatives are set out in Note 2.3.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the year ended October 31, 2018
(Expressed in thousands of Bahamian dollars)

The Bank's classification of its financial assets and liabilities is explained in Note 2.3. The quantitative impact of applying IFRS 9 as at November 1, 2017 is disclosed in this Note.

Changes to the impairment calculation

The adoption of IFRS 9 has fundamentally changed the Bank's accounting for loan loss impairments by replacing IAS 39's incurred loss approach with a forward-looking expected credit loss (ECL) approach. IFRS 9 requires the Bank to record an allowance for ECLs for all loans and other debt financial assets not held at FVPL, together with loan commitments and financial guarantee contracts. The allowance is based on the ECLs associated with the probability of default in the next twelve months unless there has been a significant increase in credit risk since origination. If the financial asset meets the definition of purchased or originated credit impaired (POCI), the allowance is based on the change in the ECLs over the life of the asset.

Details of the Bank's impairment method are disclosed in Note 2.3. The quantitative impact of applying IFRS 9 as at November 1, 2017 is disclosed in this Note.

IFRS 7R Financial Instruments: Disclosures

To reflect the differences between IFRS 9 and IAS 39, IFRS 7 was updated and the Bank has adopted it, together with IFRS 9, for the year beginning November 1, 2017. Changes include transition disclosures as shown in Note 2.3, and detailed qualitative and quantitative information about the ECL calculations such as the assumptions and inputs used are set out in this Note.

Transition disclosures

The following pages set out the impact of adopting IFRS 9 on the consolidated statement of financial position, and retained earnings, including the effect of replacing IAS 39's incurred credit loss calculations with IFRS 9's ECLs.

A reconciliation between the carrying amounts under IAS 39 to the balances reported under IFRS 9 as of November 1, 2017 is as follows:

The following table reconciles the aggregate opening loan loss provision allowances under IAS 39 and provisions for loan commitments and financial guarantee contracts in accordance with IAS 37 Provisions, Contingent Liabilities and Contingent Assets to the ECL allowances under IFRS 9.

Impairment allowance for:	Loan loss provision under IAS 39/IAS 37 at October 31, 2017	Re-measurement	ECLs under IFRS 9 as at November 1, 2017
Loans and receivables at amortised cost per IAS 39/financial assets at amortised costs under IFRS 9 ⁽¹⁾	\$ 119,917	\$ 13,638	\$ 133,555
Available-for-sale debt instrument securities per IAS 39/debt financial assets at FVOCI under IFRS 9	\$ -	\$ 10,108	\$ 10,108
		\$ 23,746	

⁽¹⁾ Includes financial guarantees, letters of credit for customers and other commitments.

Amendments to IAS 7 Statement of Cash Flows: Disclosure Initiative

The amendments require entities to provide disclosure of changes in their liabilities arising from financing activities including both changes arising from cash flows and non-cash changes (such as foreign exchange gains or losses). These amendments did not materially impact the Bank's disclosures.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the year ended October 31, 2018
(Expressed in thousands of Bahamian dollars)

2.4 Summary of significant accounting policies

The principal accounting policies applied in the preparation of these consolidated financial statements are set out below.

Foreign currency translation

The consolidated financial statements are presented in Bahamian dollars, which is the Bank's functional and presentational currency.

Transactions and balances

Transactions in foreign currencies are initially recorded by the Bank at the functional currency rates prevailing at the date of the transaction. Monetary assets and liabilities denominated in foreign currencies are translated into the functional currency at rates prevailing at the reporting date and non-monetary assets and liabilities are translated at historic rates. Revenue and expenses denominated in foreign currencies are translated into the Bank's functional currency using prevailing average monthly exchange rates. Realised and unrealised gains and losses on foreign currency positions are reported in income of the current year. Translation differences on non-monetary items, such as equities classified as debt securities at FVOCI, are included in the debt securities revaluation reserve in equity.

Derivative financial instruments and hedge accounting

Initial Recognition and subsequent measurement

The Bank uses derivative financial instruments such as forward currency contracts and interest rate swaps to manage its foreign currency risks and interest rate risks, respectively. Such derivative financial instruments are initially recognised at fair value on the date on which a derivative contract is entered into and are subsequently remeasured at fair value. Derivatives are carried as financial assets when the fair value is positive and as financial liabilities when the fair value is negative.

Any gains or losses arising from changes in fair value on derivatives are taken directly to the consolidated statement of income, except for the effective portion of cash flow hedges, which is recognised in other comprehensive income.

For the purpose of hedge accounting, hedges are classified as:

- Fair value hedges when hedging the exposure to changes in the fair value of a recognised asset or liability or an unrecognised firm commitment (except for foreign currency risk).
- Cash flow hedges when hedging exposure to variability in cash flows that is either attributable to a particular risk associated with a recognised asset or liability or a highly probable forecast transaction or the foreign currency risk in an unrecognised firm commitment.

At the inception of a hedge relationship, the Bank formally designates and documents the hedge relationship to which the Bank wishes to apply hedge accounting and the risk management objective and strategy for undertaking the hedge. The documentation includes identification of the hedging instrument, the hedged item or transaction, the nature of the risk being hedged and how the entity will assess the effectiveness of changes in the hedging instrument's fair value in offsetting the exposure to changes in the hedged item's fair value or cash flows attributable to the hedged risk. Such hedges are expected to be highly effective in achieving offsetting changes in fair value or cash flows and are assessed at inception and on a monthly basis to determine that they actually have been highly effective throughout the financial reporting periods for which they were designated.

Hedges which meet the Bank's strict criteria for hedge accounting are accounted for as follows:

- Fair value hedge

For hedging relationships which are designated and qualify as fair value hedges and that prove to be highly effective in relation to the hedged risk, changes in the fair value of the derivatives are recorded in the consolidated statement of income, along with the corresponding change in fair value of the hedged asset or liability that is attributable to that specific hedged risk. If the hedge no longer meets the criteria for hedge accounting, an adjustment to the carrying amount of a hedged interest-bearing financial instrument is amortised to net profit or loss over the remaining period to maturity.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the year ended October 31, 2018
(Expressed in thousands of Bahamian dollars)

• Cash flow hedge

The effective portion of changes in the fair value of derivatives that are designated and qualify as cash flow hedges are recognised in other comprehensive income. The gain or loss relating to the ineffective portion is recognised immediately in the consolidated statement of income. Amounts accumulated in other comprehensive income are recycled to the consolidated statement of income in the periods in which the hedged item will affect profit or loss (for example, when the forecast sale that is hedged takes place). When a hedging instrument expires or is sold, or when a hedge no longer meets the criteria for hedge accounting, any cumulative gain or loss existing in other comprehensive income at that time remains in other comprehensive income and is recognised when the forecast transaction is ultimately recognised in the consolidated statement of income. When a forecast transaction is no longer expected to occur, the cumulative gain or loss that was reported in other comprehensive income is immediately transferred to the consolidated statement of income. As at October 31, 2018, the Bank did not have hedge relationships classified as cash flow hedges.

Certain derivative instruments do not qualify for hedge accounting or are not so designated, and changes in the fair value of these derivatives are included in net trading gains or losses within operating income.

Interest income and expense

Under both IFRS 9 and IAS 39, interest income and expense are recorded using the effective interest rate (EIR) method for all financial instruments measured at amortised cost, and financial instruments designated at FVPL. Interest income on interest bearing financial assets measured at FVOCI under IFRS 9, similarly to interest bearing financial assets classified as available-for-sale or held to maturity under IAS 39, is also recorded by using the EIR method. The EIR is the rate that exactly discounts estimated future cash receipts through the expected life of the financial instrument or, when appropriate, a shorter period, to the net carrying amount of the financial asset. When calculating the EIR, we estimate future cash flows considering all contractual terms of the financial instrument, but not future credit losses.

The EIR (and therefore, the amortised cost of the asset) is calculated by taking into account any discount or premium on acquisition, fees and costs that are an integral part of the EIR. The Bank recognises interest income using a rate of return that represents the best estimate of a constant rate of return over the expected life of the loan. Hence, it recognizes the effect of potentially different interest rates charged at various stages, and other characteristics of the product life cycle (including prepayments, penalty interest and charges). If expectations regarding the cash flows on the financial asset are revised for reasons other than credit risk, the adjustment is booked as a positive or negative adjustment to the carrying amount of the asset in the balance sheet with an increase or reduction in interest income. The adjustment is subsequently amortised through Interest and similar income in the statement of income.

The Bank calculates interest income by applying the EIR to the gross carrying amount of financial assets other than credit-impaired assets.

When a financial asset becomes credit-impaired (as set out in Note 8) and is, therefore, regarded as 'Stage 3', the Bank calculates interest income by applying the effective interest rate to the net amortised cost of the financial asset. If the financial asset cures (as outlined in Note 8) and is no longer credit-impaired, the Bank reverts to calculating interest income on a gross basis.

Interest income on financial assets mandatorily required to be measured at FVPL is recognised using the contractual interest rate.

Fee and commission income

Fees and commissions are generally recognised on an accrual basis when the service has been provided. Origination fees for loans which have a high probability of being drawn are deferred (together with related direct costs) and recognised as an adjustment to the effective interest yield on the loan. Commissions and fees arising from negotiating, or participating in the negotiation of a transaction for a third party, such as the acquisition of loans, shares, or other securities, or the purchase or sale of businesses, are recognised on completion of the underlying transaction. Portfolio and other management advisory and service fees are recognised based on the applicable service contracts. Asset management fees related to investment funds are recognised proportionately over the period the service is provided. The same principle is applied for wealth management, financial planning and custody services that are continuously provided over an extended period of time.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the year ended October 31, 2018
(Expressed in thousands of Bahamian dollars)

Customer loyalty programmes

The Bank offers customer loyalty programmes through its Credit Card products. A portion of the net fee revenues are deferred in relation to award credits under customer loyalty programmes as a separately identifiable revenue component. The amount deferred represents the fair value of the award credits and is recognised when the awards are utilised or are expired.

Financial instruments: initial recognition

Date of recognition

Financial assets and liabilities, with the exception of loans and advances to customers and balances due to customers, are initially recognised on the settlement date, which is the date that an asset is delivered to or by the Bank. This includes regular way trades: purchases or sales of financial assets that require delivery of assets within the time frame generally established by regulation or convention in the market place. Loans and advances to customers are recognised when funds are transferred to the customers' accounts. The Bank recognises balances due to customers when funds are transferred to the Bank.

Initial measurement of financial instruments

The classification of financial instruments at initial recognition depends on their contractual terms and the business model for managing the instruments. Financial instruments are initially measured at their fair value except in the case of financial assets and financial liabilities recorded at FVPL. Transaction costs are added to, or subtracted from, this amount. Trade receivables are measured at the transaction price. When the fair value of financial instruments at initial recognition differs from the transaction price, the Bank accounts for the Day 1 profit or loss, as described below.

Day 1 profit or loss

When the transaction price of the instrument differs from the fair value at origination and the fair value is based on a valuation technique using only inputs observable in market transactions, the Bank recognises the difference between the transaction price and fair value in net trading income. In those cases where fair value is based on models for which some of the inputs are not observable, the difference between the transaction price and the fair value is deferred and is only recognised in profit or loss when the inputs become observable, or when the instrument is derecognised.

Measurement categories of financial assets and liabilities

From November 1, 2017, the Bank classifies all of its financial assets based on the business model for managing the assets and the asset's contractual terms, measured at either:

- Amortised cost
- FVOCI
- FVPL

The Bank classifies and measures its derivative and trading portfolio at FVPL as explained in the summary of significant accounting policies. The Bank may designate financial instruments at FVPL, if so doing eliminates or significantly reduces measurement or recognition inconsistencies.

Before November 1, 2017, the Bank classified its financial assets as loans and receivables (amortised cost), FVPL, or available-for-sale. Financial liabilities, other than loan commitments and financial guarantees, continue to be measured at amortised cost or at FVPL when they are held for trading, and derivative instruments or the fair value designation is applied.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the year ended October 31, 2018
(Expressed in thousands of Bahamian dollars)

Financial assets and liabilities

Due from banks, Loans and advances to customers, Financial investments at amortised cost

Before November 1, 2017, Due from banks and Loans and advances to customers, included non-derivative financial assets with fixed or determinable payments that were not quoted in an active market, other than those:

- That the Bank intended to sell immediately or in the near term
- That the Bank, upon initial recognition, designated as at FVPL or as available-for-sale
- For which the Bank might not recover substantially all of its initial investment, other than because of credit deterioration, which were designated as available-for-sale

From November 1, 2017, the Bank only measures Due from banks, Loans and advances to customers and other financial investments at amortised cost if both of the following conditions are met:

- The financial asset is held within a business model with the objective to hold financial assets in order to collect contractual cash flows
- The contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest (SPPI) on the principal amount outstanding

The details of these conditions are outlined below:

Business model assessment

The Bank determines its business model at the level that best reflects how it manages groups of financial assets to achieve its business objective.

The Bank's business model is not assessed on an instrument-by-instrument basis, but at a higher level of aggregated portfolios and is based on observable factors such as:

- How the performance of the business model and the financial assets held within that business model are evaluated and reported to the entity's key management personnel
- The risks that affect the performance of the business model (and the financial assets held within that business model) and, in particular, the way those risks are managed
- How managers of the business are compensated (for example, whether the compensation is based on the fair value of the assets managed or on the contractual cash flows collected)
- The expected frequency, value and timing of sales are also important aspects of the Bank's assessment

The business model assessment is based on reasonably expected scenarios without taking 'worst case' or 'stress case' scenarios into account. If cash flows after initial recognition are realised in a way that is different from the Bank's original expectations, the Bank does not change the classification of the remaining financial assets held in that business model, but incorporates such information when assessing newly originated or newly purchased financial assets going forward.

The SPPI test

As a second step of its classification process, the Bank assesses the contractual terms of financial instruments to identify whether they meet the SPPI test.

'Principal' for the purpose of this test is defined as the fair value of the financial asset at initial recognition and may change over the life of the financial asset (for example, if there are repayments of principal or amortisation of the premium/discount).

The most significant elements of interest within a lending arrangement are typically the consideration for the time value of money and credit risk. To make the SPPI assessment, the Bank applies judgment and considers relevant factors such as the currency in which the financial asset is denominated, and the period for which the interest rate is set.

In contrast, contractual terms that introduce a more than de minimis exposure to risks or volatility in the contractual cash flows that are unrelated to a basic lending arrangement do not give rise to contractual cash flows that are solely

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the year ended October 31, 2018
(Expressed in thousands of Bahamian dollars)

payments of principal and interest on the amount outstanding. In such cases, the financial asset is required to be measured at FVPL.

Derivatives recorded at fair value through profit or loss

A derivative is a financial instrument or other contract with all three of the following characteristics:

- Its value changes in response to the change in a specified interest rate, financial instrument price, commodity price, foreign exchange rate, index of prices or rates, credit rating or credit index, or other variable, provided that, in the case of a non-financial variable, it is not specific to a party to the contract (i.e., the 'underlying').
- It requires no initial net investment or an initial net investment that is smaller than would be required for other types of contracts expected to have a similar response to changes in market factors.
- It is settled at a future date.

The Bank enters into derivative transactions with various counterparties. These may include interest rate swaps, futures, credit default swaps, cross-currency swaps, forward foreign exchange contracts and options on interest rates, foreign currencies and equities. Derivatives are recorded at fair value and carried as assets when their fair value is positive and as liabilities when their fair value is negative. The notional amount and fair value of such derivatives are disclosed separately in Note 5. Changes in the fair value of derivatives are included in net trading income unless hedge accounting is applied. Hedge accounting disclosures are provided in Note 5.

Debt instruments at FVOCI (Policy applicable from November 1, 2017)

The Bank applies the new category under IFRS 9 of debt instruments measured at FVOCI when both of the following conditions are met:

- The instrument is held within a business model, the objective of which is achieved by both collecting contractual cash flows and selling financial assets
- The contractual terms of the financial asset meet the SPPI test

These instruments largely comprise assets that had previously been classified as financial investments available-for-sale under IAS 39.

FVOCI debt instruments are subsequently measured at fair value with gains and losses arising due to changes in fair value recognised in OCI. Interest income and foreign exchange gains and losses are recognised in profit or loss in the same manner as for financial assets measured at amortised cost as explained in Note 7. The ECL calculation for debt instruments at FVOCI is explained in Note 7. Where the Bank holds more than one investment in the same security, they are deemed to be disposed of on a first-in first-out basis. On derecognition, cumulative gains or losses previously recognised in OCI are reclassified from OCI to profit or loss.

Equity instruments at FVOCI (Policy applicable from November 1, 2017)

Upon initial recognition, the Bank occasionally elects to classify irrevocably some of its equity investments as equity instruments at FVOCI when they meet the definition of Equity under IAS 32 Financial Instruments: Presentation and are not held for trading. Such classification is determined on an instrument-by-instrument basis.

Gains and losses on these equity instruments are never recycled to profit. Dividends are recognised in profit or loss as other operating income when the right of the payment has been established, except when the Bank benefits from such proceeds as a recovery of part of the cost of the instrument, in which case, such gains are recorded in OCI. Equity instruments at FVOCI are not subject to an impairment assessment.

Financial assets and liabilities at fair value through profit or loss

Financial assets and financial liabilities in this category are those that are not held for trading and have been either designated by management upon initial recognition or are mandatorily required to be measured at fair value under IFRS 9. Management only designates an instrument at FVPL upon initial recognition when one of the following criteria is met. Such designation is

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the year ended October 31, 2018
(Expressed in thousands of Bahamian dollars)

determined on an instrument-by-instrument basis:

- The designation eliminates, or significantly reduces, the inconsistent treatment that would otherwise arise from measuring the assets or liabilities or recognising gains or losses on them on a different basis, or
- The liabilities (and assets until November 1, 2017 under IAS 39) are part of a group of financial liabilities (or financial assets, or both under IAS 39), which are managed and their performance evaluated on a fair value basis, in accordance with a documented risk management or investment strategy, or
- The liabilities (and assets until November 1, 2017 under IAS 39) contains one or more embedded derivatives, unless they do not significantly modify the cash flows that would otherwise be required by the contract, or it is clear with little or no analysis when a similar instrument is first considered, that separation of the embedded derivative(s) is prohibited.

Financial assets and financial liabilities at FVPL are recorded in the consolidated statement of financial position at fair value. Changes in fair value are recorded in profit and loss with the exception of movements in fair value of liabilities designated at FVPL due to changes in the Bank's own credit risk. Such changes in fair value are recorded in the Own credit reserve through OCI and do not get recycled to the profit or loss. Interest earned or incurred on instruments designated at FVPL is accrued in interest income or interest expense, respectively, using the EIR, taking into account any discount/ premium and qualifying transaction costs being an integral part of instrument. Interest earned on assets mandatorily required to be measured at FVPL is recorded using contractual interest rate as explained in Note 5. Dividend income from equity instruments measured at FVPL is recorded in profit or loss as other operating income when the right to the payment has been established.

Financial guarantees, letters of credit and undrawn loan commitments

The Bank issues financial guarantees, letters of credit and loan commitments. Financial guarantees are initially recognised in the consolidated financial statements at fair value, being the premium received. Subsequent to initial recognition, the Bank's liability under each guarantee is measured at the higher of the amount initially recognised less cumulative amortisation recognised in the consolidated statement of income, and - under IAS 39 - the best estimate of expenditure required to settle any financial obligation arising as a result of the guarantee, or - under IFRS 9 - an ECL allowance.

The premium received is recognised in the consolidated statement of income in Net fees and commission income on a straight line basis over the life of the guarantee.

Undrawn loan commitments and letters of credits are commitments under which, over the duration of the commitment, the Bank is required to provide a loan with pre-specified terms to the customer. Similar to financial guarantee contracts, under IAS 39, a provision was made if they were an onerous contract but, from November 1, 2017, these contracts are in the scope of the ECL requirements.

The nominal contractual value of financial guarantees, letters of credit and undrawn loan commitments, where the loan agreed to be provided is on market terms, are not recorded in the consolidated statement of financial position. The nominal values of these instruments together with the corresponding ECLs are disclosed in Note 8.

The Bank occasionally issues loan commitments at below market interest rates drawdown. Such commitments are subsequently measured at the higher of the amount of the ECL allowance and the amount initially recognised less, when appropriate, the cumulative amount of income recognised as outlined in Note 8.

Available-for-sale financial investments (Policy applicable before November 1, 2017)

Available-for-sale investment securities are those intended to be held for an indefinite period of time, which may be sold in response to needs for liquidity or changes in interest rates, exchange rates, or equity prices.

All purchases and sales of financial assets at fair value through profit or loss and available-for-sale instruments that require delivery within the timeframe established by regulation or market convention ("regular way" purchases and sales) are recognised on the settlement date, which is the date that an asset is delivered to or by the Bank. Otherwise, such transactions are treated as derivatives until settlement occurs. Loans and receivables are recognised when cash is advanced to the borrower.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the year ended October 31, 2018
(Expressed in thousands of Bahamian dollars)

Financial assets not carried at fair value through profit or loss, are initially recognised at fair value plus transaction costs. Financial assets are derecognised when the rights to receive cash flows from the financial assets has expired or where the Bank has transferred substantially all risks and rewards of ownership.

Available-for-sale financial investments and financial assets or liabilities at fair value through profit or loss are subsequently re-measured at fair value based on quoted bid prices or amounts derived from cash flow models. Loans and receivables are carried at amortised cost using the effective interest method, less any provisions for impairment. Unrealised gains and losses arising from changes in the fair value of securities classified as available-for-sale are recognised in other comprehensive income. When the securities are disposed of or impaired, the related accumulated fair value adjustments are included in operating income as net gains and losses on disposals and redemptions of securities.

Unquoted equity instruments for which fair values cannot be measured reliably are recognised at cost less impairment. All gains and losses from disposals and/or changes in the fair value of financial assets and liabilities at fair value through profit or loss and derivatives held for trading are included in operating income as net trading gains or losses. All gains and losses from disposals of investment securities classified as available-for-sale are included in operating income as net gains and losses on disposals and redemptions of securities. Where certain financial assets are hedged and there is ineffectiveness, this is included in operating income as net hedging gains or losses. Dividends are recorded on the accrual basis when declared and are included in interest and similar income - securities.

During the normal course of business, financial assets carried at amortised cost may be restructured with the mutual agreement of the Bank and the counterparty. When this occurs for reasons other than those which could be considered indicators of impairment (see 'Impairment of financial assets'), the Bank assesses whether the restructured or renegotiated financial asset is significantly different from the original one by comparing the present value of the restructured cash flows discounted at the original instrument's interest rate. If the restructured terms are significantly different, the Bank derecognises the original financial asset and recognises a new one at fair value, with any difference recognised in the consolidated statement of income.

Reclassification of financial assets and liabilities

From November 1, 2017, the Bank does not reclassify its financial assets subsequent to their initial recognition, apart from the exceptional circumstances in which the Bank acquires, disposes of, or terminates a business line. Financial liabilities are never reclassified. The Bank did not reclassify any of its financial assets or liabilities in 2018.

Derecognition of financial assets and liabilities

Derecognition due to substantial modification of terms and conditions

The Bank derecognises a financial asset, such as a loan to a customer, when the terms and conditions have been renegotiated to the extent that, substantially, it becomes a new loan, with the difference recognised as a derecognition gain or loss, to the extent that an impairment loss has not already been recorded. The newly recognised loans are classified as Stage 1 for ECL measurement purposes, unless the new loan is deemed to be POCI.

When assessing whether or not to derecognise a loan to a customer, amongst others, the Bank considers the following factors:

- Change in currency of the loan
- Introduction of an equity feature
- Change in counterparty
- If the modification is such that the instrument would no longer meet the SPPI criterion

If the modification does not result in cash flows that are substantially different, the modification does not result in derecognition. Based on the change in cash flows discounted at the original EIR, the Bank records a modification gain or loss, to the extent that an impairment loss has not already been recorded.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the year ended October 31, 2018
(Expressed in thousands of Bahamian dollars)

Derecognition other than for substantial modification

Financial assets

A financial asset (or, where applicable, a part of a financial asset or part of a group of similar financial assets) is derecognised when the rights to receive cash flows from the asset have expired. The Bank also derecognises the financial asset if it has both transferred the financial asset and the transfer qualifies for derecognition.

The Bank has transferred the financial asset if, and only if, either:

- The Bank transfers its contractual rights to receive cash flows from the financial asset, or
- It retains the right to the cash flows, but has assumed an obligation to pay the received cash flows in full without material delay to a third party under a 'pass-through arrangement'.

Pass-through arrangements are transactions whereby the Bank retains the contractual rights to receive the cash flows of a financial asset (the 'original asset'), but assumes a contractual obligation to pay those cash flows to one or more entities (the 'eventual recipients'), when all of the following three conditions are met:

- The Bank has no obligation to pay amounts to the eventual recipients unless it has collected equivalent amounts from the original asset, excluding short-term advances with the right to full recovery of the amount lent plus accrued interest at market rates.
- The Bank cannot sell or pledge the original asset other than as security to the eventual recipients.
- The Bank has to remit any cash flows it collects on behalf of the eventual recipients without material delay. In addition, the Bank is not entitled to reinvest such cash flows, except for investments in cash or cash equivalents including interest earned, during the period between the collection date and the date of required remittance to the eventual recipients.

A transfer only qualifies for derecognition if either:

- The Bank has transferred substantially all the risks and rewards of the asset, or
- The Bank has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset.

The Bank considers control to be transferred if and only if, the transferee has the practical ability to sell the asset in its entirety to an unrelated third party and is able to exercise that ability unilaterally and without imposing additional restrictions on the transfer.

When the Bank has neither transferred nor retained substantially all the risks and rewards and has retained control of the asset, the asset continues to be recognised only to the extent of the Bank's continuing involvement, in which case, the Bank also recognises an associated liability. The transferred asset and the associated liability are measured on a basis that reflects the rights and obligations that the Bank has retained.

Continuing involvement that takes the form of a guarantee over the transferred asset is measured at the lower of the original carrying amount of the asset and the maximum amount of consideration the Bank could be required to pay.

If continuing involvement takes the form of a written or purchased option (or both) on the transferred asset, the continuing involvement is measured at the value the Bank would be required to pay upon repurchase. In the case of a written put option on an asset that is measured at fair value, the extent of the entity's continuing involvement is limited to the lower of the fair value of the transferred asset and the option exercise price.

Financial liabilities

A financial liability is derecognised when the obligation under the liability is discharged, cancelled, or expires. Where an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as a derecognition of the original liability and the recognition of a new liability. The difference between the carrying value of the original financial liability and the consideration paid is recognized in profit or loss.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

(Expressed in thousands of Bahamian dollars)

Impairment of financial assets (Policy applicable from November 1, 2017)

Overview of the ECL principles

As described in Note 2.3, the adoption of IFRS 9 has fundamentally changed the Bank's loan loss impairment method by replacing IAS 39's incurred loss approach with a forward-looking ECL approach. From November 1, 2017, the Bank has been recording the allowance for expected credit losses for all loans and other debt financial assets not held at FVPL, together with loan commitments and financial guarantee contracts, in this section all referred to as 'financial instruments'. Equity instruments are not subject to impairment under IFRS 9.

The ECL allowance is based on the credit losses expected to arise over the life of the asset (the lifetime expected credit loss or LTECL), unless there has been no significant increase in credit risk since origination, in which case, the allowance is based on the 12 months' expected credit loss (12mECL) as outlined in Note 8. The Bank's policies for determining if there has been a significant increase in credit risk are set out in Note 2.3.

The 12mECL is the portion of LTECLs that represent the ECLs that result from default events on a financial instrument that are possible within the 12 months after the reporting date.

Both LTECLs and 12mECLs are calculated on either an individual basis or a collective basis, depending on the nature of the underlying portfolio of financial instruments.

The Bank has established a policy to perform an assessment, at the end of each reporting period, of whether a financial instrument's credit risk has increased significantly since initial recognition, by considering the change in the risk of default occurring over the remaining life of the financial instrument. This is further explained in Note 27.

Based on the above process, the Bank groups its loans into Stage 1, Stage 2, Stage 3 and POCI, as described below:

- **Stage 1:** When loans are first recognised, the Bank recognises an allowance based on 12mECLs. Stage 1 loans also include facilities where the credit risk has improved and the loan has been reclassified from Stage 2.
- **Stage 2:** When a loan has shown a significant increase in credit risk since origination, the Bank records an allowance for the LTECLs. Stage 2 loans also include facilities where the credit risk has improved and the loan has been reclassified from Stage 3.
- **Stage 3:** Loans considered credit-impaired (as outlined in Note 8). The Bank records an allowance for the LTECLs.
- **POCI:** Purchased or originated credit impaired (POCI) assets are financial assets that are credit impaired on initial recognition. POCI assets are recorded at fair value at original recognition and interest income is subsequently recognised based on a credit-adjusted EIR. ECLs are only recognised or released to the extent that there is a subsequent change in the expected credit losses.

For financial assets for which the Bank has no reasonable expectations of recovering either the entire outstanding amount, or a proportion thereof, the gross carrying amount of the financial asset is reduced. This is considered a (partial) derecognition of the financial asset.

The calculation of ECLs

The Bank calculates ECLs based on probability-weighted scenarios to measure the expected cash shortfalls, discounted at an approximation to the EIR. A cash shortfall is the difference between the cash flows that are due to an entity in accordance with the contract and the cash flows that the entity expects to receive.

The mechanics of the ECL calculations are outlined below and the key elements are, as follows:

- **PD** - The Probability of Default is an estimate of the likelihood of default over a given time horizon. A default may only happen at a certain time over the assessed period, if the facility has not been previously derecognised and is still in the portfolio. The concept of PDs is further explained in Note 27.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the year ended October 31, 2018
(Expressed in thousands of Bahamian dollars)

- **EAD** - The Exposure at Default is an estimate of the exposure at a future default date, taking into account expected changes in the exposure after the reporting date, including repayments of principal and interest, whether scheduled by contract or otherwise, expected drawdowns on committed facilities, and accrued interest from missed payments. The EAD is further explained in Note 27.
- **LGD** - The Loss Given Default is an estimate of the loss arising in the case where a default occurs at a given time. It is based on the difference between the contractual cash flows due and those that the lender would expect to receive, including from the realisation of any collateral. It is usually expressed as a percentage of the EAD. The LGD is further explained in Note 27.

With the exception of credit cards and other revolving facilities, the maximum period for which the credit losses are determined is the contractual life of a financial instrument unless the Bank has the legal right to call it earlier.

The mechanics of the ECL method are summarised below:

- **Stage 1:** The 12mECL is calculated as the portion of LTECLs that represent the ECLs that result from default events on a financial instrument that are possible within the 12 months after the reporting date. The Bank calculates the 12mECL allowance based on the expectation of a default occurring in the 12 months following the reporting date. These expected 12-month default probabilities are applied to a forecast EAD and multiplied by the expected LGD and discounted by an approximation to the original EIR.
- **Stage 2:** When a loan has shown a significant increase in credit risk since origination, the Bank records an allowance for the LTECLs. The mechanics are similar to those explained above, but PDs and LGDs are estimated over the lifetime of the instrument. The expected cash shortfalls are discounted by an approximation to the original EIR.
- **Stage 3:** For loans considered credit-impaired, the Bank recognises the lifetime expected credit losses for these loans. The method is similar to that for Stage 2 assets, with the PD set at 100%.
- **POCI assets:** Financial assets that are credit impaired on initial recognition. The Bank only recognises the cumulative changes in lifetime ECLs since initial recognition, based on probability-weighting scenarios, discounted by the credit adjusted EIR.
- **Loan commitments and letters of credit:** When estimating 12mECL for undrawn loan commitments, the Bank applies the PD and LGD to the undrawn amount, and this amount is discounted at an approximation to the expected EIR on the loan.
For credit cards and revolving facilities that include both a loan and an undrawn commitment, ECLs are calculated and presented together with the loan. For loan commitments and letters of credit, the ECL is recognised within Provisions.
- **Financial guarantee contracts:** The Bank estimates ECLs by applying the PD and LGD to the exposure, and this amount is discounted at an approximation to the interest rate relevant to the exposure. The ECLs related to financial guarantee contracts are recognised within credit loss on financial assets.

In circumstances where The Central Bank of the Bahamas' ("The Central Bank") guidelines and regulatory rules require provisions in excess of those calculated under IFRS, the difference is disclosed as an appropriation of retained earnings and is included in a non-distributable general banking reserve.

Debt instruments measured at fair value through OCI

The ECLs for debt instruments measured at FVOCI do not reduce the carrying amount of these financial assets in the consolidated statement of financial position, which remains at fair value. Instead, an amount equal to the allowance that would arise if the assets were measured at amortised cost is recognised in OCI as an accumulated impairment amount, with a corresponding charge to profit or loss. The accumulated loss recognised in OCI is recycled to the profit and loss upon derecognition of the assets.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the year ended October 31, 2018
(Expressed in thousands of Bahamian dollars)

Purchased or originated credit impaired financial assets (POCI)

For POCI financial assets, the Bank only recognises the cumulative changes in LTECL since initial recognition in the loss allowance.

Credit cards and other revolving facilities

The Bank's product offering includes a variety of corporate and retail overdraft and credit cards facilities, in which the Bank has the right to cancel and/or reduce the facilities with one day's notice. The Bank does not limit its exposure to credit losses to the contractual notice period, but, instead calculates ECL over a period that reflects the Bank's expectations of the customer behaviour, its likelihood of default and the Bank's future risk mitigation procedures, which could include reducing or cancelling the facilities.

The ongoing assessment of whether a significant increase in credit risk has occurred for revolving facilities is similar to other lending products. This is based on shifts in the customer's internal credit grade or history of delinquency, as explained in Note 27, but greater emphasis is also given to qualitative factors such as changes in usage.

The interest rate used to discount the ECLs for credit cards is based on the average effective interest rate that is expected to be charged over the expected period of exposure to the facilities.

The calculation of ECLs, including the estimation of the expected period of exposure and discount rate is made, as explained in Note 27, on an individual basis for corporate and on a collective basis for retail products. The collective assessments are made separately for portfolios of facilities with similar credit risk characteristics.

Forward looking information

In its ECL models, the Bank relies on a broad range of forward looking information as economic inputs, such as:

- GDP growth
- Consumer price index and inflation
- Interest rates

The inputs and models used for calculating ECLs may not always capture all characteristics of the market at the date of the consolidated financial statements. To reflect this, qualitative adjustments or overlays are occasionally made as temporary adjustments when such differences are significantly material. Detailed information about these inputs and sensitivity analysis are provided in Note 27.

Collateral valuation

To mitigate its credit risks on financial assets, the Bank seeks to use collateral, where possible. The collateral comes in various forms, such as cash, securities, letters of credit/guarantees, real estate, receivables, inventories, other non-financial assets and credit enhancements such as netting agreements. The Bank's accounting policy for collateral assigned to it through its lending arrangements under IFRS 9 is the same as it was under IAS 39. Collateral, unless repossessed, is not recorded on the Bank's consolidated statement of financial position. However, the fair value of collateral affects the calculation of ECLs. It is generally assessed, at a minimum, at inception and re-assessed on a quarterly basis. Details of the impact of the Bank's various credit enhancements are disclosed in Note 8.

The Bank's credit risk management policies include requirements relating to collateral valuation and management, including verification requirements and legal certainty. Valuations are updated periodically depending upon the nature of the collateral. Management monitors the market value of collateral and requests additional collateral in accordance with the underlying agreement during its periodic review of loan accounts in arrears. Policies are in place to monitor the existence of undesirable concentration in the collateral supporting the Bank's credit exposure.

Collateral repossessed

The Bank's accounting policy under IFRS 9 remains the same as it was under IAS 39. The Bank's policy is to determine whether a repossessed asset can be best used for its internal operations or should be sold. Assets determined to be useful for the

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the year ended October 31, 2018
(Expressed in thousands of Bahamian dollars)

internal operations are transferred to their relevant asset category at the lower of their repossessed value or the carrying value of the original secured asset. Assets for which selling is determined to be a better option are transferred to assets held for sale at their fair value (if financial assets) and fair value less cost to sell for non-financial assets at the repossession date, in line with the Bank's policy.

In its normal course of business, the Bank does not physically repossess properties or other assets in its retail portfolio, but engages external agents to recover funds, generally at auction, to settle outstanding debt. Any surplus funds are returned to the customers/obligors. As a result of this practice, the residential properties under legal repossession processes are not recorded on the consolidated statement of financial position.

Write-offs

The Bank's accounting policy under IFRS 9 remains the same as it was under IAS 39. Financial assets are written off either partially or in their entirety only when the Bank has stopped pursuing the recovery. If the amount to be written off is greater than the accumulated loss allowance, the difference is first treated as an addition to the allowance that is then applied against the gross carrying amount. Any subsequent recoveries are credited to credit loss expense.

Forborne and modified loans

The Bank sometimes makes concessions or modifications to the original terms of loans as a response to the borrower's financial difficulties, rather than taking possession or to otherwise enforce collection of collateral. The Bank considers a loan forborne when such concessions or modifications are provided as a result of the borrower's present or expected financial difficulties and the Bank would not have agreed to them if the borrower had been financially healthy. Indicators of financial difficulties include defaults on covenants, or significant concerns raised by the Credit Risk Department.

Forbearance may involve extending the payment arrangements and the agreement of new loan conditions. Once the terms have been renegotiated, any impairment is measured using the original EIR as calculated before the modification of terms. It is the Bank's policy to monitor forborne loans to help ensure that future payments continue to be likely to occur. Derecognition decisions and classification between Stage 2 and Stage 3 are determined on a case-by-case basis. If these procedures identify a loss in relation to a loan, it is disclosed and managed as an impaired Stage 3 forborne asset until it is collected or written off.

From November 1, 2017, when the loan has been renegotiated or modified but not derecognised, the Bank also reassesses whether there has been a significant increase in credit risk, as set out in Note 27. The Bank also considers whether the assets should be classified as Stage 3. Once an asset has been classified as forborne, it will remain forborne for a minimum probation period according to the regulatory rules in The Bahamas and the TCI. In order for the loan to be reclassified out of the forborne category, the customer has to meet all of the following criteria:

- All of its facilities have to be considered performing
- The probation period has passed from the date the forborne contract was considered performing
- Regular payments of more than an insignificant amount of principal or interest have been made during at least half of the probation period
- The customer does not have any contract that is more than 30 days past due

Details of forborne assets are disclosed in Note 27. If modifications are substantial, the loan is derecognised.

Impairment of financial assets (Policy applicable before November 1, 2017)

Loans and receivables

The Bank assesses at each reporting date whether there is objective evidence that a financial asset or group of financial assets is impaired. A financial asset or a group of financial assets is impaired and impairment losses are incurred if, and only if, there is objective evidence of impairment as a result of one or more events that occurred after the initial recognition of the asset (a 'loss event') and that loss event (or events) has an impact on the future cash flows of the financial asset or group of financial assets that can be reliably estimated. Objective evidence that a financial asset, or group of financial assets, is

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the year ended October 31, 2018
(Expressed in thousands of Bahamian dollars)

impaired includes observable data that comes to the attention of the Bank about the following loss events:

- significant financial difficulty of the issuer or obligor;
- a breach of contract, such as a default or delinquency in interest or principal payments;
- the Bank granting to a borrower, for economic or legal reasons relating to the borrower's financial difficulty, a concession that the lender would not otherwise consider;
- it becoming probable that the borrower will enter bankruptcy or other financial reorganisation;
- the disappearance of an active market for that financial asset because of financial difficulties; or
- observable data indicating that there is a measurable decrease in the estimated future cash flows from a group of financial assets since the initial recognition of those assets, although the decrease cannot yet be identified with the individual financial assets in the group, including:
 - adverse changes in the payment status of borrowers in the group; or
 - national or local economic conditions that correlate with default on the assets in the group.

If there is objective evidence that an impairment loss on loans and advances carried at amortised cost has been incurred, the amount of the loss is measured as the difference between the carrying amount and the recoverable amount, being the estimated present value of expected cash flows, including amounts recoverable from guarantees and collateral, discounted based on the original effective interest rate. Credit cards are not classified as impaired and are fully written off at the earlier of the notice of bankruptcy, settlement, proposal, or when the payment is contractually 180 days in arrears.

In certain instances, the terms of advances to customers are restructured or renegotiated. These facilities are subject to the impairment review noted above, and where there is objective evidence of impairment, the amount of any impairment loss is measured as the difference between the carrying value of the facility and the present value of estimated future cash flows based on the renegotiated terms and conditions discounted at the original effective interest rate before restructuring.

Loans are written off, in whole or in part, against the related provision for impairment upon settlement (realisation) of collateral or in advance of settlement (no realisation) where the determination of the recoverable value is completed and there is no realistic prospect of recovery above the recoverable value. Any subsequent recoveries are credited to the consolidated statement of income. If the amount of the impairment subsequently decreases due to an event occurring after the write-down, the release of the provision is credited to the consolidated statement of income. In circumstances where The Central Bank guidelines and regulatory rules require provisions in excess of those calculated under IFRS, the difference is disclosed as an appropriation of retained earnings and is included in a non-distributable general banking reserve.

AFS debt instruments

An AFS debt instrument is identified as impaired when there is objective observable evidence about our inability to collect the contractual principal or interest. When an AFS debt instrument is determined to be impaired, an impairment loss is recognised by reclassifying the cumulative unrealised losses in other comprehensive income to the consolidated statement of income. Impairment losses previously recognised in the consolidated statement of income are reversed in the consolidated statement of income if the fair value subsequently increases and the increase can be objectively determined to relate to an event occurring after the impairment loss was recognised.

AFS equity instruments

Objective evidence of impairment for an investment in an AFS equity instrument exists if there has been a significant or prolonged decline in the fair value of the investment below its cost, or if there is information about significant adverse changes in the technological, market, economic, or legal environment in which the issuer operates, or if the issuer is experiencing significant financial difficulty.

When an AFS equity instrument is determined to be impaired, an impairment loss is recognised by reclassifying the cumulative unrealised losses in other comprehensive income to the consolidated statement of income. Impairment losses previously recognised in the consolidated statement of income cannot be subsequently reversed. Further decreases in fair value subsequent to the recognition of an impairment loss are recognised directly in the consolidated statement of income, and subsequent increases in fair value are recognised in other comprehensive income.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the year ended October 31, 2018
(Expressed in thousands of Bahamian dollars)

Impairment of non-financial assets

The Bank assesses at each reporting date, or more frequently if events or changes in circumstances indicate that the carrying value may be impaired, whether there is an indication that a non-financial asset may be impaired. If any such indication exists, or when annual impairment testing for an asset is required, the Bank makes an estimate of the asset's recoverable amount. Where the carrying amount of an asset (or cash-generating unit) exceeds its recoverable amount, the asset (or cash-generating unit) is considered impaired and is written down to its recoverable amount.

For assets, excluding goodwill, an assessment is made at each reporting date as to whether there is any indication that previously recognised impairment losses may no longer exist or may have decreased. If such indication exists, the recoverable amount is estimated. A previously recognised impairment loss is reversed only if there has been a change in the estimates used to determine the asset's recoverable amount since the last impairment loss was recognised. If that is the case, the carrying amount of the asset is increased to its recoverable amount. Impairment losses relating to Goodwill cannot be reversed for subsequent increases in its recoverable amount in future periods.

Offsetting financial instruments

Financial assets and liabilities are offset and the net amount reported in the consolidated statement of financial position when there is a legally enforceable right to offset the recognised amounts and there is an intention to settle on a net basis, or realise the asset and settle the liability simultaneously.

Goodwill

Goodwill represents the excess of the cost of an acquisition over the fair value of the identifiable net assets of the acquired subsidiary undertaking at the date of acquisition and is reported in the consolidated statement of financial position. Goodwill is tested annually for impairment at third quarter, or when circumstances indicate that the carrying value may be impaired, and carried at cost less accumulated impairment losses. Goodwill is allocated to the lowest levels for which there are separately identifiable cash flows (cash-generating units) for the purpose of impairment testing. An impairment loss is recognised for the amount by which the asset's carrying value exceeds its recoverable amount. The recoverable amount is the higher of an asset's fair value less costs to sell and value-in-use.

Property and equipment

Property and equipment is stated at historical cost less accumulated depreciation, with the exception of land which is not depreciated. Historical cost includes expenditures that are directly attributable to the acquisition of the items. Land and buildings comprise mainly of branches and offices. Subsequent costs are included in the asset's carrying amount or are recognised as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Bank and the cost of the item can be measured reliably. All other repairs and maintenance are charged to the consolidated statement of income during the financial period in which they are incurred.

Depreciation on property and equipment is computed using the straight-line method at rates considered adequate to write-off the cost of depreciable assets, less salvage, over their useful lives.

The annual rates used are:

- | | |
|-------------------------------------|-----------------------------------|
| - Buildings | 2½% |
| - Leasehold improvements | 10% or over the life of the lease |
| - Equipment, furniture and vehicles | 20 - 50% |

Depreciation methods, useful lives and residual values are reviewed at each annual reporting date and are adjusted if appropriate.

Assets that are subject to depreciation are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. Where the carrying amount of an asset is greater than its estimated recoverable amount, it is written down immediately to its recoverable amount. The asset's recoverable amount is the higher of the asset's fair value less costs to sell and the value in use.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the year ended October 31, 2018
(Expressed in thousands of Bahamian dollars)

Gains and losses on disposal of property and equipment are determined by reference to its carrying amount and are taken into account in determining net income.

Leases

Operating lease payments are recognised as an expense on a straight-line basis over the lease term and included in the consolidated statement of income.

When assets are held subject to a finance lease, the present value of the lease payments is recognised as a receivable. The difference between the gross receivable and the present value of the receivable is recognised as unearned finance income. Lease income is recognised over the term of the lease using the effective interest method, which reflects a constant periodic rate of return.

Financial guarantees

Financial guarantees are financial contracts that require the issuer to make specified payments to reimburse the holder for a loss it incurs because a specified debtor fails to make payment when due in accordance with the original or modified terms of a debt instrument.

Financial guarantee contracts issued by the Bank that are not classified as insurance contracts are initially recognised as a liability at fair value, adjusted for transaction costs that are directly attributable to the issuance of the guarantees, which is generally the premium received or receivable on the date the guarantee was given. Subsequently, financial guarantee liabilities are measured at the higher of the initial fair value, less cumulative amortisation, and the present value of any expected payment when a payment under the guarantee has become probable. A financial guarantee that qualifies as a derivative is re-measured at fair value as at each reporting date and reported as derivative instruments in assets or liabilities, as appropriate.

Cash and cash equivalents

For the purposes of the consolidated statement of cash flows, cash and cash equivalents comprise balances with less than 90 days maturity from the date of acquisition, including cash balances, non-restricted deposits with The Central Bank (excluding mandatory reserve deposits), treasury bills and other money market placements.

Provisions

Provisions are recognised when the Bank has a present legal or constructive obligation as a result of past events, it is more than likely that an outflow of resources embodying economic benefits will be required to settle the obligation, and a reliable estimate of the amount of the obligation can be made.

Restructuring provisions

Restructuring provisions are recognised only when the recognition criteria for provisions are fulfilled. The Bank has a constructive obligation when a detailed formal plan identifies the business or part of the business concerned, the location and number of employees affected, a detailed estimate of the associated costs, and an appropriate timeline. Furthermore, the employees affected have been notified of the plan's main features. If the effect of the time value of money is material, provisions are discounted using a current pre-tax rate that reflects, when appropriate, the risks specific to the liability. When discounting is used, the increase in the provision due to the passage of time is recognised as a finance cost.

Retirement benefit obligations

Pension obligations

The Bank operates a pension plan, the assets of which are held in a separate trustee-administered fund. The pension plan is funded by payments from employees and the Bank, taking account of the recommendations of independent qualified actuaries. The plan has defined benefit and defined contribution sections. A defined benefit plan is a pension plan that defines an amount of pension benefit to be provided, usually as a function of one or more factors such as age, years of service,

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the year ended October 31, 2018
(Expressed in thousands of Bahamian dollars)

or compensation. A defined contribution plan is a pension plan under which the Bank pays fixed contributions into a separate entity (a fund) and will have no legal or constructive obligation to pay further contributions if the fund does not hold sufficient assets to pay all employee benefits relating to employee service in the current and prior periods.

The asset or liability recognised in the consolidated statement of financial position in respect of the defined benefit sections of the plan is the present value of the defined benefit obligation at the reporting date minus the fair value of plan assets, together with adjustments for unrecognised actuarial gains/losses and past service costs. The defined benefit obligation is calculated annually by independent actuaries using the projected unit credit method. The present value of the defined benefit obligation is determined by the estimated future cash outflows using interest rates of government securities that have terms to maturity approximating the terms of the related liability. The pension plan is a final salary plan and the charge, representing the net periodic pension cost less employee contributions, is included in staff costs.

Re-measurements, comprising where applicable of actuarial gains and losses, the effect of the asset ceiling, excluding net interest and the return on plan assets (excluding net interest), are recognised immediately in the statement of financial position with a corresponding debit or credit to reserves through Other Comprehensive Income (“OCI”) in the period in which they occur. Re-measurements are not reclassified to profit or loss in subsequent periods.

Past service costs are recognised in profit or loss on the earlier of:

- The date of the plan amendment or curtailment; and
- The date that the Bank recognises restructuring-related costs

Net interest is calculated by applying the discount rate to the net defined benefit liability or asset. The Bank recognises the following changes in the net defined benefit obligation as part of staff costs in the consolidated statement of income:

- Service costs comprising current service costs, past-service costs, gains and losses on curtailments and non-routine settlements
- Net interest expense or income

For the defined contribution section of the plan, the Bank makes contributions to a private trustee-administered fund. Once the contributions have been paid, the Bank has no further payment obligations. The regular contributions constitute net periodic costs for the year in which they are due and as such are included in staff costs. The Bank’s contributions to the defined contribution section of the plan are charged to the consolidated statement of income in the year to which they relate.

Other post-retirement obligations

The Bank provides post-retirement healthcare benefits to its retirees. The entitlement to these benefits is usually based on the employee remaining in service up to retirement age and the completion of a minimum service period. The expected costs of these benefits are accrued over the period of employment, using a methodology similar to that for defined benefit pension plans. These obligations are valued periodically by independent qualified actuaries.

Share capital

Share issue costs

Shares issued for cash are accounted for at the issue price less any transaction costs associated with the issue. Shares issued as consideration for the purchase of assets, or a business, are recorded at the market price on the date of issue.

Dividends on ordinary shares

Dividends on ordinary shares are recognised in equity in the period in which they are declared. Dividends for the year that are declared after the reporting date are not reflected in the consolidated financial statements.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the year ended October 31, 2018
(Expressed in thousands of Bahamian dollars)

Earnings per share

Basic earnings per share is calculated by dividing the net profit attributable to shareholders by the weighted average number of ordinary shares outstanding during the year.

Fiduciary activities

The Bank commonly acts as trustee and in other fiduciary capacities that result in the holding or placing of assets on behalf of individuals, trusts, retirement benefit plans and other institutions. These assets and income arising thereon are excluded from these consolidated financial statements, as they are not assets of the Bank.

Segment reporting

Business segments are reported in a manner consistent with the internal reporting provided to the chief operating decision-maker. The chief operating decision-maker is the person or group that allocates resources to and assesses the performance of the operating segments of an entity. The Bank has determined the Parent's Senior Executive Team as its chief operating decision-maker.

Interest income is reported net within revenue as management primarily relies on net interest income as a performance measure and not the gross income and expense.

All transactions between business segments are conducted on an arm's length basis, with intra-segment revenue and costs being eliminated on consolidation. Income and expenses directly associated with each segment are included in determining business segment performance.

Fair value measurement

The Bank measures financial instruments, such as derivatives and FVOCI debt securities, at fair value at each balance sheet date. Also, fair values of financial instruments measured at amortised cost are disclosed in Note 27. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date.

The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

- In the principal market for the asset or liability; or
- In the absence of a principal market, in the most advantageous market for the asset or liability

The principal or the most advantageous market must be accessible by the Bank.

The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest.

A fair value measurement of a non-financial asset takes into account a market participant's ability to generate economic benefits by using the asset in its highest and best use or by selling it to another market participant that would use the asset in its highest and best use.

The Bank uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximising the use of relevant observable inputs and minimising the use of unobservable inputs.

All assets and liabilities for which fair value is measured or disclosed in the financial statements are categorised within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

- **Level 1** - Quoted (unadjusted) market prices in active markets for identical assets or liabilities
- **Level 2** - Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable
- **Level 3** - Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the year ended October 31, 2018
(Expressed in thousands of Bahamian dollars)

For assets and liabilities that are recognised in the consolidated financial statements on a recurring basis, the Bank determines whether transfers have occurred between levels in the hierarchy by re-assessing categorisation (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

Comparatives

Where necessary, comparative figures have been adjusted to comply with changes in presentation in the current year.

2.5 Standards issued but not yet effective

The standards and interpretations that are issued, but not yet effective, up to the date of issuance of the Bank's financial statements are disclosed below. The Bank intends to adopt these standards, if applicable, when they become effective.

IFRS 15 Revenue from Contracts with Customers

IFRS 15 was issued in May 2014, and amended in April 2016, and establishes a five-step model to account for revenue arising from contracts with customers. Under IFRS 15, revenue is recognised at an amount that reflects the consideration to which an entity expects to be entitled in exchange for transferring goods or services to a customer.

The new revenue standard will supersede all current revenue recognition requirements under IFRS. Either a full retrospective application or a modified retrospective application is required for annual periods beginning on or after January 1, 2018. Early adoption is permitted. The Bank plans to adopt the new standard on the required effective date using the modified retrospective application. During 2018, the Bank performed a detailed assessment of IFRS 15 and the impact on the Bank.

The Bank is in the business of accepting deposits from customers and entering into lending activities. The Bank also provides payment services and executes wealth management services, credit and loyalty programmes for its clients.

Based on this assessment, the impact of IFRS 15 adoption is expected to be immaterial to the Bank.

IFRS 16 Leases

The new standard does not significantly change the accounting for leases for lessors. However, it does require lessees to recognise most leases on their balance sheets as lease liabilities, with the corresponding right-of-use assets. Lessees must apply a single model for all recognised leases, but will have the option not to recognise 'short-term' leases and leases of 'low-value' assets. Generally, the profit or loss recognition pattern for recognised leases will be similar to today's finance lease accounting, with interest and depreciation expense recognised separately in the consolidated statement of income.

IFRS 16 is effective for annual periods beginning on or after January 1, 2019. Early application is permitted provided the new revenue standard, IFRS 15, is applied on the same date. Lessees must adopt IFRS 16 using either a full retrospective or a modified retrospective approach.

The Bank does not anticipate early adoption of IFRS 16 and is currently evaluating its impact.

IFRIC Interpretation 22 Foreign Currency Transactions and Advance Consideration

The interpretation clarifies that in determining the spot exchange rate to use on initial recognition of the related asset, expense or income (or part of it) on the derecognition of a non-monetary asset or non-monetary liability relating to advance consideration, the date of the transaction is the date on which an entity initially recognises the non-monetary asset or non-monetary liability arising from the advance consideration. If there are multiple payments or receipts in advance, then the entity must determine a date of the transactions for each payment or receipt of advance consideration.

The amendments are intended to eliminate diversity in practice, when recognising the related asset, expense or income (or part of it) on the derecognition of a non-monetary asset or non-monetary liability relating to advance consideration received or paid in a foreign currency.

These amendments are effective for annual periods began on or after January 1, 2018, and early application is permitted. Entities may apply the amendments on a fully retrospective basis. Alternatively, an entity may apply the interpretation prospectively to all assets, expenses and income in its scope that are initially recognised on or after: (i) The beginning

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the year ended October 31, 2018
(Expressed in thousands of Bahamian dollars)

of the reporting period in which the entity first applies the interpretation or (ii) The beginning of a prior reporting period presented as comparative information in the financial statements of the reporting period in which the entity first applies the interpretation. The Bank does not expect any effect on its consolidated financial statements.

IAS 19 Plan Amendment, Curtailment or Settlement

The amendments to IAS 19 address the accounting when a plan amendment, curtailment or settlement occurs during a reporting period. The amendments specify that when a plan amendment, curtailment or settlement occurs during the annual reporting period, an entity is required to:

- Determine current service cost for the remainder of the period after the plan amendment, curtailment or settlement, using the actuarial assumptions used to remeasure the net defined benefit liability (asset) reflecting the benefits offered under the plan and the plan assets after that event
- Determine net interest for the remainder of the period after the plan amendment, curtailment or settlement using: the net defined benefit liability (asset) reflecting the benefits offered under the plan and the plan assets after that event; and the discount rate used to remeasure that net defined benefit liability (asset).

The amendments also clarify that an entity first determines any past service cost, or a gain or loss on settlement, without considering the effect of the asset ceiling. This amount is recognised in profit or loss. An entity then determines the effect of the asset ceiling after the plan amendment, curtailment or settlement. Any change in that effect, excluding amounts included in the net interest, is recognised in other comprehensive income.

The amendments apply to plan amendments, curtailments, or settlements occurring on or after the beginning of the first annual reporting period that begins on or after January 1, 2019, with early application permitted. These amendments will apply only to any future plan amendments, curtailments, or settlements of the Bank.

Annual Improvements 2015 - 2017 Cycle

The improvements in this cycle include:

IFRS 3 Business Combinations

The amendments clarify that, when an entity obtains control of a business that is a joint operation, it applies the requirements for a business combination achieved in stages, including re-measuring previously held interests in the assets and liabilities of the joint operation at fair value. In doing so, the acquirer re-measures its entire previously held interest in the joint operation.

An entity applies those amendments to business combinations for which the acquisition date is on or after the beginning of the first annual reporting period beginning on or after January 1, 2019, with early application permitted. These amendments will apply on future business combinations of the Bank.

IFRS 11 Joint Arrangements

A party that participates in, but does not have joint control of, a joint operation might obtain joint control of the joint operation in which the activity of the joint operation constitutes a business as defined in IFRS 3. The amendments clarify that the previously held interests in that joint operation are not re-measured.

An entity applies those amendments to transactions in which it obtains joint control on or after the beginning of the first annual reporting period beginning on or after January 1, 2019, with early application permitted. These amendments are currently not applicable to the Bank but may apply to future transactions.

IAS 23 Borrowing Costs

The amendments clarify that an entity treats as part of general borrowings any borrowing originally made to develop a qualifying asset when substantially all of the activities necessary to prepare that asset for its intended use or sale are complete.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the year ended October 31, 2018
(Expressed in thousands of Bahamian dollars)

An entity applies those amendments to borrowing costs incurred on or after the beginning of the annual reporting period in which the entity first applies those amendments. An entity applies those amendments for annual reporting periods beginning on or after January 1, 2019, with early application permitted. Since the Bank's current practice is in line with these amendments, the Bank does not expect any effect on its consolidated financial statements.

Note 3 | Cash and Balances with The Central Bank

	2018	2017
Cash	\$ 42,144	\$ 34,836
Deposits with The Central Bank - non-interest bearing	123,969	113,239
Cash and balances with The Central Bank	166,113	148,075
Less: Mandatory reserve deposits with The Central Bank	(50,407)	(50,234)
Included in cash and cash equivalents, as per below	\$ 115,706	\$ 97,841

Mandatory reserve deposits with The Central Bank represent the Bank's regulatory requirement to maintain a percentage of deposit liabilities as cash or deposits with The Central Bank. These funds are not available to finance the Bank's day-to-day operations and, as such, are excluded from cash resources to arrive at cash and cash equivalents.

Cash and balances with The Central Bank are non-interest bearing.

Cash and cash equivalents

	2018	2017
Cash and balances with The Central Bank, as per above	\$ 115,706	\$ 97,841
Due from banks, included in cash and cash equivalents (Note 4)	378,486	280,996
	\$ 494,192	\$ 378,837

Note 4 | Due from Banks

	2018	2017
Included in cash and cash equivalents (Note 3)	\$ 378,486	\$ 280,996
Greater than 90 days maturity from date of acquisition	31,511	83,665
Due from banks	\$ 409,997	\$ 364,661

Due from banks comprises deposit placements and include amounts placed with other FirstCaribbean International Bank entities of \$281,160 (2017: \$194,292) and deposit placements with CIBC entities of \$21,204 (2017: \$113,224) (Note 22). Placements with other FirstCaribbean International Bank entities include amounts with FCIB Jamaica totalling \$26,461 (2017: \$37,730), which are pledged in favour of that bank in support of loans granted to certain of its customers.

The average effective yield on deposit placements during the year was 1.88 % (2017: 1.85%).

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the year ended October 31, 2018
(Expressed in thousands of Bahamian dollars)

Note 5 | Derivative Financial Instruments

The table below shows the fair values of derivative financial instruments recorded as assets or liabilities, together with their notional amounts. The notional amount, recorded gross, is the amount of a derivative's underlying asset, reference rate, or index that is the basis upon which changes in the value of derivatives are measured.

	Notional Amount		Fair Values	
	Assets	Liabilities	Assets	Liabilities
2018				
Interest rate swaps	\$ 23,717	\$ 40,187	\$ 647	\$ 5,784
			\$ 647	\$ 5,784
2017				
Interest rate swaps	\$ 34,023	\$ 144,008	\$ 366	\$ 8,918
			\$ 366	\$ 8,918

The Bank has positions in the following types of derivatives and they are measured at fair value through profit or loss:

Interest rate swaps

Interest rate swaps are contractual agreements between two parties to exchange movements in interest rates.

Cash collateral pledged with counterparties that have one-way collateral posting arrangements total \$5,261 (2017: \$7,521) and are included in Due from Banks (Note 4).

Derivative financial instruments held or issued for hedging purposes

As part of its asset and liability management, the Bank uses derivatives for hedging purposes in order to reduce its exposure to specified risks. Fair value hedges are used by the Bank to protect against changes in the fair value of specific financial assets due to movements in interest rates. The financial assets hedged for interest rate risk include fixed interest rate loans and FVOCI debt securities and are hedged by interest rate swaps.

CIBC entities are counterparties to some of the Bank's interest rate swap contracts (Note 22).

In 2018, the Bank recognised gains of \$nil (2017: \$3,667) as a result of failed hedges, along with associated fees of \$nil (2017: \$4,000), which are included within operating income as part of net trading gains/losses as these derivatives are classified as trading derivatives upon failure.

Hedged items currently designated:

2018	Carrying amount of the hedged items	Cumulative amount of fair value of hedging adjustment included in the carrying amount of the hedged items
Consolidated statement of financial position in which the hedged item is included:		
Loans & advances to customers	\$ 6,432	\$ 755
Securities	25,310	2,300
	\$ 31,742	\$ 3,055

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the year ended October 31, 2018
(Expressed in thousands of Bahamian dollars)

The following table shows the net gains and losses recognised in income related to derivatives in fair value hedging relationships for the periods ended October 31:

	2018	2017
Gains/(Losses) recorded in operating income:		
Recognised gains on hedging instruments	\$ 2,623	\$ 3,616
Recognised losses on hedged item	(2,364)	(2,385)
Net gains recognised on fair value hedges	\$ 259	\$ 1,231

Note 6 | Other Assets

	2018	2017
Clearings and suspense	\$ 9,129	\$ 7,983
Other accounts receivables (Note 22)	7,109	3,448
Prepayments and deferred items	2,019	1,825
	\$ 18,257	\$ 13,256

Included in other accounts receivables are balances due from other Parent Group entities amounting to \$25 (2017: \$25 and the Bank's retirement benefit pension plan amounting to \$4,841 (2017: \$2,918), which represents amounts paid to pensioners on the plan's behalf.

Note 7 | Securities

Allowance for credit losses on securities

The table below provides a reconciliation of the opening balance to the closing balance of the ECL allowances under IFRS 9 for debt securities measured at FVOCI:

				2018
	Stage 1	Stage 2	Stage 3	In accordance with IFRS 9
	Collective provision 12 month ECL performing	Collective provision lifetime ECL performing	Collective and individual lifetime ECL credit-impaired	Total
Debt securities at FVOCI				
Balance at November 1, 2017	\$ 7,795	\$ 2,313	\$ -	\$ 10,108
Originations net of repayments and other derecognitions	363	(8)	-	355
Net remeasurement	(472)	(1,847)	4,617	2,298
Credit loss (credit)/expense	(109)	(1,855)	4,617	2,653
Balance, end of year	\$ 7,686	\$ 458	\$ 4,617	\$ 12,761

The average effective yield during the year on debt securities and treasury bills was 3.25% (2017: 3.14%). The Bank has a regulatory reserve requirement to maintain a percentage of deposit liabilities in cash or in the form of certain government securities. At October 31, 2018, the reserve requirement amounted to \$209,009 (2017: \$206,716) of which \$158,602 (2017: \$156,482) is in the form of government securities and \$50,407 (2017: \$50,234) is included within cash and balances with The Central Bank (Note 3).

The movement in debt instruments at FVOCI (excluding interest receivable) is summarised as follows:

	2018	2017
Balance, beginning of year	\$ 792,917	\$ 670,914
Additions (purchases, changes in fair value and foreign exchange)	813,418	775,655
Disposals (sales and redemptions)	(829,701)	(653,652)
Balance, end of year	\$ 776,634	\$ 792,917

Included as part of leasehold improvements is an amount for \$1,067 (2017: \$2,052) relating to systems development costs and work in progress which is incomplete, not yet in operation and on which no depreciation has been charged.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the year ended October 31, 2018
(Expressed in thousands of Bahamian dollars)

Note 10 Retirement Benefit Assets and Obligations

The Bank has an insured group health plan and a pension plan. The pension plan is a mixture of defined benefit and defined contribution schemes.

Plan characteristics, funding and risks

The benefits that members receive at retirement under the defined contribution plan depend on their account balances at retirement and the cost of purchasing an annuity. The total expense relating to the contributory plan charged for the year was \$472 (2017: \$453), which represents contributions to the defined contribution plan by the Bank at rates specified in the rules of the plan. Refer to Note 17.

The defined benefit pension plan is non-contributory and allows for additional voluntary contributions with benefits dependent on either highest average annual pensionable earnings in the last ten years of membership or highest inflation adjusted salary in any one of the last three years of membership. The defined benefit plan is fully integrated with the benefits provided by local national insurance or social security schemes. The insured health plan allows for retirees to continue receiving health benefits during retirement. The plans require contributions to separate funds, are administered independently and are valued by independent actuaries every three years using the projected unit credit method.

Benefit changes

There were no material changes to the terms of our defined benefit pension or post-retirement medical benefit plans in 2018 or 2017.

Risks

The defined benefit pension and post-retirement medical benefit plans expose the Bank to actuarial risks, such as longevity risk, currency risk, interest rate risk, market (investment) risk and health care cost inflation risk.

Plan governance

The Bank is responsible for the establishment of the plans and oversight of their administration. The Bank's Board of Directors has delegated powers and authorities to a Pension Steering Committee ("PSC") as set out in its mandate to that committee. The PSC has established Management Committees ("MC") and an Investment Sub-Committee ("ISC") as advisory sub-committees and delegated to each of them certain of its responsibilities in connection with the management and administration of the relevant plans and the investment of plan assets. A separate trust fund has been established for each plan to receive and invest contributions and pay benefits due under each plan. All benefits are calculated and paid out in accordance with the rules of the pension plan. Funds are physically held by a trustee or trustees (whether corporate or individual) as appointed in accordance with the Trust Deeds. Each year, the PSC with input from the ISC and MC reviews the level of funding in the plans. Such a review includes the asset-liability matching strategy and investment risk management policy. The PSC decides its contribution based on the results of this annual review. The plan assets include significant investments in quoted equity shares and bonds.

Amounts recognised on the consolidated statement of financial position

The following tables present the financial position of our defined benefit pension and post-retirement medical benefit plans in which the Bank operates.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the year ended October 31, 2018
(Expressed in thousands of Bahamian dollars)

	Defined Benefit Pension Plans		Post-Retirement Medical Benefits	
	2018	2017	2018	2017
Fair value of the plan assets	\$ 125,455	\$ 126,418	\$ -	\$ -
Present value of the obligations	(109,321)	(106,357)	(10,515)	(10,818)
Net retirement benefit asset/(obligations)	\$ 16,134	\$ 20,061	\$ (10,515)	\$ (10,818)

The Retirement Benefit Assets reported on the statement of financial position comprises of the Bahamas Defined Benefit Pension Plan's net asset of \$18,179 (2017: \$22,610).

The Retirement Benefit Obligations reported on the statement of financial position comprises of the Turks and Caicos Islands (TCI) Defined Benefit Pension Plan's net obligation of \$2,045 (2017: \$2,549) and the Post-Retirement Medical Benefits obligation of \$10,515 (2017: \$10,818).

The pension plan assets include 100,000 (2017: 100,000) ordinary shares in the Bank, with a fair value of \$925 (2017: \$860).

Changes in the fair value of the defined benefit pension plan assets are as follows:

	2018	2017
Opening fair value of plan assets	\$ 126,418	\$ 116,135
Contributions by employer	-	2
Benefits paid	(3,800)	(3,393)
Actuarial gains	3,005	13,806
Plan administration costs	(168)	(132)
Closing fair value of plan assets	\$ 125,455	\$ 126,418

Changes in the present value of the obligations for defined benefit pension plans are as follows:

	2018	2017
Opening obligations	\$ (106,357)	\$ (92,018)
Interest costs	(5,455)	(5,335)
Current service costs	(2,455)	(2,197)
Benefits paid	3,800	3,393
Actuarial gains/(losses) on obligations	1,146	(10,200)
Closing obligations	\$ (109,321)	\$ (106,357)

Changes in the present value of the obligations for post-retirement medical benefits are:

	2018	2017
Opening obligations	\$ (10,818)	\$ (11,427)
Interest costs	(549)	(661)
Benefits paid	479	494
Actuarial gains on obligations	373	776
Closing obligations	\$ (10,515)	\$ (10,818)

The Bank does not expect to contribute to its defined benefit pension plan in the following year (2017: \$nil) as the plans are on a contribution holiday. The Plan Actuary of the Bank has recommended a Defined Benefit contribution holiday for the next three years. The contribution holiday is expected to last for six years if the existing surplus is to be fully amortised, and will be re-evaluated in the plan's next triennial valuation.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the year ended October 31, 2018
(Expressed in thousands of Bahamian dollars)

The amounts recognised in the consolidated statement of income are as follows:

	Defined Benefit Pension Plans		Post-Retirement Medical Benefits	
	2018	2017	2018	2017
Current service costs	\$ 2,455	\$ 2,197	\$ -	\$ -

Interest income on plan assets	(6,567)	(6,942)	-	-
Plan administration costs	168	132	-	-
Total amount included in staff costs (Note 17)	1,511	722	549	661
Actual return on plan assets	\$ (3,005)	\$ (13,806)	\$ -	-

	Defined Benefit Pension Plans		Post-Retirement Medical Benefits	
	2018	2017	2018	2017
Balance, beginning of year	\$ 20,061	\$ 24,117	\$ (10,818)	\$ (11,427)
Charge for the year (Note 17)	(1,511)	(722)	(549)	(661)
Contributions by employer	-	2	479	494
Effect on statement of other comprehensive income	(2,416)	(3,336)	373	776
Balance, end of year	\$ 16,134	\$ 20,061	\$ (10,515)	\$ (10,818)

The breakdown of the net asset/(obligations) between active members and inactive and retired members is as follows:

	Defined Benefit Pension Plans		Post-Retirement Medical Benefits	
	2018	2017	2018	2017
Active members	\$ 60,194	\$ 57,599	\$ -	\$ -
Inactive and retired members	49,127	48,758	10,515	10,818
	\$ 109,321	\$ 106,357	\$ 10,515	\$ 10,818

The average duration of the net asset/(obligations) at the end of the reporting period is as follows:

	Defined Benefit Pension Plans		Post-Retirement Medical Benefits	
	2018	2017	2018	2017
Average duration, in years	20	20	15	16

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the year ended October 31, 2018
(Expressed in thousands of Bahamian dollars)

The major categories of the plan assets and the actual (\$ in thousands and %) fair value of total plan assets are as follows:

	2018		2017	
	\$	%	\$	%
Quoted equity instruments				
- International	905	1	669	1
Quoted debt				
- Government bonds	32,712	26	280	-
- Inflation Adjust. bonds	906	1	-	-
Investment funds				
- U.S. Equity	86,137	69	83,867	66
- International Equity	1,906	1	3,004	2
- Fixed Income	-	-	35,148	28
Other assets	2,889	2	3,450	3
	125,455	100	126,418	100

The overall expected rates of return on assets are determined based on the market prices, including published brokers' forecasts prevailing on the date of valuation, applicable to the period that the obligation is to be settled.

The principal actuarial assumptions used at the reporting date are as follows:

	Defined Benefit Pension Plans	
	2018	2017
Discount rate (TCI, Bahamas)	4.3%, 5.2%	4.1%, 5.4%
Expected return on plan assets (TCI, Bahamas)	4.3%, 5.2%	4.1%, 5.4%
Future salary increases	4.0%	4.0%
Future pension increases	2.5%	2.5%

	Post-Retirement Medical Benefit	
	2018	2017
Discount rate (TCI, Bahamas)	4.3%, 5.2%	4.1%, 5.4%
Premium escalation rate	6.0%	6.0%
Existing retiree age	60	60

A quantitative sensitivity analysis for significant assumptions as at October 31, 2018 is as shown below:

Assumption	Sensitivity level	Impact on net defined benefit pension plans		Impact on Post-retirement medical benefits	
		Increase	Decrease	Increase	Decrease
Discount rate	1.0%	\$ 91,745	\$ 132,089	\$ 9,251	\$ 12,078
Future salary increases	0.5%	112,421	106,427	n/a	n/a
Future pension increases	0.5%	114,831	104,347	n/a	n/a
Premium escalation rate	1.0%	n/a	n/a	12,015	9,275
Existing retiree age	1 year	112,602	n/a	10,991	n/a

- n/a - not applicable

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the year ended October 31, 2018
(Expressed in thousands of Bahamian dollars)

The sensitivity analysis presented above is indicative only, and should be considered with caution as they have been calculated in isolation without changes in other assumptions. In practice, changes in one assumption may result in changes in another, which may magnify or counteract the disclosed sensitivities. The analysis has been determined based on a method that extrapolates the impact on the net defined benefit obligation as a result of reasonable changes in key assumptions occurring at the end of the reporting period.

The following payments are expected benefit payments to be made in future years out of the defined benefit plan obligation:

	2018	2017
Within the next 12 months	\$ 2,425	\$ 2,287
Between 1 and 5 years	12,031	11,372
Between 5 and 10 years	22,197	21,345
Total expected payments	\$ 36,653	\$ 35,004

The last actuarial valuation was conducted as at November 1, 2016 and revealed a fund surplus of \$21,133.

Note 11 | Goodwill

	2018	2017
Cost		
Balance, beginning and end of year	\$ 187,747	\$ 187,747
Accumulated impairment		
Balance, beginning and end of year	115,000	115,000
Carrying amount, end of year	\$ 72,747	\$ 72,747

Impairment tests for goodwill

Goodwill is allocated to the Bank's cash-generating units ("CGUs") identified according to country of operation.

The carrying amount of goodwill is reviewed annually for impairment and whenever there are events or changes in circumstances which indicate that the carrying amount may not be recoverable. The goodwill impairment test is performed by comparing the recoverable amount of the CGU to which goodwill has been allocated, with the carrying amount of the CGU including goodwill, with any deficiency recognised as impairment to goodwill. The recoverable amount for each CGU has been determined using value-in-use calculations that are estimated using five year cash flow projections along with an estimate of capital required to support ongoing operations. The five year cash flow projections have been approved by FCIB's Executive Committee.

Based on the impairment testing performed during the fourth quarter of fiscal 2018, we have determined that the estimated recoverable amount of the CGU was in excess of the carrying amount. As a result, no impairment charge was recognised during 2018.

Key assumptions used for value-in-use calculations

A description of each assumption on which management has based its cash flow projections for the period covered by the most recent forecasts is noted below. Key assumptions are those to which the CGU's recoverable amount is most sensitive, which include the discount and growth rates. The discount rates were determined based on the following primary factors: (i) the risk-free rate, (ii) an equity risk premium, (iii) beta adjustment to the equity risk premium based on a review of betas of comparable financial institutions in the region, and (iv) a country risk premium. The growth rates are based on management's expectations of real growth but do not exceed the long-term average growth rate for The Bahamas.

	Discount rate		Growth rate	
	2018	2017	2018	2017
Bahamas	12%	13%	2%	1%

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the year ended October 31, 2018
(Expressed in thousands of Bahamian dollars)

Estimation of the recoverable amount is an area of significant judgment. Reductions in the estimated recoverable amount could arise from various factors, such as reductions in forecasted cash flows, an increase in the assumed level of required capital and any adverse changes to the discount rate or the growth rate, either in isolation or in any combination thereof. We estimated that a 10% reduction in forecasted cash flows, or a 1% rise in the discount rate, would not significantly impact the CGUs' recoverable amount to result in any further goodwill impairment at October 31, 2018.

These sensitivities are indicative only and should be considered with caution, as the effect of the variation in each assumption on the estimated recoverable amount is calculated in isolation without changing any other assumptions. In practice, changes in one factor may result in changes in another, which may magnify, counteract, or obfuscate the disclosed sensitivities.

Note 12 | Customer Deposits

	Payable on Demand	Payable after Notice	Payable at a Fixed Date	2018 Total	2017 Total
Individuals	\$ 229,621	\$ 304,419	\$ 398,064	\$ 932,104	\$ 877,587
Business and governments	1,129,256	31,556	396,979	1,557,791	1,590,409
Banks	3,778	-	266,332	270,110	280,286
	1,362,655	335,975	1,061,375	2,760,005	2,748,282
Add: Interest payable	171	32	2,562	2,765	2,566
	\$ 1,362,826	\$ 336,007	\$ 1,063,937	\$ 2,762,770	\$ 2,750,848

These customer deposits are measured at amortised cost. Included in deposits from banks are deposits from other Parent Group entities of \$267,947 (2017: \$277,830) (Note 22).

The average effective rate of interest on deposits during the year was 0.34 % (2017: 0.33%).

Note 13 | Other Liabilities

	2018	2017
Accounts payable and accruals, including clearings	\$ 39,656	\$ 29,467
Restructuring costs	-	110
Amounts due to related parties (Note 22)	25,768	25,817
Due to brokers and others	521	485
	\$ 65,945	\$ 55,879

The amounts due to related parties refer to balances due to other Parent Group entities and are interest-free and unsecured, with no fixed terms of repayment.

During 2013, the Bank embarked on a restructuring plan which aimed to enhance its long term competitiveness through reductions in costs, duplication and complexity in the years ahead. As at October 31, 2018, the provision for severance was \$nil (2017: \$110). Movement in the provision during the year related to payments made by the Bank.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the year ended October 31, 2018
(Expressed in thousands of Bahamian dollars)

Note 14 | Issued Capital and Reserves

	2018	2017
Issued capital, beginning and end of year	\$ 477,230	\$ 477,230
Reserves		
Statutory reserve fund - Turks and Caicos Islands	\$ 49,091	\$ 46,425
Revaluation reserve - available-for-sale securities	-	(8,934)
Revaluation reserve - debt securities measured at FVOCI	(2,990)	-
Retirement benefit reserve	10,838	12,881
Reverse acquisition reserve	(63,566)	(63,566)
Total reserves	\$ (6,627)	\$ (13,194)
Total issued capital and reserves	\$ 470,603	\$ 464,036

The Bank's authorised capital is \$20 million, comprising 150 million ordinary shares with a par value of \$0.10 each and 50 million preference shares also having a par value of \$0.10 each. All issued ordinary shares are fully paid. No preference shares were issued in 2018 and 2017. At October 31, 2018 and 2017, the issued share capital was as follows:

	Number of shares	Share par value	Share premium	Total
Ordinary shares, voting	\$ 120,216	\$ 12,022	\$ 465,208	\$ 477,230

Objectives, policies and procedures

Capital strength provides protection for depositors and creditors and allows the Bank to undertake profitable business opportunities as they arise.

The Bank's objective is to employ a strong and efficient capital base. Capital is managed in accordance with policies established by the Board of Directors (the "Board"). These policies relate to capital strength, capital mix, dividends and return of capital, and the unconsolidated capital adequacy of regulated entities. Each policy has associated guidelines and capital is monitored continuously for compliance.

There were no significant changes made in the objectives, policies and procedures during the year.

Regulatory requirements

The Bank's regulatory capital requirements are determined in accordance with guidelines issued by The Central Bank. These guidelines evolve from the framework of risk-based capital standards developed by the Basel Committee, Bank of International Settlement (BIS).

BIS standards require that banks maintain minimum Tier 1 and Total Capital ratios of 6% and 8%, respectively. The Central Bank has established that Bahamian deposit-taking financial institutions maintain Tier 1 and Total Capital ratios of 12.8% and 17%, respectively. During the year, the Bank has complied in full with all of our regulatory capital requirements.

Regulatory capital

Regulatory capital consists of Tier 1 and Tier 2 Capital, less certain deductions. Tier 1 Capital is comprised of common stock, retained earnings and non-controlling interest in consolidated subsidiaries, less goodwill and other deductions. Tier 2 Capital principally comprises hybrid capital instruments such as subordinated debt and general provisions and 45% of revaluation reserves on debt securities measured at FVOCI.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the year ended October 31, 2018
(Expressed in thousands of Bahamian dollars)

In 2018, Tier 1 and Total Capital ratios were 25% and 25%, respectively (2017: 27% and 28%, respectively).

The movements in reserves were as follows:

Statutory reserve fund - Turks and Caicos Islands

	2018	2017
Balance, beginning of year	\$ 46,425	\$ 42,726
Transfers from retained earnings	2,666	3,699
Balance, end of year	\$ 49,091	\$ 46,425

In accordance with the TCI Banking (Amendment) Ordinance 2002 and the regulations of the Turks and Caicos Islands Financial Services Commission, the Bank is required to maintain a statutory reserve fund of not less than the amount of its assigned capital of \$24 million. Where the required reserve is less than the assigned capital, the Bank is required to annually transfer 25% of the net profits earned from its TCI operations to this fund. Although the statutory reserve exceeds the assigned capital, it has been the Bank's practice to make this transfer based on net profits of the preceding fiscal year with the remaining net profits being retained by the Bank. During the year, the Bank transferred \$2,666 (2017: \$3,699) from retained earnings to the statutory reserve fund.

Statutory loan loss reserve - Bahamas

Banking Regulations of The Central Bank of The Bahamas require a general provision in respect of the performing loans of at least one percent of these loans. To the extent the inherent risk provision for loans and advances to customers is less than this amount, a statutory loan loss reserve is established and the required additional amount is to be appropriated from retained earnings, in accordance with IFRS. For the year ended October 31, 2018, no statutory loan loss reserve was required as the general provision was sufficient (2017: \$nil).

Revaluation reserve - available-for-sale investment securities

	2018	2017
Balance, beginning of year	\$ (8,934)	\$ (8,927)
Net losses on available-for-sale securities (Note 20)	-	(7)
Reclassification to debt securities measured at FVOCI	8,934	-
Balance, end of year	\$ -	\$ (8,934)

Revaluation reserve - debt securities measured at FVOCI

	2018	2017
Balance, beginning of year on adopting IFRS 9	\$ -	\$ -
Reclassification from available-for-sale securities	(8,934)	-
Recognition of expected credit losses under IFRS 9	10,108	-
	1,174	-
Net losses on debt securities measured at FVOCI (Note 20)	(4,164)	-
Balance, end of year	\$ (2,990)	\$ -

Unrealised gains and losses arising from changes in the fair value of debt instruments measured at fair value are recognised in other comprehensive income and are reflected in the revaluation reserve.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the year ended October 31, 2018
(Expressed in thousands of Bahamian dollars)

Retirement benefit reserve

	2018	2017
Balance, beginning of year	\$ 12,881	\$ 15,441
Re-measurement losses on retirement benefit plans	(2,043)	(2,560)
Balance, end of year	\$ 10,838	\$ 12,881

Gains and losses arising from re-measurement of retirement benefit plans in other comprehensive income are reflected in this reserve.

Reverse acquisition reserve

	2018	2017
Balance, beginning and end of year	\$ (63,566)	\$ (63,566)

Under the combination on October 11, 2002, CIBC West Indies became the legal parent company with Barclays transferring its operations to subsidiaries of CIBC West Indies in exchange, ultimately, for common shares and newly created classes of non-voting and preference shares of CIBC West Indies. Barclays was identified as the acquirer as the fair value of its business prior to the combination was significantly greater than the fair value of CIBC West Indies' business and as a result Barclays had the greater economic interest. This situation is described by IFRS as a reverse acquisition.

In accordance with IFRS, the equity of the combined Bank at October 11, 2002, comprised the equity of the Barclays branches and subsidiaries (\$211,295), together with the fair value of the CIBC Bahamas business (\$196,966), for a total of \$408,261. However, the legal share capital and premium of the Bank comprises the issued share capital and premium of CIBC Bahamas plus the shares issued to effect the combination recorded at fair value for a total of \$472,828 at October 11, 2002.

The reverse acquisition reserve represents the difference at October 11, 2002, between the required share capital and premium of the Bank (\$472,828) together with the retained earnings of the Barclays Branches and Subsidiaries (\$1,001) and the equity of the Bank presented in accordance with IFRS (\$408,261).

Note 15 | Net Interest Income

	2018	2017
Interest and similar income		
Cash and due from banks	\$ 6,265	\$ 3,800
Securities	24,822	23,546
Loans and advances to customers	126,980	121,908
	158,067	149,254
Interest and similar expense		
Banks and customers	9,171	8,420
Derivative financial instruments	860	2,020
	10,031	10,440
Net interest income	\$ 148,036	\$ 138,814

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the year ended October 31, 2018
(Expressed in thousands of Bahamian dollars)

Note 16 | Operating Income

	2018	2017
Fee and commission income	\$ 31,522	\$ 29,780
Foreign exchange commissions	11,697	10,895
Net foreign exchange revaluation losses	(33)	(1)
Net gains/(losses) on disposals and redemption of securities (Note 20)	498	(16)
Net hedging gains (Note 5)	259	1,231
Net trading losses	(4,827)	(1,361)
Other operating income	970	944
	\$ 40,086	\$ 41,472

Net gains/(losses) on disposals and redemption of securities have arisen from disposals of FVOCI debt securities.

Net hedging gains have arisen from the difference between the changes in fair value of hedged items in respect of the hedged risk against changes in fair value of the associated hedging instruments.

Net trading losses have arisen from either disposals and/or changes in the fair value on trading securities and derivatives held for trading, which include failed hedges.

Analysis of fee and commission income:

	2018	2017
Underwriting	\$ 297	\$ 287
Deposit services	9,393	9,211
Credit services	961	2,585
Card services	13,070	10,767
Funds transfer	5,871	4,811
Other	1,930	2,119
	\$ 31,522	29,780

Note 17 | Operating Expenses

	2018	2017
Staff costs	\$ 30,484	\$ 29,251
Business licence	8,719	8,617
Occupancy and maintenance	10,421	10,437
Depreciation (Note 9)	4,562	4,532
Other operating expenses	36,791	38,382
	\$ 90,977	\$ 91,219

Analysis of staff costs:

	2018	2017
Wages and salaries	\$ 23,248	\$ 22,848
Pension costs:		
- defined benefit sections of the plan (Note 10)	1,511	722
- defined contribution section of the plan (Note 10)	472	453
Post-retirement medical benefits charge (Note 10)	549	661
Employee share purchase plan (Note 21)	152	133
Severance, including restructuring costs (Note 13)	263	102
Insurance and risk benefits	2,844	2,933
Other staff related costs	1,445	1,399
	\$ 30,484	\$ 29,251

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the year ended October 31, 2018
(Expressed in thousands of Bahamian dollars)

Analysis of other operating expenses:

	2018	2017
Professional and management fees	\$ 23,293	\$ 22,468
Communications	2,423	2,380
Business development	329	513
Advertising and marketing	267	176
Consumer related expenses	981	932
Non-credit losses	723	1,636
Postage, courier and stationery	1,842	1,963
General insurances	624	567
Outside services	2,750	2,756
Other	3,559	4,991
	\$ 36,791	\$ 38,382

Included in professional and management fees are allocation of costs from the Parent for support and direction provided to the Bank (Note 22).

Note 18 | Earnings per Share

The following table shows the income and share data used in the basic earnings per share calculation.

Basic earnings per share

	2018	2017
Net income attributable to shareholders	\$ 85,060	\$ 76,759
Weighted average number of ordinary shares in issue (Note 14)	120,216	120,216
Basic earnings per share (expressed in cents per share)	70.8	63.9

There are no potentially dilutive instruments.

Note 19 | Dividends Paid

	2018	2017
Declared and paid during the year		
Interim dividend \$0.17 (2017: \$0.15)	\$ 20,437	\$ 18,032
Special dividend \$0.54 (2017: \$nil)	64,917	-
Final dividend \$0.17 (2017: \$0.15)	20,437	18,032
Total dividends declared and paid	\$ 105,791	\$ 36,064

During the third quarter of 2018, the Board approved the change to our dividend payment policy to pay dividends quarterly instead of bi-annually. At its meetings held on September 13, 2018 and December 17, 2018, the Board approved a regular, quarterly dividend of \$0.09 per share, amounting to \$10,820. The consolidated financial statements for the year ended October 31, 2018 do not reflect these resolutions, which will be accounted for in equity as distributions of retained earnings in the consolidated financial statements for the year ending October 31, 2019.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the year ended October 31, 2018
(Expressed in thousands of Bahamian dollars)

Note 20 | Components of Other Comprehensive Loss

	2018	2017
Available-for-sale investment securities:		
Net losses arising during the year	\$ -	\$ (23)
Reclassification adjustments for losses included in the statement of income (Note 16)	-	16
	-	(7)
Debt instruments at fair value through other comprehensive income:		
Net losses arising during the year	(3,666)	-
Reclassification to the statement of income (Note 16)	(498)	-
	(4,164)	-
Other comprehensive loss for the year (Note 14)	\$ (4,164)	\$ (7)

Note 21 | Other Employee Benefits

Employee share purchase plan

Under our Employee Share Purchase Plan, qualifying employees can choose each year to have up to 10% of their eligible earnings withheld to purchase common shares in the Parent. The Bank matches 50% of the employee's contribution amount, up to a maximum contribution of 6% of eligible earnings, depending upon length of service and job level. The Bank's contributions vest after employees have two years of continuous participation in the plan, and all subsequent contributions vest immediately. All contributions are paid into a trust and used by the plan trustees to purchase common shares in the open market. The Bank's contributions are expensed as incurred and totalled \$152 in 2018 (2017: \$133) (Note 17).

Note 22 | Related-Party Transactions and Balances

The Bank's Parent and major shareholder is FirstCaribbean International Bank Limited.

A number of banking transactions are entered into with related parties in the normal course of business. Included in Other liabilities is a dividend payable amounting to \$22,228 (2017: \$4,323) to the Bank's Parent. The key related party balances and transactions included in the Bank's financial statements are disclosed below.

Directors' remuneration

A listing of the members of the Board of Directors is included within the Bank's Annual Report. In 2018, total remuneration for the non-executive directors was \$105 (2017: \$130). The executive directors' remuneration is included under key management compensation.

Note 23 | Commitments, Guarantees and Contingent Liabilities

The Bank conducts business involving letters of credit, guarantees, performance bonds and indemnities, which are not reflected in the consolidated statement of financial position. At the reporting date, the following contingent liabilities and commitments exist:

	2018	2017
Letters of credit	\$ 32,573	\$ 30,472
Undrawn loan commitments	235,323	249,381
Guarantees and indemnities	11,745	9,987
Total (Note 27)	\$ 279,641	\$ 289,840

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the year ended October 31, 2018
(Expressed in thousands of Bahamian dollars)

The Bank is the subject of legal actions arising in the normal course of business. Management considers that the liability, if any, of these actions would not be material beyond what is already provided for in these consolidated financial statements.

The Bank currently has a \$1 million line of credit with CIBC at LIBOR + 200bps per annum if 50% or less utilisation, or LIBOR + 250bps per annum if greater than 50% utilisation. The facility is renewable annually and expires on March 31, 2019. As of October 31, 2018, no advances were made from the facility and all balances are undrawn.

Note 24 | Future Rental Commitments under Operating Leases

As at October 31, 2018, the Bank held leases on buildings for extended periods. The minimum future rental commitments under these leases are as follows:

	2018	2017
Not later than 1 year	\$ 3,244	\$ 3,170
Later than 1 year and less than 5 years	6,523	6,764
Later than 5 years	1,705	2,311
	\$ 11,472	\$ 12,245

During the year \$3,226 (2017: \$3,074) of lease payments was included in occupancy and maintenance expenses (Note 17).

Note 25 | Fiduciary Activities

The Bank provides custody and trustee discretionary investment management services to third parties. Those assets that are held in a fiduciary capacity are not included in these consolidated financial statements. At the reporting date, the Bank had investment assets under administration on behalf of third parties amounting to \$121,392 (2017: \$132,396).

Note 26 | Business Segments

The Bank's operations are organised into four segments: Retail, Business and International Banking, Corporate and Investment Banking and Wealth Management, which are supported by the functional units within the Administration segment.

Retail, Business and International Banking ("RBB")

Retail, Business and International Banking includes the Retail, Business Banking, International Banking and Cards businesses. This segment provides a full range of financial products and services to individuals, which can be accessed through our network of branches and ABMs, as well as through internet and telephone banking channels, inclusive of our Mobile Banking App. Business Banking clients are provided with products and services to satisfy their day to day operational and working capital business needs. International Banking is a specialised business that facilitates leveraging of legislation and incentives in the international financial services jurisdictions to offer international clients a wide range of products, services and financial solutions. Cards offering include both the issuing and acquiring business.

Corporate and Investment Banking ("CIB")

Corporate and Investment Banking includes the Corporate Lending, Investment Banking and Forex & Derivatives Sales businesses.

- **Corporate Lending** provides a full range of corporate and commercial banking services to large and mid-sized corporate businesses, governments, financial institutions, international trading companies and private wealth vehicles throughout the Caribbean.
- **Investment Banking** provides debt, equity, capital markets and corporate finance products and services to large corporations, financial institutions and governments.
- **Forex & Derivatives Sales Group** provides derivative and other risk mitigating products to clients.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the year ended October 31, 2018
(Expressed in thousands of Bahamian dollars)

Wealth Management (“WM”)

Wealth Management comprises International Corporate Banking, Investment Management and Private Wealth Management businesses.

Wealth Management clients are provided investment advice and traditional banking services through a relationship management offer.

International Corporate Banking is a specialised business that facilitates leveraging of legislation and incentives in the international financial services jurisdictions to offer international clients a wide range of products, services and financial solutions.

Administration (“Admin”)

The Administration segment includes Finance, Human Resources, Risk, Technology & Operations, Treasury and other units which support the business segments. The revenues and expenses of the functional groups are generally allocated to the business segments. The Administration segment results include credits or capital charges for Treasury market-based cost of funds on assets, liabilities and capital; the offset of the same for RBB, CIB, and WM earnings unattributed capital remains in Admin.

Treasury is responsible for balance sheet and liquidity risk management for the Bank. Securities and cash placements are normally held within the Treasury unit within the Administration segment.

Management monitors the operating results of its business segments separately for the purpose of making decisions about resource allocation and performance assessment. Transfer prices between operating segments are on an arm’s length basis in a manner similar to transactions with third parties. We review our transfer pricing methodologies on an ongoing basis to ensure they reflect changing market environments and industry practices.

Transactions between the business segments are on normal commercial terms and conditions.

2018 Segment Reporting

Geographical segments are set out in Note 27 (B).

Note 27 | Financial Risk Management

A. Introduction

Risk is inherent in the Bank's activities but is managed through a process of ongoing identification, measurement and monitoring, subject to risk limits and other controls. This process of risk management is critical to the Bank's continuing profitability and each individual within the Bank is accountable for the risk exposures relating to his or her responsibilities. The Bank is exposed to credit, liquidity, market and operating risks.

By its nature, the Bank's activities are principally related to the use of financial instruments. The Bank accepts deposits from customers at both fixed and floating rates and for various periods and seeks to earn above average interest margins by investing these funds in high quality assets. The Bank seeks to increase these margins by consolidating short-term funds and lending for longer periods at higher rates whilst maintaining sufficient liquidity to meet all claims that might fall due.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the year ended October 31, 2018
(Expressed in thousands of Bahamian dollars)

The Bank also seeks to raise its interest margins by obtaining above average margins, net of provisions, through lending to commercial and retail borrowers with a range of credit standing. The Bank also enters into guarantees and other commitments such as letters of credit and performance and other bonds.

B. Credit risk

Credit risk primarily arises from direct lending activities, as well as trading, investment and hedging activities. Credit risk is defined as the risk of financial loss due to a borrower or counterparty failing to meet its obligations in accordance with agreed terms.

Process and control

The Risk Management Team is responsible for the provision of the Bank's adjudication, oversight and management of credit risk within its portfolios. The Credit Executive Committee (CrExCo) has responsibility for monitoring credit metrics, providing direction on credit issues and making recommendations on credit policy.

The Risk Management Team is guided by the Bank's Delegation of Authority policy which is based on the levels of exposure and risk. Credits above the discretion delegated to certain front line employees are approved by Risk Management and where applicable by the Credit Committee and the Finance, Risk & Conduct Review Committee of the Board (FRCRC). The FRCRC also has the responsibility for approving credit policies and key risk limits, including portfolio limits, which are reviewed annually.

Credit risk limits

Credit limits are established for all loans (mortgages, personal, business & government) for the purposes of diversification and managing concentration. Limits are also established for individual borrowers, groups of related borrowers, industry sectors, country and geographic regions, and also for products and portfolios. Such risks are monitored on a revolving basis and the limits are subject to an annual or more frequent review.

The exposure to any one counterparty, including banks and brokers, is further restricted by sub-limits which include exposures not recognised in the consolidated statement of financial position, and daily delivery risk limits in relation to trading items such as forward foreign exchange contracts. Actual exposures against limits are monitored daily.

Exposure to credit risk is managed through regular analysis of the ability of borrowers and potential borrowers to meet interest and capital repayment obligations and by changing these lending limits where appropriate. Exposure to credit risk is also managed in part by obtaining collateral including corporate and personal guarantees.

Credit Valuation Adjustment (CVA)

A CVA is determined using the fair value based exposure we have on derivative contracts. We believe that we have made appropriate fair value adjustments to date. The establishment of fair value adjustments involves estimates that are based on accounting processes and judgments by management. We evaluate the adequacy of the fair value adjustments on an ongoing basis. Market and economic conditions relating to derivative counterparties may change in the future, which could result in significant future losses. The CVA is driven off market-observed credit spreads or proxy credit spreads and our assessment of the net counterparty credit risk exposure. In assessing this exposure, we also take into account credit mitigants such as collateral, master netting arrangements, and settlements through clearing houses.

Collateral

The Bank employs a range of policies and practices to mitigate credit risk. The most traditional of these is the taking of security for funds advanced, which is common practice. The Bank implements guidelines on the acceptability of specific classes of collateral or credit risk mitigation. The principal collateral types for loans and advances to customers are:

- Mortgages over residential properties;
- Charges over business assets such as premises, inventory, accounts receivable and equipment; and
- Charges over financial instruments such as debt securities and equities.

The Bank's credit risk management policies include requirements relating to collateral valuation and management, including verification requirements and legal certainty. Valuations are updated periodically, depending upon the nature of the collateral. Management monitors the market value of collateral and requests additional collateral in accordance with the underlying agreement during its periodic review of loan accounts in arrears. Policies are in place to monitor the existence of undesirable concentration in the collateral supporting the Bank's credit exposure.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the year ended October 31, 2018
(Expressed in thousands of Bahamian dollars)

As at October 31, 2018, 87% of stage 3 impaired loans were either fully or partially collateralised.

Geographic distribution

The following table provides a distribution of gross drawn and undrawn loans and advances to customers, which therefore excludes provisions for impairment, interest receivable and unearned fee income.

	Drawn	Undrawn	Gross Maximum Exposure 2018	Drawn	Undrawn	Gross Maximum Exposure 2017
Bahamas	\$ 1,831,135	\$ 212,900	\$ 2,044,035	\$ 1,901,482	\$ 222,501	\$ 2,123,983

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the year ended October 31, 2018
(Expressed in thousands of Bahamian dollars)

Derivatives

The Bank maintains strict control limits on net open derivative positions, that is, the difference between purchase and sale contracts, by both amount and term. At any one time, the amount subject to credit risk is limited to the current fair value of instruments that are favourable to the Bank (i.e. assets), which in relation to derivatives is only a small fraction of the contract or notional values used to express the volume of instruments outstanding. This credit risk exposure is managed as part of the overall lending limits with customers, together with potential exposures from market movements. Collateral or other security is usually obtained for credit risk exposures on these instruments.

Master-netting arrangements

The Bank restricts its exposure to credit losses by entering into master-netting arrangements with counterparties with whom it undertakes a significant volume of transactions. Master-netting arrangements do not generally result in an offset of consolidated statement of financial position assets and liabilities as transactions are usually settled on a gross basis. However, the credit risk associated with favourable contracts is reduced by a master-netting arrangement to the extent that if an event of default occurs, all amounts with the counterparty are terminated and settled on a net basis. The Bank's overall exposure to credit risk on derivative instruments subject to master-netting arrangements can change substantially within a short period since it is affected by each transaction subject to the arrangement.

Credit-related instruments

The primary purpose of these instruments is to ensure that funds are available to a customer as required. Guarantees and standby letters of credit, which represent irrevocable assurances that the Bank will make payments in the event that a customer cannot meet its obligations to third parties, carry the same credit risk as loans. Documentary and commercial letters of credit, which are written undertakings by the Bank on behalf of a customer authorising a third party to draw drafts on the Bank up to a stipulated amount under specific terms and conditions, are collateralised by the underlying shipment of goods or appropriate assets to which they relate and therefore carry less risk than a direct borrowing.

Commitments to extend credit represent the unused portions of authorisations to extend credit in the form of loans, guarantees, or letters of credit. With respect to credit risk on commitments to extend credit, the Bank is potentially exposed to loss in an amount equal to the total unused commitments. However, the likely amount of loss is less than the total unused commitments since most commitments to extend credit are contingent upon customers maintaining specific credit standards. The Bank monitors the term of maturity of credit commitments because longer-term commitments generally have a greater degree of credit risk than shorter-term commitments.

Maximum exposure to credit risk

The following table shows the maximum exposure to credit risk for the components of the consolidated statement of financial position. The maximum exposure is shown gross, before the effect of mitigation through the use of master netting and collateral arrangements. Where financial instruments are recorded at fair value, the amounts shown represent the current credit risk exposure but not the maximum risk exposure that could arise in the future as a result of changes in values.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

	2,001,401	100	2,072,500	100

Impairment assessment (Policy applicable for November 1, 2017)

The references below show where the Bank's impairment assessment and measurement approach is set out in this report. This section should be read in conjunction with the Summary of significant accounting policies.

Definition of default and cure

The Bank considers a financial instrument defaulted and therefore Stage 3 (credit-impaired) for ECL calculations in all cases when the borrower becomes 90 days past due on its contractual payments.

As part of a qualitative assessment of whether a customer is in default, the Bank also considers a variety of instances that may indicate unlikelihood to pay. When such events occur, the Bank carefully considers whether the event should result in treating the customer as defaulted and therefore assessed as Stage 3 for ECL calculations, or whether Stage 2 is appropriate. Such events include:

- Internal rating of the borrower indicating default or near-default
- The borrower requesting emergency funding from the Bank
- The borrower having past due liabilities to public creditors or employees
- The borrower is deceased
- A material decrease in the underlying collateral value where the recovery of the loan is expected from the sale of the collateral
- A material decrease in the borrower's turnover or the loss of a major customer
- A covenant breach not waived by the Bank
- The debtor (or any legal entity within the debtor's group) filing for bankruptcy application/protection
- Debtor's listed debt or equity suspended at the primary exchange because of rumours or facts about financial difficulties

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the year ended October 31, 2018
(Expressed in thousands of Bahamian dollars)

It is the Bank's policy to consider a financial instrument as 'cured' and therefore re-classified out of Stage 3 when none of the default criteria have been present for at least twelve consecutive months. The decision whether to classify an asset as Stage 2 or Stage 1 once cured depends on the obligor risk rating (ORR) if available, or the days past due and delinquency criteria in the Bank's policy, at the time of the cure, and whether this indicates that there has been a significant increase in credit risk compared to initial recognition.

The Bank's internal rating and PD estimation process

The Group's Credit Risk Department operates the Bank's internal rating models. The Bank monitors all corporate facilities with a value exceeding \$250,000 which are assigned an ORR of 1 to 9 under the Bank's internal rating system. The models used incorporate both qualitative and quantitative information and, in addition to information specific to the borrower, utilises supplemental external information that could affect the borrower's behaviour. This internal rating system is also mapped to Moody's and Standard and Poor's ratings. Movement in a facility's ORR from origination to the reporting date is what determines the stage assigned to that facility. Staging for facilities that do not have an ORR is based on historical days past due and delinquency. The Bank calculates 12-month and lifetime PDs on a product by country basis. 12-month PDs are determined using historical default data and then incorporate forward looking information. Lifetime PDs are determined using historical data.

Treasury, trading and interbank relationships

The Bank's treasury, trading and interbank relationships and counterparties comprise financial services institutions, banks, broker-dealers, exchanges and clearing-houses. For these relationships, the Bank's credit risk department analyses publicly available information such as financial information and other external data, e.g., the rating of Moody's and Standard and Poors, and assigns the internal rating, as shown in the below.

Corporate and small business lending

For corporate and investment banking loans, the borrowers are assessed by specialised credit risk employees of the Bank. The credit risk assessment is based on a credit scoring model that takes into account various historical, current and forward-looking information such as:

- Historical financial information together with forecasts and budgets prepared by the client. This financial information includes realised and expected results, solvency ratios, liquidity ratios and any other relevant ratios to measure the client's financial performance. Some of these indicators are captured in covenants with the clients and are, therefore, measured with greater attention.
- Any publicly available information on the clients from external parties. This includes external rating grades issued by rating agencies, independent analyst reports, publicly traded bond or press releases and articles.
- Any macro-economic or geopolitical information, e.g., GDP growth relevant for the specific industry and geographical segments where the client operates.
- Any other objectively supportable information on the quality and abilities of the client's management relevant for the company's performance.

The complexity and granularity of the rating techniques varies based on the exposure of the Bank and the complexity and size of the customer. Some of the less complex small business loans are rated within the Bank's models for retail products.

Consumer lending and retail mortgages

Consumer lending comprises unsecured personal loans, credit cards and overdrafts. These products along with retail mortgages and some of the less complex small business lending are rated by an automated scorecard tool primarily driven by days past due. Other key inputs into the models are:

- Consumer lending products: use of limits and volatility thereof, GDP growth, unemployment rates, changes in personal income/salary levels based on records of current accounts, personal indebtedness and expected interest repricing.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the year ended October 31, 2018
(Expressed in thousands of Bahamian dollars)

- Retail mortgages: GDP growth, unemployment rates, changes in personal income/salary levels based on records of current accounts, personal indebtedness and expected interest repricing

Credit quality

A mapping between the grades used by the Bank and the external agencies' ratings is shown in the table below. As part of the Bank's risk-rating methodology, the risk assessed includes a review of external ratings of the obligor. The obligor rating assessment takes into consideration the Bank's financial assessment of the obligor, the industry and the economic environment of the country in which the obligor operates. In certain circumstances, where a guarantee from a third party exists, both the obligor and the guarantor will be assessed.

	Loans and advances to customers	Securities	
Grade description	Days past due	Standard & Poor's equivalent	Moody's Investor Services
High grade	0-7	AAA to BBB-	Aaa to Baa3
Standard	8-60	BB+ to B-	Ba to B3
Substandard	61-89	CCC to CC	Caa1 to C
Impaired	90+	D	C

A credit scoring methodology is used to assess Personal customers and a risk grading model is used for Commercial and Corporate customers. This risk rating system is used for portfolio management, risk limit setting, product pricing and in the determination of economic capital.

The effectiveness of the risk rating system and the parameters associated with the risk ratings are monitored within Risk Management and are subject to an annual review.

At the reporting date, securities were all rated standard or high grade, with the exception of Barbados Government securities which were classified as purchased originated credit impaired 'POCI' in 2018. Cash balances and amounts due from banks are held with counterparties that are high grade, including CIBC group entities.

The table below shows the credit quality by class of asset for gross loans and advances to customers, based on an ageing analysis of the portfolio. Amounts provided are before allowance for credit losses, and after credit risk mitigation, valuation adjustments related to the financial guarantors and collateral on agreements.

	High Grade	Standard	Sub-Standard	Impaired	2018 Total
Loans and advances to customers					
- Mortgages	\$ 839,485	\$ 60,793	\$ 24,479	\$ 81,273	\$ 1,006,030
- Personal loans	179,897	6,195	7,879	16,371	210,342
- Business & Government loans	867,237	13,401	1,391	12,734	894,763
Total (Note 8)	\$ 1,886,619	\$ 80,389	\$ 33,749	\$ 110,378	\$ 2,111,135

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the year ended October 31, 2018
(Expressed in thousands of Bahamian dollars)

	High Grade	Standard	Sub- Standard	Impaired	2017 Total
Loans and advances to customers					
- Mortgages	\$ 807,874	\$ 71,084	\$ 24,523	\$ 110,389	\$ 1,013,870
- Personal loans	179,296	7,560	1,620	20,299	208,775
- Business & Government loans	926,896	18,963	1,488	18,153	965,500
Total (Note 8)	\$ 1,914,066	\$ 97,607	\$ 27,631	\$ 148,841	\$ 2,188,145

For our Business & Government loans, we employ risk ratings in managing the credit portfolio. Business borrowers with elevated default risk are monitored on our Early Warning List. Early Warning List characteristics include borrowers exhibiting a significant decline in revenue, income, or cash flow or where we have doubts as to the continuing viability of the business. Early Warning List customers are often, but not always, also delinquent. As of October 31, 2018, Early Warning List customers in the medium to high risk category amounted to \$33,357 (2017: \$29,743).

The Bank also applies a secondary qualitative method for triggering a significant increase in credit risk for an asset which involves assessment of a customer's historical days past due and delinquency pattern. If contractual payments are more than 30 days past due, the credit risk is deemed to have increased significantly. When estimating ECLs on a collective basis for a group of similar assets, the Bank applies the same principals for assessing whether there has been a significant increase in credit risk since initial recognition.

At the beginning of the year, the Bank reassesses the key economic indicators used in its ECL models.

Model adjustments

The Bank considers the use and nature of material additional adjustments which are used to capture factors not specifically embedded in the models used. While many adjustments are part of the normal modelling process (e.g., to adjust PDs as defined for capital purposes to accounting requirements or to incorporate forward-looking information), management may determine that additional, post-modelling adjustments are needed to reflect macro-economic or other factors which are not adequately addressed by the current models such as management overlays for unexpected events, e.g. hurricanes. Such adjustments would result in an increase or decrease in the overall ECLs.

Impact on regulatory capital

Annually, the base Capital Plan is assessed under a central stress scenario with ranges (mild & severe) as part of stress testing. Stress ranges determined by regulators are reviewed and approved annually by management. The results of the stress tests are taken into consideration when setting the annual capital targets and may, by extension, have an effect on the quantum or timing of planned capital initiatives. However, stress testing results that drives the capital ratio below threshold(s) do not immediately imply an automatic increase in required capital, provided there is comfort that the Bank would remain well-capitalized even under plausible stressed ranges.

The recession scenario ranges are as follows:

- i. mild recession; and
- ii. severe recession.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the year ended October 31, 2018
(Expressed in thousands of Bahamian dollars)

Under each range within the recession scenario, the following key assumptions are varied adversely/negatively to arrive at Capital Plan results:

- i. Changes in GDP growth rates are assumed to directionally affect performing loan growth rates and fee & commission income levels.
- ii. Changes in interest rate are assumed to impact net interest income based on the proportion of hard vs. soft currency balance split for interest earning and bearing assets and liabilities, namely cash placements, securities, loans and deposit liabilities.
- iii. Changes in GDP growth rates are assumed to impact non-performing loans growth rates which in turn affect interest income and loan loss expenses.
- iv. Changes in inflation rates are assumed to directionally impact expense growth.

The Bank meets each key regulatory ratio such as the net stable funding ratio, liquidity coverage ratio and leverage ratio.

- **Net Stable Funding Ratio and the Liquidity Coverage Ratio:** The Bank was not required to monitor these ratios during 2018 and is currently in the process of developing an automated solution for calculation of the ratios.
- **Leverage Ratio:** The Bank reports the leverage ratio monthly. The leverage ratio is also provided to the Board in quarterly reporting.

Modified financial assets

From time to time, we may modify the contractual terms of loans classified as stage 2 and stage 3 for which the borrower has experienced financial difficulties, through the granting of a concession in the form of below-market rates or terms that we would not otherwise have considered. Changes to the present value of the estimated future cash payments through the expected life of the modified loan discounted at the loan's original effective interest rate are recognised through changes in the ECL allowance and provision for credit losses. During the year ended October 31, 2018, loans classified as stage 2 with an amortised cost of \$10,484 and loans classified as stage 3 with an amortised cost of \$1,063, in each case before the time of modification, were modified through the granting of a financial concession in response to the borrower having experienced financial difficulties. In addition, the gross carrying amount of previously modified stage 2 or stage 3 loans that have returned to stage 1 during the year ended October 31, 2018 was \$22,632.

C. Market risk

Market risk is the risk that the fair value of future cash flows of financial instruments will fluctuate due to the change in market variables. Market risk arises from positions in securities and derivatives as well as from our core retail, wealth and corporate businesses. The key risks to the Bank are foreign exchange ("FX"), interest rate and credit spread. Market Risk within the Bank is a centralised group that is independent from the front line. The following sections give a comprehensive review of the Bank's entire exposures.

Policies and standards

The Parent Group has a comprehensive policy for market risk management related to the identification, measurement, monitoring and control of market risks. This policy is reviewed and approved every two years by the Finance, Risk and Conduct Review Committee ("FRCRC") of the Parent Group's Board. The Board limits, which are approved annually, are used by the Bank to establish explicit risk tolerances expressed in term of the three main risk measures mentioned below. There is a three tiered approach to limits at the Parent Group. The highest level is set at the Board. The second tier is delegated by the Chief Risk Officer and the third tier to the Business Unit, which limits traders to specific products and size of deals. Trading limits are documented through formal delegation letters and monitored using the Group's trading system.

Process and control

Market risk measures are monitored with differing degrees of frequency, dependent upon the nature of the risk. FX positions and certain profit and loss (P&L) measures are all measured daily, whereas others such as stress tests and credit spread

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the year ended October 31, 2018
(Expressed in thousands of Bahamian dollars)

sensitivity are performed on a weekly or monthly basis. Detailed market risk compliance reports are produced and circulated to senior management on a monthly basis and a summary version supplied to the Board quarterly.

Risk measurement

The Bank has three main measures of market risk:

- Outright position, used predominantly for FX;
- Sensitivity to a 1 basis point move in a curve, used for both interest rate and credit spread risks; and
- Stress scenarios based upon a combination of theoretical situations and historical events.

Position

This risk measure is used predominantly for the Bank's foreign exchange business. The measure, monitored daily, focuses on the outright long or short position in each currency from either the spot or trading position and on a structural basis. Any forward contracts or FX swaps are also incorporated.

Sensitivity

The main two measures utilised by the Parent Group are the DV01 (delta value of a 1 basis point move, also known as the PV01 or present value of a 1 basis point move) and the CSDV01 (credit spread delta of a 1 basis point move). The DV01 measure is calculated for a 1 basis point move down in the yield curve. This generates the change in economic value by individual currency of a parallel shift down in the related yield curve. As curves rarely move in a parallel fashion, it is measured across different tenors to ensure that there is no further curve risk of having, for example, a long position in the short end of the curve, offset by a short position in the longer tenors. This is then utilised within the scenario analysis. The sensitivities are calculated on a post-structural basis that includes structural assumptions for core balances of non-contractual maturity positions. The CSDV01 sensitivity is a way to measure the risk of the interest rate spread between Treasury securities and the non-Treasury securities in the bond portfolio widening or narrowing.

Stress testing & scenario analysis

Stress testing and scenario analysis are designed to add insight to possible outcomes of abnormal (or tail event) market conditions and to highlight where risk concentrations could be a concern. The Parent Group uses the following approaches which are as follows:

- For the hard currency testing, it utilises the suite of measures that the Ultimate Parent has developed. The stress testing measures the effect on the hard currency portfolio values over a wide range of extreme moves in market prices. The stress testing methodology assumes no actions are taken or are able to be taken during the event to mitigate the risk, reflecting the decreased liquidity that frequently accompanies market shocks. The scenario analysis approach for Parent Group's hard currency exposures simulates an impact on earnings of extreme market events up to a period of one quarter. Scenarios are developed using actual historical data during periods of market disruption, or are based upon hypothetical occurrence of economic or political events or natural disasters and are designed by economists, business leaders and risk managers. These tests are run on a monthly basis.
- The local currency stress tests are designed on a similar but smaller scale. For interest rate stresses, Market Risk in conjunction with Treasury considers the market data over approximately the last 10 years and identifies the greatest curve or data point moves over both sixty and single days. These are then applied to the existing positions/sensitivities of the Parent Group. This is performed and reported on a monthly basis as they do not tend to change rapidly.
- For foreign exchange stresses, the Parent Group considers what the effect of a currency coming off a peg would have on the earnings of the Parent Group. This is largely judgmental, as it has happened so infrequently in the region and it is supplemented by some historical reviews both within the region and in other areas where pegged currency regimes have existed or do exist.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the year ended October 31, 2018
(Expressed in thousands of Bahamian dollars)

Summary of key market risks

Of the market risks arising from the various currencies, yield curves and spreads throughout the regional and broader international markets, the following risks are considered by management the most significant for the Bank: (i) the risk of credit spreads widening in a similar fashion to the Credit Crisis of 2008 on bonds held within the investment portfolios, and ii) the low probability, high impact of a peg breaking between the USD and BSD, impacting the structural long position of the Bank. The largest interest rate risk run through multiple scenarios is that if the USD yield curve moves in a similar fashion to a 60 day period during the Subprime Crisis and Lehman Collapse. The following section highlights these key risks as well as some of the lesser ones that arise from the Bank's ongoing banking operations.

Foreign exchange risk

Foreign exchange (or currency) risk is defined as the risk that the value of a financial instrument will fluctuate as a result of changes in foreign exchange rates. The local currency is pegged to the USD and hence the Value at Risk (VaR) measure is not appropriate, and that is why more emphasis is put on the overall position limit and related stress tests. The Board has set limits on positions by currency. These positions are monitored on a daily basis and the Forex & Derivatives Sales department are solely responsible for the hedging of the Bank's exposure.

The Bank also uses a measure to quantify non-trading foreign exchange risk, also referred to as structural foreign exchange risk.

The following table highlights the Bank's significant currency exposures. It also highlights the metrics used by the Bank to measure, monitor, and control that risk.

Currency	2018			2017		
	Trading Position Short vs BSD	Stressed Loss	Average Position*	Trading Position Short vs BSD	Stressed Loss	Average Position*
US dollars	(1,512)	(454)	(637)	(2,413)	724	1,697

* Averages are taken over a twelve-month period.

Interest rate risk

Interest rate risk results from differences in the maturities or re-pricing dates of assets, both on and off the consolidated statement of financial position. The Bank utilises a combination of high level Board limits to monitor risk as well as the more granular Chief Risk Officer's limits. The key interest risk measures are shown in the table below highlighting the currency where the Bank has their most significant interest rate exposures.

Currency	2018		2017	
	60 day Stressed Loss	60 day Stressed Loss	60 day Stressed Loss	60 day Stressed Loss
Bahamian dollar	19,211	1,378	20,717	1,622

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the year ended October 31, 2018
(Expressed in thousands of Bahamian dollars)

Credit spread risk

Credit spread exists as the benchmark curve and the reference asset curves either converge or diverge. The Bank has two portfolios that have a material amount of credit spread risk. The risk is measured using an estimated CSDV01 and stress scenarios. The results of these are reported monthly to senior management.

	2018			2017		
	Notional	Credit Spread DV01	Stress Loss	Notional	Credit Spread DV01	Stress Loss
Regional hard currency bond portfolio	\$ 83,210	\$ 37	\$ 12,675	\$ 65,923	\$ 41	\$ 13,836
Non-regional hard currency bond portfolio	359,500	76	15,584	293,495	38	8,309
Total	\$ 442,710	\$ 113	\$ 28,259	\$ 359,418	\$ 79	\$ 22,145

At fiscal year end the weighted average rating of the positions in the Regional Hard Currency Portfolio is BB+. The average weighted maturity is 5 years. The weighted average rating of the positions in the Non-Regional Hard Currency Portfolio is AA-. The average weighted maturity is 2 years.

Derivatives held for asset and liability management (ALM) purposes

Where derivatives are held as hedges against either sizeable loans from core businesses or to reduce interest risk exposure to USD denominated local bond issues and if the transactions meet the regulatory criteria, then the Bank applies hedge accounting. Derivative hedges that do not qualify for hedge accounting treatment are considered to be economic hedges and are recorded at market value on the consolidated statement of financial position with changes in the fair value reflected through the consolidated statement of income. It should be noted that these are only interest rate risk hedges and other risks such as credit spread on the underlying still exist and are measured separately.

D. Cash flow and fair value interest rate risk

Cash flow interest rate risk is the risk that the future cash flows of a financial instrument will fluctuate because of changes in market interest rates. Fair value interest rate risk is the risk that the value of a financial instrument will fluctuate because of changes in market interest rates. The Bank takes on exposure to the effects of fluctuations in the prevailing levels of market interest rates on both its fair value and cash flow risks. Interest margins may increase as a result of such changes but may reduce or create losses in the event that unexpected movements arise. Limits are set on the level of mismatch of interest rate repricing that may be undertaken, which are monitored on an ongoing basis.

Expected repricing and maturity dates do not differ significantly from the contract dates, except for the maturity of deposits up to one month, which represent balances on current accounts considered by the Bank as a relatively stable core source of funding of its operations.

E. Liquidity risk

Liquidity risk arises from the Bank's general funding activities in the course of managing assets and liabilities. It is the risk of having insufficient cash resources to meet current financial obligations without raising funds at unfavourable rates or selling assets on a forced basis.

The Bank's liquidity management strategies seek to maintain sufficient liquid financial resources to continually fund the consolidated statement of financial position under both normal and stressed market environments.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

(Expressed in thousands of Bahamian dollars)

Process and control

Actual and anticipated inflows and outflows of funds generated from exposures, including those not recognised in the consolidated statement of financial position, are managed on a daily basis within specific short-term asset/liability mismatch limits by operational entity.

Potential cash flows under various stress scenarios are modelled using carrying amounts recognised in the consolidated statement of financial position. On a consolidated basis, prescribed liquidity levels under a selected benchmark stress scenario are maintained for a minimum time horizon.

Risk measurement

The Bank's liquidity measurement system provides daily liquidity risk exposure reports for monitoring and review by the Treasury department. The Bank's Asset Liability Management Team (ALMT) is responsible for recommending the liquidity ratio targets, the stress scenarios and the contingency funding plans. The Bank's Board is ultimately responsible for the Bank's liquidity.

The Bank manages liquidity risk by maintaining a significant base of core customer deposits, liquid assets, and access to contingent funding as part of its management of risk. The Bank has internally established specific liquidity requirements that are approved by the Parent Group's Asset Liability Committee (ALCO) and reviewed annually.

The table below analyses the assets, liabilities and commitments, guarantees and contingent liabilities of the Bank into relevant maturity groupings based on the remaining period at reporting date to the contractual maturity date.

(Expressed in thousands of Bahamian dollars)

F. Fair value of financial assets and liabilities

Fair value is defined as the price that would be received to sell an asset, or paid to transfer a liability, between market participants in an orderly transaction in the principal market (or most advantageous market) at the measurement date under current market conditions (i.e., the exit price). The determination of fair value requires judgment and is based on market information, where available and appropriate. Fair value measurements are categorised into three levels within a fair value hierarchy (Level 1, 2 or 3) based on the valuation inputs used in measuring the fair value, as outlined below:

- **Level 1** - Unadjusted quoted market prices in active markets for identical assets or liabilities we can access at the measurement date. Bid prices, ask prices or prices within the bid and ask, which are the most representative of the fair value, are used as appropriate to measure fair value. Fair value is best evidenced by an independent quoted market price for the same instrument in an active market. An active market is one where transactions are occurring with sufficient frequency and volume to provide quoted prices on an ongoing basis.
- **Level 2** - Quoted prices for identical assets or liabilities in markets that are inactive or observable market quotes for similar instruments, or use of valuation technique where all significant inputs are observable. Inactive markets may be characterized by a significant decline in the volume and level of observed trading activity or through large or erratic bid/offer spreads. In instances where traded markets do not exist or are not considered sufficiently active, we measure fair value using valuation models.
- **Level 3** - Non-observable or indicative prices or use of valuation technique where one or more significant inputs are non-observable.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the year ended October 31, 2018
(Expressed in thousands of Bahamian dollars)

The table below presents the level in the fair value hierarchy into which the fair values of financial instruments, that are carried and disclosed at fair value on the consolidated statement of financial position, are categorised.

	Level 1	Level 2	Level 3	Total	Total
	Quoted market price	Valuation technique-observable market inputs	Valuation technique-non-observable market inputs	2018	2017
Financial Assets					
Cash and balances with					
The Central Bank*	\$ 166,113	\$ -	\$ -	\$ 166,113	\$ 148,075
Due from banks*	409,997	-	-	409,997	364,661
Derivative financial instruments	-	647	-	647	366
Available-for-sale securities	-	-	-	-	799,966
Debt securities at FVOCI	-	782,489	219	782,708	-
Loans and advances to customers	-	-	1,998,556	1,998,556	2,074,038
Total financial assets	\$ 526,110	\$ 783,136	\$ 1,998,775	\$ 3,358,021	\$ 3,387,106
Financial Liabilities					
Derivative financial instruments	\$ -	\$ -	\$ -	\$ 5,784	\$ 8,918
Customer deposits	-	-	2,760,776	2,760,776	2,752,543
Total financial liabilities	\$ -	\$ 5,784	\$ 2,760,776	\$ 2,766,560	\$ 2,761,461

*Financial assets with carrying values that approximate fair value.

Transfers between levels in the fair value hierarchy are deemed to have occurred at the beginning of the year in which the transfer occurred. Transfers between levels can occur as a result of additional or new information regarding valuation inputs and changes in their observability. There were no transfers in 2018 or 2017.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the year ended October 31, 2018
(Expressed in thousands of Bahamian dollars)

Quantitative information about significant non-observable inputs

Valuation techniques using one or more non-observable inputs are used for a number of financial instruments. The following table discloses the valuation techniques and quantitative information about the significant non-observable inputs used in level 3 financial instruments:

	As at October 31, 2018		Valuation technique	Key non-observable inputs	Range of inputs	
	Amortised cost	Fair Value			Low	High
Loans and advances to customers	\$ 2,001,401	\$ 1,998,556	Market proxy or direct broker quote	Market proxy or direct broker quote	4.0%	17.8%
Customer deposits	\$ 2,762,770	\$ 2,760,776	Market proxy or direct broker quote	Market proxy or direct broker quote	-	0.1%
Equity securities	\$ 219	\$ 219	Market proxy or direct broker quote	Market proxy or direct broker quote	n/a	n/a

These financial assets and liabilities are mostly carried at amortised cost and as such sensitivity analysis on the inter-relationships between significant non-observable inputs and the sensitivity of fair value to changes in those inputs is not necessary.

Financial instruments recorded at fair value

The following is a description of the determination of fair value for financial instruments which are recorded at fair value using valuation techniques. These incorporate the Bank's estimate of assumptions that a market participant would make when valuing the instruments:

- Derivative financial instruments**
 Derivative products valued using a valuation technique with market observable inputs are interest rate swaps and foreign exchange forward contracts. The most frequently applied valuation techniques include forward pricing and swap models, using present value calculations. The models incorporate various inputs including the credit quality of counterparties, foreign exchange spot and forward rates and interest rate curves.
- Debt instruments at FVOCI**
 Debt instruments at FVOCI valued using a valuation technique or pricing models primarily consist of debt securities. These assets are valued using models which sometimes only incorporate data observable in the market and at other times use both observable and non-observable data. The non-observable inputs to the models include assumptions about liquidity and price disclosure, counterparty credit spreads and sector specific risks.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

For the year ended October 31, 2018
(Expressed in thousands of Bahamian dollars)

Fair value of financial instruments not carried at fair value

The following describes the methodologies and assumptions used to determine fair values for those financial instruments which are not already recorded at fair value in the consolidated financial statements.

- **Loans and advances to customers**
Loans and advances to customers are stated net of expected credit loss allowances. The estimated fair value of loans and advances to customers represents the discounted amount of estimated future cash flows expected to be received.
- **Customer deposits**
The estimated fair value of customer deposits is based on discounted cash flows using prevailing money market interest rates for debts with similar credit risk and maturity.

Financial assets and liabilities with carrying values that approximate fair value

For financial assets and liabilities that are liquid or have a short-term maturity, it is assumed that the carrying amounts approximate to their fair value. This assumption is also applied to demand deposits, savings accounts without a specific maturity and variable rate financial instruments.

Note 28 | Principal Subsidiary Undertakings

Name	Country of incorporation
Sentry Insurance Brokers Ltd.	The Bahamas
FirstCaribbean International (Bahamas) Nominees Company Limited	The Bahamas

There were no events occurring after the reporting period that require adjustment to or disclosure in the consolidated financial statements, except as indicated in Note 19.

NOTICE OF MEETING

Annual General Meeting

Notice is hereby given that the twenty-fourth annual general meeting (“the Meeting”) of FirstCaribbean International Bank (Bahamas) Limited (“the Company”) will be held at 6:00 p.m. on Tuesday, March 26, 2019 at the Melia Nassau Beach Hotel, Arawak Room, West Bay Street, Nassau, Bahamas for the following purposes:

1. To receive and consider the minutes of the last annual general meeting held on May 16, 2018.
2. To receive the Managing Director’s review.
3. To receive audited accounts for the year November 1, 2017 to October 31, 2018 and the report of the directors and auditors thereon.
4. To elect as directors (i) Daniel Wright; and (ii) Craig Gomez (*subject to regulatory approval*) until the next annual general meeting of the Company.
5. To re-elect the following directors who retire by rotation and, being eligible, offer themselves for re-election to serve until the next annual general meeting of the Company:
 - i. Colette Delaney
 - ii. Marie Rodland-Allen
 - iii. Willie Moss
 - iv. Felix Stubbs
6. To appoint the auditors of the Company and to authorize the directors to fix their remuneration.
7. To ratify the dividends for fiscal 2018.
8. To discuss any other business which may be properly considered at the Meeting.

BY ORDER OF THE BOARD

Sherrylyn Bastian

Corporate Secretary

FirstCaribbean International Bank (Bahamas) Limited

February 28, 2019

NOTICE OF MEETING

Record Date

Holders of FirstCaribbean International Bank (Bahamas) Limited's ordinary shares of record at the close of business on February 18, 2019 are entitled to vote at the Meeting.

Financial Statements

The Company's audited financial statements for the year November 1, 2017 to October 31, 2018 are included in the Company's 2018 annual report.

Proxies

Shareholders are entitled to attend and vote at the Meeting and appoint one or more proxies to attend and in a poll, vote instead of them. A proxy need not be a shareholder of the Company. Any instrument appointing a proxy must be received at the office of CIBC Trust Company (Bahamas) Limited, Registrar and Transfer Agent, Goodman's Bay Corporate Centre, West Bay Street, P.O. Box N-3933 Nassau, Bahamas not less than 48 hours before the time for holding the Meeting. Shareholders who return completed proxy forms are not precluded, if subsequently they so wish, from attending the Meeting instead of their proxies and voting in person. In the event of a poll, their proxy votes deposited with CIBC Trust Company (Bahamas) Limited, the Registrar and Transfer Agent will be excluded.

Dividend

A special dividend of fifty-four cents (\$0.54) per ordinary share was paid on June 26, 2018, interim dividends of seventeen cents (\$0.17) and nine cents (0.09) respectively per ordinary share was paid on August 10, 2018 and December 10, 2018. A final dividend of nine cents, (\$0.09,) per ordinary share for the fiscal year 2018 was approved by the directors on December 17, 2018 and paid to shareholders on February 6, 2019. The total dividend paid for fiscal 2018 was eighty-nine cents, (\$0.89) per ordinary share.

REGISTERED OFFICE: FirstCaribbean International Bank Financial Centre, 2nd Floor, Shirley Street, Nassau, Bahamas.

We are providing these proxy materials in connection with the solicitation by the board of directors of FirstCaribbean International Bank (Bahamas) Limited, of proxies to be voted at the Company's 2019 annual general meeting ("the Meeting") and at any Meeting following adjournment thereof.

Shareholders are advised that no shareholder proposal has been filed and no action is proposed by the board of directors which would create the possibility of a "dissenting shareholder" under Section 168 of The Companies Act, 1992. The board of directors is also not aware of any solicitation of proxies by a person or group adverse to present management of this Company.

You are cordially invited to attend the Meeting on Tuesday, March 26, 2019 beginning at 6:00 p.m. Shareholders will be admitted beginning at 5:30 p.m. The Meeting will be held at the Melia Nassau Beach Hotel, Arawak Room, West Bay Street, Nassau, Bahamas.

This financial year of FirstCaribbean International Bank (Bahamas) Limited began on November 1, 2017 and ended October 31, 2018. References in this proxy statement to the year 2018 or financial 2018 refer to the period as mentioned above.

We are mailing this proxy statement and accompanying forms of proxy and voting instructions on Thursday, February 28, 2019 to holders of the Company's ordinary shares as at the close of business on Monday February 18, 2019, the record date for the Meeting.

Proxies and voting Procedures

The board of directors and the management of the Company do not contemplate the solicitation of proxies otherwise than by mail.

A shareholder has the right to appoint a person or company (who need not be a shareholder), other than the persons designated by the directors as proxy holders in the accompanying form of proxy, to represent the shareholder at the Meeting by striking out the names of the persons so designated and inserting the name of the chosen proxy holder in the blank space provided for that purpose in the form of proxy, or by completing and signing another proper form of proxy. A proxy must be in writing and must be executed by the shareholder or by an attorney authorized in writing and deposited at the office of CIBC Trust Company (Bahamas) Limited, Registrar and Transfer Agent, Goodman's Bay Corporate Centre, West Bay Street, P.O. Box N-3933, Nassau, Bahamas no later than 48 hours before the time for holding the Meeting. A shareholder who executes and returns the accompanying form of proxy may revoke it by an instrument in writing executed by such shareholder or attorney authorized in writing and deposited at the office of CIBC Trust Company (Bahamas) Limited, Registrar and Transfer Agent at Goodman's Bay Corporate Centre, West Bay Street, P. O. Box N-3933, Nassau, Bahamas at any time up to and including the last business day preceding the day of the Meeting, or with the Chair of the Meeting on the day of the Meeting prior to the commencement thereof, or in any other manner permitted by law.

All shares entitled to vote and represented by properly completed proxies received prior to the Meeting and not revoked will be voted at the Meeting in accordance with your instructions. If you do not indicate how your shares should be voted on a matter, the shares represented by your properly completed proxy will be voted as the board of directors recommends.

If any other matters are properly presented at the Meeting for consideration, including, among other things, consideration of a motion to adjourn the Meeting to another time or place, the persons named as proxies and acting thereunder will have discretion to vote on those matters according to their best judgment to the same extent as the person delivering

the proxy would be entitled to vote. At the date this proxy statement went to press, we did not anticipate that any other matters would be raised at the Meeting.

Shareholders entitled to Vote

Shareholders at the close of business on the record date are entitled to notice of and to vote at the Meeting.

On February 18, 2019 there were 120,216,204 ordinary shares of par value \$0.10 each outstanding. Each shareholder is entitled to one vote on each matter properly brought before the Meeting.

At close of business on February 18, 2019 FirstCaribbean International Bank Limited beneficially owned or controlled directly or indirectly 114,463,600 shares which represents 95.21% of the Company's issued ordinary shares.

Quorum and Required Votes

The presence, in person or by proxy, of the holders of a majority of the shares entitled to vote generally for the election of directors is necessary to constitute a quorum at the Meeting. For purposes of determining a quorum, abstentions are counted as present and are entitled to vote. Pursuant to the articles of association, three persons, each being a member entitled to attend and vote at the Meeting, or a proxy for such a member, or the duly authorized representative of a corporate member so entitled, shall be a quorum.

Election of Directors

The articles of association currently provide that the board of directors of the Company shall consist of a minimum of five (5) directors and a maximum of twelve (12) directors, with the actual number of directors to be determined from time to time by the board of directors.

Directors can be either elected annually by the shareholders at the annual general meeting or, subject to the articles of association of the Company and applicable law, appointed by the board of directors between annual general meetings. Each director shall hold office until the close of the next annual general meeting of the Company or until he or she ceases to be a director by operation of law or articles of association of the Company or until his or her resignation becomes effective. The board of directors held ten (10) Meetings in 2018.

The persons designated as proxy holders in the accompanying form of proxy will vote ordinary shares represented by such form of proxy, properly executed, for the election and re-election of the nominees whose names are set forth herein, unless specifically directed to withhold a vote.

All the nominees with the exception of Daniel Wright and Craig Gomez were previously elected by the shareholders of the Company as directors of the Company. Daniel Wright was appointed as a director by the board of directors and was approved by the Central Bank of the Commonwealth of The Bahamas as a director on December 5, 2018. Craig Gomez was appointed as a director by the board of directors subject to regulatory approval.

If any nominee is for any reason unavailable to serve (which management has no reason to believe to be the case), the persons designated as proxy holders in the accompanying form of proxy shall have the right to exercise their discretion by voting for another qualified nominee.

The following table sets out the names of all persons proposed to be nominated for election and re-election as directors, along with other relevant information.

INFORMATION CIRCULAR

Name	Principal Occupation	Director Since	Number of Shares Beneficially Owned or Controlled Directly or Indirectly
Colette Delaney	Chief Executive Officer	2017	Nil
Marie Rodland-Allen	Managing Director	2011	Nil
Daniel Wright	Managing Director, Wealth Management	2018	Nil
Willie Moss	Attorney-at-law	1998	Nil
Felix Stubbs	Business Executive	2014	Nil
Craig Gomez (<i>subject to regulatory approval</i>)	Accountant	2019	Nil

Compensation of Directors

Each director who is not an employee of the Company is paid an annual fee of thirty-five thousand dollars (\$35,000.00) for his or her services. Directors are also entitled to reimbursement for reasonable travel and living expenses incurred by them in attending any board of directors or committee Meetings.

No special remuneration was paid to any director during financial year 2018.

Senior Management Compensation

The senior management of the Company received aggregate compensation amounting to \$2,597,963.28 in the financial year 2018.

Indebtedness of Management

There is a total indebtedness of approximately \$5,407,512.74 due to the Company from members of the senior management and directors. This represents loans and mortgages.

Management's Interest in Transactions

No director, executive officer, or senior officer of the Company, or proposed nominee for election or re-election as a director of the Company, has held or currently holds a material interest in any transaction entered into by the Company or its subsidiaries.

Share Option Plan

There is no share option plan.

Shareholder Feedback and Communication

The Company communicates with its shareholders through press releases and annual reports. At the Company's annual general meetings, a full opportunity is afforded to permit shareholders to ask questions concerning the Company's activities. Investor and shareholder concerns are addressed on an on-going basis through the office of the Corporate Secretary.

Appointment of Auditors

At the Meeting, the shareholders will be called upon to appoint auditors of the Company at a remuneration to be fixed by the board of directors and to serve until the close of the next annual general meeting of the Company. To be effective, the resolution appointing auditors of the Company must be approved by the majority of the votes cast by the holders of ordinary shares present in person, or represented by proxy, at the Meeting.

INFORMATION CIRCULAR

Arrangements will be made for one or more representatives of the proposed auditors to attend the Meeting.

Other Business

The management of the Company knows of no matters to come before the Meeting other than the matters referred to in the notice of Meeting. However, if any other matters which are not known to the management of the Company should properly come before the Meeting, forms of proxy given pursuant to this solicitation by the management of the Company will be voted on such matters in accordance with the best judgment of the person voting the proxy.

Directors' Approval and Certificate

The contents and the sending of this information circular and proxy form have been approved by the board of directors of the Company. The foregoing contains no untrue statement of a material fact and does not omit to state a material fact that is required to be stated or that is necessary to make a statement not misleading in light of the circumstances in which it was made.

Dated at Nassau, Bahamas this February 28, 2019.

DIRECTORS' REPORT

DIRECTORS

In accordance with the memorandum and articles of association, the shareholders are requested to elect as directors (i) Daniel Wright; and (ii) Craig Gomez (*subject to regulatory approval*) to serve until the next annual general meeting of the Company.

The shareholders are also requested to re-elect the following directors who retire by rotation, and being eligible, offer themselves for re-election to serve until the next annual general meeting of the Company:-

1. Colette Delaney
2. Marie Rodland-Allen
3. Willie Moss
4. Felix Stubbs

FINANCIAL RESULTS AND DIVIDENDS

The directors report that the Company had a Net Income of \$85 million for the year ended October 31, 2018. All statutory requirements for the year ended October 31, 2018 have been fulfilled.

A special dividend of fifty-four cents (\$0.54) per ordinary share was paid on June 26, 2018, interim dividends of seventeen cents (\$0.17) and nine cents (\$0.09) respectively per ordinary share was paid on August 10, 2018 and December 10, 2018. A final dividend of nine cents, (\$0.09) per ordinary share for the fiscal year 2018 was approved by the directors on December 17, 2018 and paid to shareholders on February 6, 2019. The total dividend paid for fiscal 2018 was eighty-nine cents, (\$0.89) per ordinary share.

SHARE CAPITAL

Substantial Interest as at October 31, 2018*

Ordinary shares of ten cents (\$0.10) par value

FirstCaribbean International Bank Limited - 114,463,600 (95.21%)

*Substantial Interest means a holding of 5% or more of the Company's issued share capital.

The undersigned revokes any prior proxies to vote the shares covered by this proxy.

This proxy is solicited on behalf of the management of the Company and will be voted as directed in the spaces provided above or, if no direction is given it will be voted in the affirmative for each of the above proposals.

Dated this day of2019

Corporate Seal

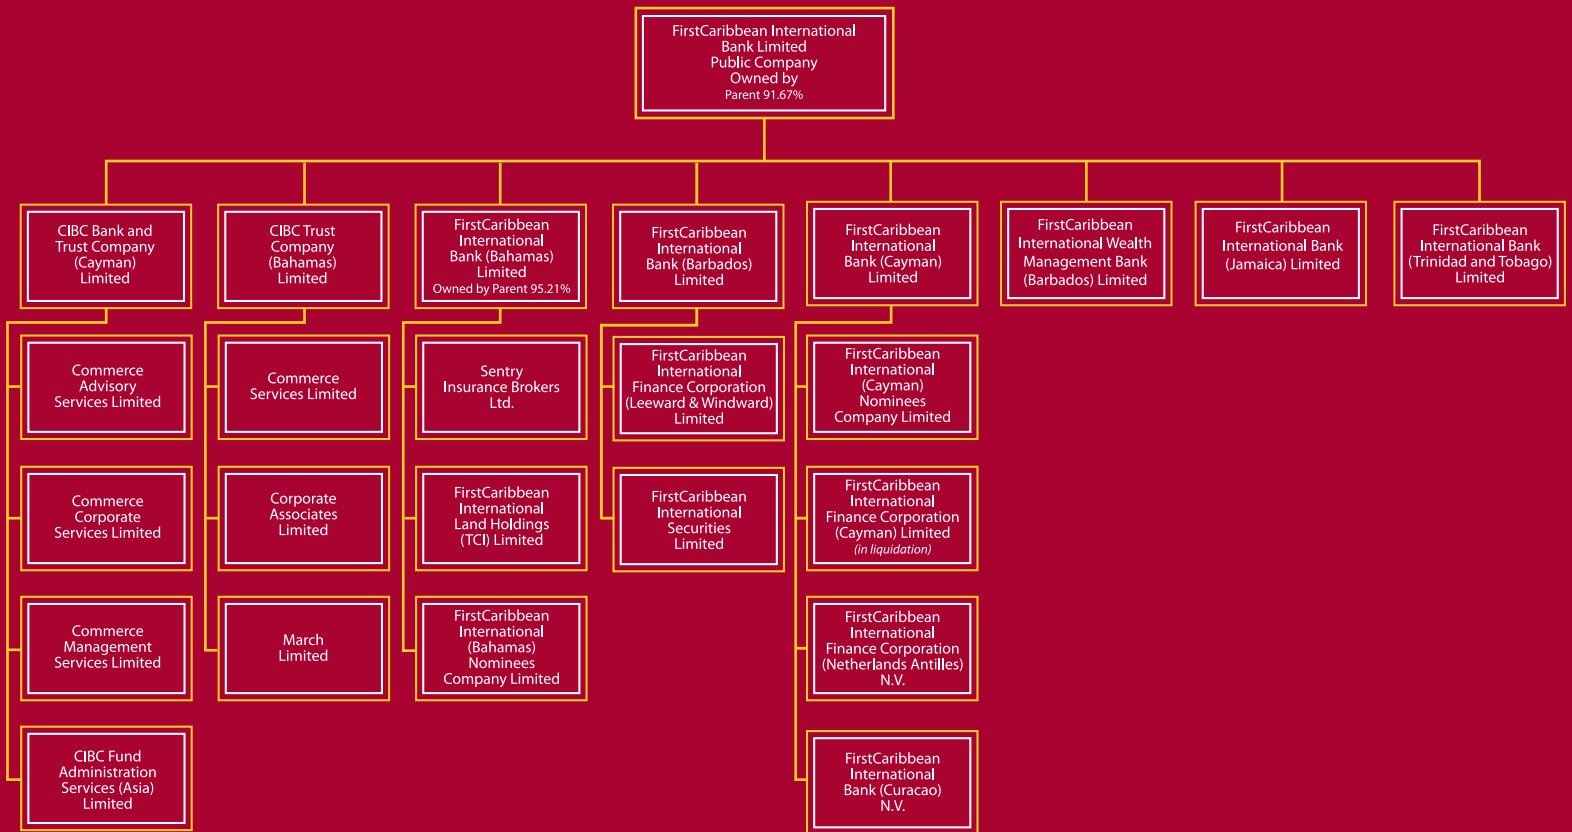

PROXY FORM

Notes:

The persons named in this proxy are directors of the Company. Each shareholder submitting the proxy shall have the right to appoint a person or company to represent him/her/it at the Meeting other than the persons designated above. To exercise this right, the shareholder may insert the name of the desired representative in the blank space provided and strike out the other names or may submit another appropriate proxy.

In order for this form of proxy or other appropriate forms of proxy to be valid, it must be signed and should be dated by the shareholder or the shareholder's attorney. The signature should be exactly the same as the name in which the shares are registered. The proxy must be sent by mail or hand delivered to the office of CIBC Trust Company (Bahamas) Limited, Registrar and Transfer Agent, Goodman's Bay Corporate Centre, West Bay Street, P.O. Box N-3933, Nassau, Bahamas no later than 48 hours before the time for holding the Meeting. If this form of proxy is received undated but otherwise properly executed, it will for all purposes be deemed to be dated March 22, 2019.
