INDEPENDENT AUDITOR'S REPORT

To the Shareholders of FirstCaribbean International Bank (Jamaica) Limited

Report on the Audit of the Financial Statements

Opinion

We have audited the financial statements of FirstCaribbean International Bank (Jamaica) Limited (the "Bank") which comprise the statement of financial position as at 31 October 2018, the statements of changes in equity, income, comprehensive income, and cash flows for the year then ended, and notes, comprising significant accounting policies and other explanatory information.

In our opinion, the accompanying financial statements give a true and fair view of the financial position of the Bank as at 31 October 2018, and of its financial performance and cash flows for the year then ended in accordance with International Financial Reporting Standards (IFRS) and the Jamaican Companies Act.

Basis for Opinion

We conducted our audit in accordance with International Standards on Auditing (ISAs). Our responsibilities under those standards are further described in the Auditor's Responsibilities for the Audit of the Financial Statements section of our report. We are independent of the Bank in accordance with the International Ethics Standards Board for Accountants Code of Ethics for Professional Accountants (IESBA Code) and we have fulfilled our other ethical responsibilities in accordance with the IESBA Code. We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our opinion.

Responsibilities of Management and the Board of Directors for the Financial Statements

Management is responsible for the preparation of financial statements that give a true and fair view in accordance with IFRS and the Jamaican Companies Act, and for such internal control as management determines is necessary to enable the preparation of financial statements that are free from material misstatement, whether due to fraud or error.

In preparing the financial statements, management is responsible for assessing the Bank's ability to continue as a going concern, disclosing, as applicable, matters related to going concern and using the going concern basis of accounting unless management either intends to liquidate the Bank or to cease operations, or has no realistic alternative but to do so.

The Board of Directors is responsible for overseeing the Bank's financial reporting process.

INDEPENDENT AUDITOR'S REPORT (CONTINUED)

To the Shareholders of FirstCaribbean International Bank (Jamaica) Limited (Continued)

Report on the Audit of the Financial Statements (Continued)

Auditor's Responsibilities for the Audit of the Financial Statements

Our objectives are to obtain reasonable assurance about whether the financial statements as a whole are free from material misstatement, whether due to fraud or error, and to issue an auditor's report that includes our opinion. Reasonable assurance is a high level of assurance, but is not a guarantee that an audit conducted in accordance with ISAs will always detect a material misstatement when it exists. Misstatements can arise from fraud or error and are considered material if, individually or in the aggregate, they could reasonably be expected to influence the economic decisions of users taken on the basis of these financial statements.

As part of an audit in accordance with ISAs, we exercise professional judgment and maintain professional skepticism throughout the audit. We also:

- Identify and assess the risks of material misstatement of the financial statements, whether due to fraud or error, design and perform audit procedures responsive to those risks, and obtain audit evidence that is sufficient and appropriate to provide a basis for our opinion. The risk of not detecting a material misstatement resulting from fraud is higher than for one resulting from error, as fraud may involve collusion, forgery, intentional omissions, misrepresentations, or the override of internal control.
- Obtain an understanding of internal control relevant to the audit in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Bank's internal control.
- Evaluate the appropriateness of accounting policies used and the reasonableness of accounting estimates and related disclosures made by management.
- Conclude on the appropriateness of management's use of the going concern basis of accounting and, based on the audit evidence obtained, whether a material uncertainty exists related to events or conditions that may cast significant doubt on the Bank's ability to continue as a going concern. If we conclude that a material uncertainty exists, we are required to draw attention in our auditor's report to the related disclosures in the financial statements or, if such disclosures are inadequate, to modify our opinion. Our conclusions are based on the audit evidence obtained up to the date of our auditor's report. However, future events or conditions may cause the Bank to cease to continue as a going concern.
- Evaluate the overall presentation, structure and content of the financial statements, including the disclosures, and whether the financial statements represent the underlying transactions and events in a manner that presents a true and fair view.

INDEPENDENT AUDITOR'S REPORT (CONTINUED)

To the Shareholders of FirstCaribbean International Bank (Jamaica) Limited (Continued)

Report on the Audit of the Financial Statements (Continued)

Auditor's Responsibilities for the Audit of the Financial Statements (Continued)

We communicate with the Board of Directors regarding, among other matters, the planned scope and timing of the audit and significant audit findings, including any significant deficiencies in internal control that we identify during our audit.

Report on additional matters as required by the Jamaican Companies Act

We have obtained all the information and explanations which, to the best of our knowledge and belief, were necessary for the purposes of our audit. In our opinion, proper accounting records have been maintained, so far as appears from our examination of those records, and the financial statements, which are in agreement therewith, give the information required by the Jamaican Companies Act, in the manner required.

A handwritten signature in black ink, appearing to read 'Ernst & Young', is written in a cursive style.

FirstCaribbean International Bank (Jamaica) Limited

Notes to the Financial Statements

Year ended 31 October 2018

(Expressed in Jamaican dollars unless otherwise indicated)

1. Corporate Information

FirstCaribbean International Bank (Jamaica) Limited (the “Bank”), which is incorporated and domiciled in Jamaica, is a wholly owned subsidiary of FirstCaribbean International Bank Limited (the “Parent”), a bank incorporated and domiciled in Barbados. The ultimate parent company and controlling party is Canadian Imperial Bank of Commerce (“CIBC”), a company incorporated in Canada.

The registered office of the Bank is located at 23-27 Knutsford Boulevard, Kingston 5, Jamaica.

The Bank is licensed to carry on banking and other related services and is regulated by the Bank of Jamaica (BOJ) under the Banking Services Act (BSA) which was passed in June 2014 and became effective on 30 September 2015. The BSA and related regulations, provide a standardized legal framework for the operations of licensed deposit-taking intermediaries and provide the statutory principles on which supervision is conducted. The legal framework is further complemented by supervisory notes and Standards of Best Practice issued by the BOJ. The legislation serves to further strengthen oversight of the deposit-taking financial sector and achieve greater conformity with the Basel Core Principles.

The Board of Directors has the power to amend these financial statements after issue, if required.

2. Summary of Significant Accounting Policies

The principal financial accounting policies adopted in the preparation of these financial statements are set out below:

(a) Basis of preparation

(i) *Statement of compliance*

These financial statements have been prepared in conformity with International Reporting Financial Standards (IFRS), as issued by the International Accounting Standards Board (IASB), and the requirements of the Jamaican Companies Act.

The financial statements provide comparative information in respect of the previous period.

(ii) *Basis of measurement*

These financial statements have been prepared under the historical cost basis, except for debt securities at fair value through other comprehensive income (FVOCI) and derivative financial instruments, which have all been measured at fair value. The carrying value of recognized assets that are hedged items in fair value hedges, are adjusted to record changes in fair value attributable to the risks that are being hedged. Additionally, certain land and buildings are measured at deemed cost. Deemed cost represents fair value at the date of transition to IFRS. These financial statements are presented in Jamaican dollars, and all values are rounded to the nearest thousand except where otherwise indicated.

(iii) *Judgements and estimates*

The preparation of financial statements in conformity with IFRS requires management to make certain critical estimates and assumptions that affect amounts reported in the financial statements and accompanying notes. Actual results could differ from these estimates.

Estimates and judgements are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

Other disclosures relating to the Bank’s exposure to risks and uncertainties include:

- Capital management - Note 14
- Financial risk management and policies - Note 35
- Sensitivity analyses disclosures - Notes 10 and 35

The areas requiring a higher degree of judgement or complexity, or areas where assumptions and estimates are significant to the financial statements are disclosed in Note 36.

FirstCaribbean International Bank (Jamaica) Limited

Notes to the Financial Statements
Year ended 31 October 2018
(Expressed in Jamaican dollars unless otherwise indicated)

2. Summary of Significant Accounting Policies (Continued)

(b) Changes in accounting policies

(i) Standards, interpretations and amendments to published standards that were adopted during the year

The accounting policies adopted are consistent with those of the previous financial year with the exception of those affected by new and amended standards and interpretations.

New and amended standards and interpretations

In these financial statements, the Bank early adopted IFRS 9 and the related IFRS 7R which are effective for annual periods beginning on or after 1 January 2018. These standards were applied on a retrospective basis, with certain exceptions. As permitted, the Bank did not restate its prior period comparative financial statements. Changes in the carrying amounts of financial instruments resulting from the adoption of IFRS 9, are recognised in the Bank's opening 1 November 2017 retained earnings and accumulated other comprehensive income (AOCI) as if the Bank had always followed the new requirements. As permitted, the Bank has elected to continue to apply the hedge accounting requirements of IAS 39. In addition, the Bank applied amendments to IAS 7 Statement of Cash Flows and IAS 12 Recognition of Deferred Tax Assets for Unrealised Losses.

The nature and the impact of the new standards and amendments is described below:

IFRS 9 Financial Instruments

IFRS 9 replaces IAS 39 as at 1 November 2017. The Bank elected, as a policy choice permitted under IFRS 9, to continue to apply hedge accounting in accordance with IAS 39. The Bank has not restated comparative information for 2017 for financial instruments in the scope of IFRS 9. Therefore, the comparative information for 2017 is reported under IAS 39 and is not comparable to the information presented for 2018. Changes arising from the adoption of IFRS 9 have been recognised directly in retained earnings as of 1 November 2017 and are disclosed below.

Changes to classification and measurement

To determine their classification and measurement category, IFRS 9 requires all financial assets, except equity instruments and derivatives, to be assessed based on a combination of the entity's business model for managing the assets and the instruments' contractual cash flow characteristics. The IAS 39 measurement categories of financial assets (fair value through profit or loss (FVPL), available for sale (AFS), held-to-maturity and loans and receivables at amortised cost) have been replaced by:

- Debt instruments at amortised cost
- Debt instruments at fair value through other comprehensive income (FVOCI), with gains or losses recycled to profit or loss on derecognition
- Equity instruments at FVOCI, with no recycling of gains or losses to profit or loss on derecognition
- Financial assets at FVPL

FirstCaribbean International Bank (Jamaica) Limited

Notes to the Financial Statements
Year ended 31 October 2018
(Expressed in Jamaican dollars unless otherwise indicated)

2. Summary of Significant Accounting Policies (Continued)

(b) Changes in accounting policies (continued)

(i) *Standards, interpretations and amendments to published standards that were adopted during the year (continued)*

IFRS 9 Financial Instruments (continued)

The accounting for financial liabilities remains largely the same as it was under IAS 39, except for the treatment of gains or losses arising from an entity's own credit risk relating to liabilities designated at FVPL. Such movements are presented in OCI with no subsequent reclassification to the income statement.

Under IFRS 9, embedded derivatives are no longer separated from a host financial asset. Instead, financial assets are classified based on the business model and their contractual terms.. The accounting for derivatives embedded in financial liabilities and in non-financial host contracts has not changed. The Bank's accounting policies for derivative financial instruments are set out in Note 2(b)(ii)(e).

The Bank's classification of its financial assets and liabilities is explained in Note 2(f). The quantitative impact of applying IFRS 9 as at 1 November 2017 is disclosed below.

Changes to the impairment calculation

The adoption of IFRS 9 has fundamentally changed the Bank's accounting for loan loss impairments by replacing IAS 39's incurred loss approach with a forward-looking expected credit loss (ECL) approach. IFRS 9 requires the Bank to record an allowance for ECLs for all loans and other debt financial assets not held at FVPL, together with loan commitments and financial guarantee contracts. The allowance is based on the ECLs associated with the probability of default in the next twelve months, unless there has been a significant increase in credit risk since origination. If the financial asset meets the definition of purchased or originated credit impaired (POCI), the allowance is based on the change in the ECLs over the life of the asset.

Details of the Bank's impairment method are disclosed in Note 2(i). The quantitative impact of applying IFRS 9 as at 1 November 2017 is disclosed below.

IFRS 7R

To reflect the differences between IFRS 9 and IAS 39, IFRS 7 Financial Instruments: Disclosures was updated and the Bank has adopted it, together with IFRS 9, for the year beginning 1 November 2017. Changes include transition disclosures as shown in Note 2(b)(i), detailed qualitative and quantitative information about the ECL calculations such as the assumptions and inputs used are set out below:

FirstCaribbean International Bank (Jamaica) Limited

Notes to the Financial Statements

Year ended 31 October 2018

(Expressed in Jamaican dollars unless otherwise indicated)

2. Summary of Significant Accounting Policies (Continued)

(b) Changes in accounting policies (continued)

(i) Standards, interpretations and amendments to published standards that were adopted during the year (continued)

IFRS 7R (continued)

Transition disclosures

The following pages set out the impact of adopting IFRS 9 on the statement of financial position, and retained earnings, including the effect of replacing IAS 39's incurred credit loss calculations with IFRS 9's ECLs.

A reconciliation between the carrying amounts under IAS 39 to the balances reported under IFRS 9 as of 1 November 2017 is, as follows:

	IAS 39 Carrying amount as at 31 Oct. 2017 \$'000	Reclassification \$'000	Remeasurements \$'000	IFRS 9 amount as at 1 Nov. 2017 \$'000
Financial assets				
Cash and balances with Central Banks	18,995,026	-	-	18,995,026

FirstCaribbean International Bank (Jamaica) Limited

Notes to the Financial Statements
Year ended 31 October 2018
(Expressed in Jamaican dollars unless otherwise indicated)

2. Summary of Significant Accounting Policies (Continued)

(b) Changes in accounting policies (continued)

(i) Standards, interpretations and amendments to published standards that were adopted during the year (continued)

IFRS 7R (continued)

As at 1 November 2017, the Bank assessed its liquidity portfolio which had previously been classified as AFS debt instruments. The Bank concluded that these instruments are managed within a business model of collecting contractual cash flows and selling the financial assets. Accordingly, the Bank classified these investments as debt instruments measured at FVOCI.

The impact of transition to IFRS 9 on reserves and retained earnings is, as follows:

	Reserves and retained earnings \$'000
Fair value reserve	
Closing balance under IAS 39 (31 October 2017)	15,659
Recognition of expected credit losses under IFRS 9 for debt financial assets at FVOCI	290,616
Deferred tax in relation to the above	(96,872)
Net expected credit losses under IFRS 9 for debt financial assets at FVOCI	193,744
Opening balance restated under IFRS 9 (1 November 2017) [Note 22(b)]	209,403
Retained earnings	
Closing balance under IAS 39 (31 October 2017)	474,431
Recognition of IFRS 9 ECLs including those measured at FVOCI (see below)	(491,026)
Deferred tax in relation to the above	163,675
Net IFRS 9 ECLs including those measured at FVOCI	(327,351)
Opening balance under IFRS 9 (1 November 2017)	147,080
Total change in equity due to adopting IFRS 9	(133,607)

FirstCaribbean International Bank (Jamaica) Limited

Year ended 31 October 2018
(Expressed in Jamaican dollars unless otherwise indicated)

2. Summary of Significant Accounting Policies (Continued)

(b) Changes in accounting policies (continued)

(i) Standards, interpretations and amendments to published standards that were adopted during the year (continued)

IFRS 7R (continued)

The following table reconciles the aggregate opening loan loss provision allowances under IAS 39 and provisions for loan commitments and financial guarantee contracts in accordance with IAS 37 Provisions Contingent Liabilities and Contingent Assets to the ECL allowances under IFRS 9.

Impairment allowance for	Loan loss provision under IAS 39/IAS 37 at 31 October 2017 \$'000	Remeasurement \$'000	ECLs under IFRS 9 as at 1 November 2017 \$'000
Loans and receivables at amortised cost per IAS 39/financial assets at amortised costs under IFRS 9	704,430	200,410	904,840
Available for sale debt instrument securities per IAS 39/debt financial assets at FVOCI under IFRS 9	-	290,616	290,616
Total impairment allowance	704,430	491,026	1,195,456

Amendments to IAS 7 Statement of Cash Flows: Disclosure Initiative

The amendments require entities to provide disclosure of changes in their liabilities arising from financing activities, including both changes arising from cash flows and non-cash changes (such as foreign exchange gains or losses). The Bank has elected to provide the information for the current period only. The debt is issued denominated in Jamaican Dollar (Note 13). This is not applicable to the Bank for the reporting period.

Amendments to IAS 12 Income Taxes: Recognition of Deferred Tax Assets for Unrealised Losses

The amendments clarify that an entity needs to consider whether tax law restricts the sources of taxable profits against which it may make deductions on the reversal of deductible temporary differences related to unrealised losses. Furthermore, the amendments provide guidance on how an entity should determine future taxable profits and explain the circumstances in which taxable profit may include the recovery of some assets for more than their carrying amount. The Bank applied amendments retrospectively. However, their application has no effect on the Bank's financial position and performance as the Bank has no deductible temporary differences or assets that are in the scope of the amendments.

(Expressed in Jamaican dollars unless otherwise indicated)

2. Summary of Significant Accounting Policies (Continued)

(b) Changes in accounting policies (Continued)

(ii) Standards, interpretations and amendments to published standards that are not yet effective

The relevant standards and interpretations that are issued, but not yet effective, up to the date of issuance of the Bank's financial statements are disclosed below. The Bank intends to adopt these standards, if applicable, when they become effective:

IFRS 15 Revenue from Contracts with Customers

IFRS 15 was issued in May 2014, and amended in April 2016, and establishes a five-step model to account for revenue arising from contracts with customers. Under IFRS 15, revenue is recognised at an amount that reflects the consideration to which an entity expects to be entitled in exchange for transferring goods or services to a customer.

The new revenue standard will supersede all current revenue recognition requirements under IFRS. Either a full retrospective application or a modified retrospective application is required for annual periods beginning on or after 1 January 2018. Early adoption is permitted. The Bank plans to adopt the new standard on the required effective date using the modified retrospective application. During 2018, the Bank performed a detailed assessment of IFRS 15 and its impact.

The Bank is in the business of accepting deposits from customers and entering into lending activities. The Bank also provides payment services and executes wealth management services, credit and loyalty programs for its clients.

In summary, the impact of IFRS 15 adoption is expected to be immaterial to the Bank.

IFRS 16 Leases

The new standard does not significantly change the accounting for leases for lessors. However, it does require lessees to recognise most leases on their statement of financial position as lease liabilities, with the corresponding right-of-use assets. Lessees must apply a single model for all recognised leases, but will have the option not to recognise 'short-term' leases and leases of 'low-value' assets. Generally, the profit or loss recognition pattern for recognised leases will be similar to today's finance lease accounting, with interest and depreciation expense recognised separately in the statement of profit or loss.

IFRS 16 is effective for annual periods beginning on or after 1 January 2019. Early application is permitted provided the new revenue standard, IFRS 15, is applied on the same date. Lessees must adopt IFRS 16 using either a full retrospective or a modified retrospective approach.

The Bank does not anticipate early adoption of IFRS 16 and is currently evaluating its impact.

FirstCaribbean International Bank (Jamaica) Limited

Notes to the Financial Statements
Year ended 31 October 2018
(Expressed in Jamaican dollars unless otherwise indicated)

2. Summary of Significant Accounting Policies (Continued)

(b) Changes in accounting policies (continued)

(ii) Standards, interpretations and amendments to published standards that are not yet effective (continued)

IFRIC Interpretation 22 - Foreign Currency Transactions and Advance Consideration

The interpretation clarifies that in determining the spot exchange rate to use on initial recognition of the related asset, expense or income (or part of it) on the derecognition of a non-monetary asset or non-monetary liability relating to advance consideration, the date of the transaction is the date on which an entity initially recognises the non-monetary asset or non-monetary liability arising from the advance consideration. If there are multiple payments or receipts in advance, then the entity must determine a date of the transactions for each payment or receipt of advance consideration.

The amendments are intended to eliminate diversity in practice, when recognising the related asset, expense or income (or part of it) on the derecognition of a non-monetary asset or non-monetary liability relating to advance consideration received or paid in a foreign currency.

These amendments are effective for annual periods beginning on or after 1 January 2018 and early application is permitted. Entities may apply the amendments on a fully retrospective basis. Alternatively, an entity may apply the interpretation prospectively to all assets, expenses and income in its scope that are initially recognised on or after: (i) The beginning of the reporting period in which the entity first applies the interpretation or (ii) The beginning of a prior reporting period presented as comparative information in the financial statements of the reporting period in which the entity first applies the interpretation. The Bank does not expect any effect on its financial statements.

IFRIC Interpretation 23 - Uncertainty over Income Tax Treatments

The Interpretation addresses the accounting for income taxes when tax treatments involve uncertainty that affects the application of IAS 12. The Interpretation does not apply to taxes or levies outside the scope of IAS 12, nor does it specifically include requirements relating to interest and penalties associated with uncertain tax. The Interpretation specifically addresses (i) Whether an entity considers uncertain tax treatments separately (ii) The assumptions an entity makes about the examination of tax treatments by taxation authorities (iii) How an entity determines taxable profit (tax loss), tax bases, unused tax losses, unused tax credits and tax rates (iv) How an entity considers changes in facts and circumstances. An entity has to determine whether to consider each uncertain tax treatment separately or together with one or more other uncertain tax treatments. The approach that better predicts the resolution of the uncertainty should be followed.

The Interpretation is effective for annual reporting periods beginning on or after 1 January 2019, but certain transition reliefs are available. Applying the Interpretation could be challenging for entities, particularly those that operate in more complex multinational tax environments. Entities may also need to evaluate whether they have established appropriate processes and procedures to obtain information on a timely basis that is necessary to apply the requirements in the Interpretation and make the required disclosures. The Bank will assess the potential effect of these amendments in 2019.

Notes to the Financial Statements
Year ended 31 October 2018
(Expressed in Jamaican dollars unless otherwise indicated)

2. Summary of Significant Accounting Policies (Continued)

(b) Changes in accounting policies (continued)

(ii) *Standards, interpretations and amendments to published standards that are not yet effective (continued)*

IAS 19: Plan Amendment, Curtailment or Settlement

The amendments to IAS 19 address the accounting when a plan amendment, curtailment or settlement occurs during a reporting period. The amendments specify that when a plan amendment, curtailment or settlement occurs during the annual reporting period, an entity is required to:

- Determine current service cost for the remainder of the period after the plan amendment, curtailment or settlement, using the actuarial assumptions used to remeasure the net defined benefit liability (asset) reflecting the benefits offered under the plan and the plan assets after that event
- Determine net interest for the remainder of the period after the plan amendment, curtailment or settlement using: the net defined benefit liability (asset) reflecting the benefits offered under the plan and the plan assets after that event; and the discount rate used to remeasure that net defined benefit liability (asset).

The amendments also clarify that an entity first determines any past service cost, or a gain or loss on settlement, without considering the effect of the asset ceiling. This amount is recognised in profit or loss. An entity then determines the effect of the asset ceiling after the plan amendment, curtailment or settlement. Any change in that effect, excluding amounts included in the net interest, is recognised in other comprehensive income.

The amendments apply to plan amendments, curtailments, or settlements occurring on or after the beginning of the first annual reporting period that begins on or after 1 January 2019, with early application permitted. These amendments will apply only to any future plan amendments, curtailments, or settlements of the Bank.

Annual Improvements 2016 - 2017 Cycle

The improvements in this cycle include:

IFRS 3 Business Combinations

The amendments clarify that, when an entity obtains control of a business that is a joint operation, it applies the requirements for a business combination achieved in stages, including remeasuring previously held interests in the assets and liabilities of the joint operation at fair value. In doing so, the acquirer remeasures its entire previously held interest in the joint operation.

An entity applies those amendments to business combinations for which the acquisition date is on or after the beginning of the first annual reporting period beginning on or after 1 January 2019, with early application permitted. These amendments will apply on future business combinations of the Bank.

FirstCaribbean International Bank (Jamaica) Limited

Notes to the Financial Statements
Year ended 31 October 2018
(Expressed in Jamaican dollars unless otherwise indicated)

2. Summary of Significant Accounting Policies (Continued)

(b) Changes in accounting policies (continued)

(ii) Standards, interpretations and amendments to published standards that are not yet effective (continued)

IFRS 11 Joint Arrangements

A party that participates in, but does not have joint control of, a joint operation might obtain joint control of the joint operation in which the activity of the joint operation constitutes a business as defined in IFRS 3. The amendments clarify that the previously held interests in that joint operation are not remeasured.

An entity applies those amendments to transactions in which it obtains joint control on or after the beginning of the first annual reporting period beginning on or after 1 January 2019, with early application permitted. These amendments are currently not applicable to the Bank but may apply to future transactions.

IAS 12 Income Taxes

The amendments clarify that the income tax consequences of dividends are linked more directly to past transactions or events that generated distributable profits than to distributions to owners. Therefore, an entity recognises the income tax consequences of dividends in profit or loss, other comprehensive income or equity according to where the entity originally recognised those past transactions or events.

An entity applies those amendments for annual reporting periods beginning on or after 1 January 2019, with early application is permitted. When an entity first applies those amendments, it applies them to the income tax consequences of dividends recognised on or after the beginning of the earliest comparative period. Since the Bank's current practice is in line with these amendments, the Bank does not expect any effect on its financial statements.

IAS 23 Borrowing Costs

The amendments clarify that an entity treats as part of general borrowings any borrowing originally made to develop a qualifying asset when substantially all of the activities necessary to prepare that asset for its intended use or sale are complete.

An entity applies those amendments to borrowing costs incurred on or after the beginning of the annual reporting period in which the entity first applies those amendments. An entity applies those amendments for annual reporting periods beginning on or after 1 January 2019, with early application permitted. Since the Bank's current practice is in line with these amendments, the Bank does not expect any effect on its financial statements.

FirstCaribbean International Bank (Jamaica) Limited

Notes to the Financial Statements

Year ended 31 October 2018

(Expressed in Jamaican dollars unless otherwise indicated)

2. Summary of Significant Accounting Policies (Continued)

(c) Segment reporting

Business segments are reported in a manner consistent with the internal reporting provided to the chief operating decision-maker. The chief operating decision-maker is the person or group that allocates resources to and assesses the performance of the business segments of an entity. The Bank has determined the Executive Management Committee as its chief operating decision-maker.

Interest income is reported net within revenue as management primarily relies on net interest income as a performance measure and not the gross income and expense.

All transactions between business segments are conducted on an arm's length basis, with intra-segment revenue and costs being eliminated on consolidation. Income and expenses directly associated with each segment are included in determining business segment performance.

(d) Foreign currency translation

Items included in the financial statements of the Bank are measured using the currency of the primary economic environment in which the Bank operates, referred to as the functional currency. The functional currency of the Bank is the same as its presentation currency. The financial statements are presented in Jamaican dollars, which is the Bank's functional and presentation currency.

Foreign currency transactions are translated into the functional currency at the exchange rates prevailing at the dates of the transactions. Foreign exchange gains and losses resulting from such transactions and from the translation of foreign currency monetary assets and liabilities at the year-end exchange rates are recognised in the statement of income.

Translation differences resulting from changes in the amortised cost of foreign currency monetary assets classified as FVOCI are recognised in the statement of income. Other changes in the fair value of these assets are recognised in other comprehensive income. Translation differences on non-monetary financial assets classified as FVOCI are reported as a component of the fair value gain or loss in other comprehensive income, and included in the fair value reserve in equity.

(e) Derivative financial instruments and hedge accounting

Initial recognition and subsequent measurement

The Bank uses interest rate swaps to manage its foreign currency risks and interest rate risks. Such derivative financial instruments are initially recognised at fair value on the date on which a derivative contract is entered into and are subsequently remeasured at fair value. Derivatives are carried as financial assets when the fair value is positive and as financial liabilities when the fair value is negative.

Any gains or losses arising from changes in fair value on derivatives are taken directly to the statement of income, except for the effective portion of cash flow hedges, which is recognised in other comprehensive income. There are no derivative financial instruments as at the reporting date.

FirstCaribbean International Bank (Jamaica) Limited

Notes to the Financial Statements

Year ended 31 October 2018

(Expressed in Jamaican dollars unless otherwise indicated)

2. Summary of Significant Accounting Policies (Continued)

(e) Derivative financial instruments and hedge accounting (continued)

For the purpose of hedge accounting, hedges are classified as:

- Fair value hedges when hedging the exposure to changes in the fair value of a recognised asset or liability or an unrecognised firm commitment (except for foreign currency risk)
- Cash flow hedges when hedging exposure to variability in cash flows that is either attributable to a particular risk associated with a recognised asset or liability or a highly probable forecast transaction or the foreign currency risk in an unrecognised firm commitment
- Hedges of a net investment in a foreign operation.

At the inception of a hedge relationship, the Bank formally designates and documents the hedge relationship to which the Bank wishes to apply hedge accounting and the risk management objective and strategy for undertaking the hedge. The documentation includes identification of the hedging instrument, the hedged item or transaction, the nature of the risk being hedged and how the entity will assess the effectiveness of changes in the hedging instrument's fair value in offsetting the exposure to changes in the hedged item's fair value or cash flows attributable to the hedged risk. Such hedges are expected to be highly effective in achieving offsetting changes in fair value or cash flows and are assessed at inception and on a monthly basis to determine that they actually have been highly effective throughout the financial reporting periods for which they were designated.

Hedges which meet the Bank's strict criteria for hedge accounting are accounted for as follows:

(i) Fair value hedge

For hedging relationships which are designated and qualify as fair value hedges and that prove to be highly effective in relation to hedged risk, changes in the fair value of the derivatives are recorded in the statement of income, along with the corresponding change in fair value of the hedged asset or liability that is attributable to that specific hedged risk.

If the hedge no longer meets the criteria for hedge accounting, an adjustment to the carrying amount of a hedged interest-bearing financial instrument is amortised to net profit or loss over the remaining period to maturity.

(ii) Cash flow hedge

The effective portion of changes in the fair value of derivatives that are designated and qualify as cash flow hedges are recognised in other comprehensive income. The gain or loss relating to the ineffective portion is recognised immediately in the statement of income. The Bank has not entered into any cash flow hedge arrangements during the financial year. Amounts accumulated in other comprehensive income are recycled to the statement of income in the periods in which the hedged item will affect profit or loss (for example, when the forecast sale that is hedged takes place). When a hedging instrument expires or is sold, or when a hedge no longer meets the criteria for hedge accounting, any cumulative gain or loss existing in other comprehensive income at that time remains in other comprehensive income and is recognised when the forecast transaction is ultimately recognised in the statement of income. When a forecast transaction is no longer expected to occur, the cumulative gain or loss that was reported in other comprehensive income is immediately transferred to the statement of income.

Certain derivative instruments do not qualify for hedge accounting or are not so designated, and changes in the fair value of these derivatives are included in net trading income or losses in the statement of income.

FirstCaribbean International Bank (Jamaica) Limited

Notes to the Financial Statements
Year ended 31 October 2018
(Expressed in Jamaican dollars unless otherwise indicated)

2. Summary of Significant Accounting Policies (Continued)

(f) Financial instruments: financial assets and liabilities

Date of recognition

Financial assets and liabilities, with the exception of loans and advances to customers and balances due to customers, are initially recognised on the settlement date, which is the date that an asset is delivered to or by the Bank. This includes regular way trades: purchases or sales of financial assets that require delivery of assets within the time frame generally established by regulation or convention in the market place. Loans and advances to customers are recognised when funds are transferred to the customers' accounts. The Bank recognises balances due to customers when funds are transferred to the Bank.

Initial measurement of financial instruments

The classification of financial instruments at initial recognition depends on their contractual terms and the business model for managing the instruments. Financial instruments are initially measured at their fair value, except in the case of financial assets and financial liabilities recorded at FVPL, transaction costs are added to, or subtracted from, this amount. Trade receivables are measured at the transaction price. When the fair value of financial instruments at initial recognition differs from the transaction price, the Bank accounts for the Day 1 profit or loss, as described below.

Day 1 profit or loss

When the transaction price of the instrument differs from the fair value at origination and the fair value is based on a valuation technique using only inputs observable in market transactions, the Bank recognises the difference between the transaction price and fair value in net trading income. In those cases where fair value is based on models for which some of the inputs are not observable, the difference between the transaction price and the fair value is deferred and is only recognised in profit or loss when the inputs become observable, or when the instrument is derecognised.

Measurement categories of financial assets and liabilities

From 1 November 2017, the Bank classifies all of its financial assets based on the business model for managing the assets and the asset's contractual terms, measured at either:

- Amortised cost
- FVOCI (Fair value through other comprehensive income)
- FVPL (Fair value through profit or loss)

The Bank classifies and measures its derivative and trading portfolio at FVPL as explained in Note 2(b)(i), summary of accounting policies. The Bank may designate financial instruments at FVPL, if so doing eliminates or significantly reduces measurement or recognition inconsistencies.

Before 1 November 2017, the Bank classified its financial assets as loans and receivables (amortised cost), FVPL, or available-for-sale financial liabilities, other than loan commitments and financial guarantees, are measured at amortised cost or at FVPL when they are held for trading and derivative instruments or the fair value designation is applied.

FirstCaribbean International Bank (Jamaica) Limited

Notes to the Financial Statements

Year ended 31 October 2018

(Expressed in Jamaican dollars unless otherwise indicated)

2. Summary of Significant Accounting Policies (Continued)

(f) Financial instruments: financial assets and liabilities (continued)

Due from banks, Loans and advances to customers, Financial investments at amortised cost

Before 1 November 2017, Due from bank and Loans and advances to customers, included non-derivative financial assets with fixed or determinable payments that were not quoted in an active market, other than those:

- That the Bank intended to sell immediately or in the near term
- That the Bank, upon initial recognition, designated as at FVPL or as available-for-sale
- For which the Bank may not recover substantially all of its initial investment, other than because of credit deterioration, which were designated as available-for-sale.

From 1 November 2017, the Bank only measures Due from banks, Loans and advances to customers and other financial investments at amortised cost if both of the following conditions are met:

- The financial asset is held within a business model with the objective to hold financial assets in order to collect contractual cash flows
- The contractual terms of the financial asset give rise on specified dates to cash flows that are solely payments of principal and interest (SPPI) on the principal amount outstanding. The details of these conditions are outlined below.

Business model assessment

The Bank determines its business model at the level that best reflects how it manages groups of financial assets to achieve its business objective.

The Bank's business model is not assessed on an instrument-by-instrument basis, but at a higher level of aggregated portfolios and is based on observable factors such as:

- How the performance of the business model and the financial assets held within that business model are evaluated and reported to the entity's key management personnel
- The risks that affect the performance of the business model (and the financial assets held within that business model) and, in particular, the way those risks are managed
- How managers of the business are compensated (for example, whether the compensation is based on the fair value of the assets managed or on the contractual cash flows collected)
- The expected frequency, value and timing of sales are also important aspects of the Bank's assessment

The business model assessment is based on reasonably expected scenarios without taking 'worst case' or 'stress case' scenarios into account. If cash flows after initial recognition are realised in a way that is different from the Bank's original expectations, the Bank does not change the classification of the remaining financial assets held in that business model, but incorporates such information when assessing newly originated or newly purchased financial assets going forward.

FirstCaribbean International Bank (Jamaica) Limited

Notes to the Financial Statements
Year ended 31 October 2018
(Expressed in Jamaican dollars unless otherwise indicated)

2. Summary of Significant Accounting Policies (Continued)

(f) Financial instruments: financial assets and liabilities (continued)

The SPPI test

As a second step of its classification process the Bank assesses the contractual terms of financial to identify whether they meet the SPPI test.

'Principal' for the purpose of this test is defined as the fair value of the financial asset at initial recognition and may change over the life of the financial asset (for example, if there are repayments of principal or amortisation of the premium/discount).

The most significant elements of interest within a lending arrangement are typically the consideration for the time value of money and credit risk. To make the SPPI assessment, the Bank applies judgement and considers relevant factors such as the currency in which the financial asset is denominated, and the period for which the interest rate is set.

In contrast, contractual terms that introduce a more than de minimis exposure to risks or volatility in the contractual cash flows that are unrelated to a basic lending arrangement do not give rise to contractual cash flows that are solely payments of principal and interest on the amount outstanding. In such cases, the financial asset is required to be measured at FVPL.

Derivatives recorded at fair value through profit or loss

A derivative is a financial instrument or other contract with all three of the following characteristics:

- Its value changes in response to the change in a specified interest rate, financial instrument price, commodity price, foreign exchange rate, index of prices or rates, credit rating or credit index, or other variable, provided that, in the case of a non-financial variable, it is not specific to a party to the contract (i.e., the 'underlying').
- It requires no initial net investment or an initial net investment that is smaller than would be required for other types of contracts expected to have a similar response to changes in market factors.
- It is settled at a future date.

The Bank may enter into derivative transactions with various counterparties. Derivatives are recorded at fair value and carried as assets when their fair value is positive and as liabilities when their fair value is negative. Changes in the fair value of derivatives are included in net trading income unless hedge accounting is applied. There are no derivatives recorded at fair value through profit and loss as at the reporting date.

FirstCaribbean International Bank (Jamaica) Limited

Notes to the Financial Statements
Year ended 31 October 2018
(Expressed in Jamaican dollars unless otherwise indicated)

2. Summary of Significant Accounting Policies (Continued)

(f) Financial instruments: financial assets and liabilities (continued)

Debt instruments at FVOCI (Policy applicable from 1 November 2017)

The Bank applies the new category under IFRS 9 of debt instruments measured at FVOCI when both of the following conditions are met:

- The instrument is held within a business model, the objective of which is achieved by both collecting contractual cash flows and selling financial assets
- The contractual terms of the financial asset meet the SPPI test

These instruments largely comprise assets that had previously been classified as financial investments available for-sale under IAS 39.

FVOCI debt instruments are subsequently measured at fair value with gains and losses arising due to changes in fair value recognised in OCI. Interest income and foreign exchange gains and losses are recognised in profit or loss in the same manner as for financial assets measured at amortised cost. The ECL calculation for Debt instruments at FVOCI is explained in Note 2(i). Where the Bank holds more than one investment in the same security, they are deemed to be disposed of on a first-in first-out basis. On derecognition, cumulative gains or losses previously recognised in OCI are reclassified from OCI to profit or loss.

Equity instruments at FVOCI (Policy applicable from 1 November 2017)

Upon initial recognition, the Bank occasionally elects to classify irrevocably some of its equity investments as equity instruments at FVOCI when they meet the definition of Equity under IAS 32 Financial Instruments: Presentation and are not held for trading. Such classification is determined on an instrument-by-instrument basis.

Gains and losses on these equity instruments are never recycled to profit. Dividends are recognised in profit or loss as other operating income when the right of the payment has been established, except when the Bank benefits from such proceeds as a recovery of part of the cost of the instrument, in which case, such gains are recorded in OCI. Equity instruments at FVOCI are not subject to an impairment assessment.

Debt issued and other borrowed funds

After initial measurement, debt issued and other borrowed funds are subsequently measured at amortised cost. Amortised cost is calculated by taking into account any discount or premium on issue funds, and costs that are an integral part of the effective interest rate. A compound financial instrument which contains both a liability and an equity component is separated at the issue date.

Disclosures for the Bank's issued debt are set out in Note 13.

FirstCaribbean International Bank (Jamaica) Limited

Notes to the Financial Statements

Year ended 31 October 2018

(Expressed in Jamaican dollars unless otherwise indicated)

2. Summary of Significant Accounting Policies (Continued)

(f) Financial instruments: financial assets and liabilities (continued)

Financial assets and financial liabilities at fair value through profit or loss

Financial assets and financial liabilities in this category are those that are not held for trading and have been either designated by management upon initial recognition or are mandatorily required to be measured at fair value under IFRS 9. Management only designates an instrument at FVPL upon initial recognition when one of the following criteria are met. Such designation is determined on an instrument-by-instrument basis:

- The designation eliminates, or significantly reduces, the inconsistent treatment that would otherwise arise from measuring the assets or liabilities or recognising gains or losses on them on a different basis, or
- The liabilities (and assets until 1 November 2017 under IAS 39) are part of a group of financial liabilities (or financial assets, or both under IAS 39), which are managed and their performance evaluated on a fair value basis, in accordance with a documented risk management or investment strategy, or
- The liabilities (and assets until 1 November 2017 under IAS 39) containing one or more embedded derivatives, unless they do not significantly modify the cash flows that would otherwise be required by the contract, or it is clear with little or no analysis when a similar instrument is first considered that separation of the embedded derivative(s) is prohibited.

Financial assets and financial liabilities at FVPL are recorded in the statement of financial position at fair value. Changes in fair value are recorded in profit and loss with the exception of movements in fair value of liabilities designated at FVPL due to changes in the Bank's own credit risk. Such changes in fair value are recorded in the Own credit reserve through OCI and do not get recycled to the profit or loss. Interest earned or incurred on instruments designated at FVPL is accrued in interest income or interest expense, respectively, using the EIR, taking into account any discount/ premium and qualifying transaction costs being an integral part of instrument. Interest earned on assets mandatorily required to be measured at FVPL is recorded using contractual interest rate. Dividend income from equity instruments measured at FVPL is recorded in profit or loss as other operating income when the right to the payment has been established.

FirstCaribbean International Bank (Jamaica) Limited

Notes to the Financial Statements
Year ended 31 October 2018
(Expressed in Jamaican dollars unless otherwise indicated)

2. Summary of Significant Accounting Policies (Continued)

(f) Financial instruments: financial assets and liabilities (continued)

Financial guarantees, letters of credit and undrawn loan commitments

The Bank issues financial guarantees, letters of credit and loan commitments.

Financial guarantees are initially recognised in the financial statements (within Provisions) at fair value, being the premium received. Subsequent to initial recognition, the Bank's liability under each guarantee is measured at the higher of the amount initially recognised less cumulative amortisation recognised in the income statement, and – under IAS 39 – the best estimate of expenditure required to settle any financial obligation arising as a result of the guarantee, or – under IFRS 9 – an ECL provision as set out in Note 7.

The premium received is recognised in the income statement in Net fees and commission income on a straight line basis over the life of the guarantee.

Undrawn loan commitments and letters of credits are commitments under which, over the duration of the commitment, the Bank is required to provide a loan with pre-specified terms to the customer. Similar to financial guarantee contracts, under IAS 39, a provision was made if they were an onerous contract but, from 1 November 2017, these contracts are in the scope of the ECL requirements.

The nominal contractual value of financial guarantees, letters of credit and undrawn loan commitments, where the loan agreed to be provided is on market terms, are not recorded on in the statement of financial position. The nominal values of these instruments together with the corresponding ECLs are disclosed in Note 31.

The Bank occasionally issues loan commitments at below market interest rates drawdown. Such commitments are subsequently measured at the higher of the amount of the ECL allowance and the amount initially recognised less, when appropriate, the cumulative amount of income recognised.

All gains and losses from disposals of investment securities available-for-sale are included in operating income as net investment securities gains or losses. Where certain financial assets are hedged and there is ineffectiveness, this is included in operating income as net hedge relationship gains or losses. Dividends are recorded on the accrual basis when declared and are included in investment securities interest and similar income.

Financial liabilities, other than derivatives, are measured at amortised cost. Derivatives are measured at fair value. Interest expense is recognised on an accrual basis using the effective interest method.

FirstCaribbean International Bank (Jamaica) Limited

Notes to the Financial Statements

Year ended 31 October 2018

(Expressed in Jamaican dollars unless otherwise indicated)

2. Summary of Significant Accounting Policies (Continued)

(f) Financial instruments: financial assets and liabilities (continued)

Reclassification of financial assets and liabilities

From 1 November 2017, the Bank does not reclassify its financial assets subsequent to their initial recognition, apart from the exceptional circumstances in which the Bank acquires, disposes of, or terminates a business line. Financial liabilities are never reclassified. The Bank did not reclassify any of its financial assets or liabilities in 2017.

(g) Cash and cash equivalents

For the purposes of the statement of cash flows, cash and cash equivalents comprise balances with less than 90 days maturity from the date of acquisition including cash and balances with Bank of Jamaica (excluding statutory reserves) and accounts with other banks (Note 3).

(h) Offsetting financial instruments

Financial assets and liabilities are offset and the net amount reported in the statement of financial position when there is a legally enforceable right to offset the recognised amounts and there is an intention to settle on a net basis, or realise the asset and settle the liability simultaneously.

(i) Impairment of financial assets (Policy applicable from 1 November 2017)

Overview of the ECL principles

As described in Note 2, the adoption of IFRS 9 has fundamentally changed the Bank's loan loss impairment method by replacing IAS 39's incurred loss approach with a forward-looking ECL approach. From 1 November 2017, the Bank has been recording the allowance for expected credit losses for all loans and other debt financial assets not held at FVPL, together with loan commitments and financial guarantee contracts, in this section all referred to as 'financial instruments'. Equity instruments are not subject to impairment under IFRS 9.

The ECL allowance is based on the credit losses expected to arise over the life of the asset (the lifetime expected credit loss or LTECL), unless there has been no significant increase in credit risk since origination, in which case, the allowance is based on the 12 months' expected credit loss (12mECL) as outlined in Note 7. The Bank's policies for determining if there has been a significant increase in credit risk are set out below.

The 12mECL is the portion of LTECLs that represents the ECLs that result from default events on a financial instrument that are possible within the 12 months after the reporting date.

Both LTECLs and 12mECLs are calculated on either an individual basis or a collective basis, depending on the nature of the underlying portfolio of financial instruments.

FirstCaribbean International Bank (Jamaica) Limited

Notes to the Financial Statements
Year ended 31 October 2018
(Expressed in Jamaican dollars unless otherwise indicated)

2. Summary of Significant Accounting Policies (Continued)

(i) Impairment of financial assets (Policy applicable from 1 November 2017) (continued)

The Bank has established a policy to perform an assessment, at the end of each reporting period, of whether a financial instrument's credit risk has increased significantly since initial recognition, by considering the change in the risk of default occurring over the remaining life of the financial instrument.

Based on the above process, the Bank groups its loans into Stage 1, Stage 2, Stage 3 and POCI, as described below:

- **Stage 1:** When loans are first recognised, the Bank recognises an allowance based on 12mECLs. Stage 1 loans also include facilities where the credit risk has improved and the loan has been reclassified from Stage 2.
- **Stage 2:** When a loan has shown a significant increase in credit risk since origination, the Bank records an allowance for the LTECLs. Stage 2 loans also include facilities, where the credit risk has improved and the loan has been reclassified from Stage 3.
- **Stage 3:** Loans considered credit-impaired (as outlined in Note 7). The Bank records an allowance for the LTECLs.
- **POCI:** Purchased or originated credit impaired (POCI) assets are financial assets that are credit impaired on initial recognition. POCI assets are recorded at fair value at original recognition and interest income is subsequently recognised based on a credit-adjusted EIR. ECLs are only recognised or released to the extent that there is a subsequent change in the expected credit losses.

For financial assets for which the Bank has no reasonable expectations of recovering either the entire outstanding amount, or a proportion thereof, the gross carrying amount of the financial asset is reduced. This is considered a (partial) derecognition of the financial asset.

The calculation of ECLs

The Bank calculates ECLs based on probability-weighted scenarios to measure the expected cash shortfalls, discounted at an approximation to the EIR. A cash shortfall is the difference between the cash flows that are due to an entity in accordance with the contract and the cash flows that the entity expects to receive.

FirstCaribbean International Bank (Jamaica) Limited

Notes to the Financial Statements
Year ended 31 October 2018
(Expressed in Jamaican dollars unless otherwise indicated)

2. Summary of Significant Accounting Policies (Continued)

(i) Impairment of financial assets (Policy applicable from 1 November 2017) (continued)

The mechanics of the ECL calculations are outlined below and the key elements are, as follows:

- **PD** - The Probability of Default is an estimate of the likelihood of default over a given time horizon. A default may only happen at a certain time over the assessed period, if the facility has not been previously derecognised and is still in the portfolio. The concept of PDs is further explained in Note 35.
- **EAD** - The Exposure at Default is an estimate of the exposure at a future default date, taking into account expected changes in the exposure after the reporting date, including repayments of principal and interest, whether scheduled by contract or otherwise, expected drawdowns on committed facilities, and accrued interest from missed payments. The EAD is further explained in Note 35.
- **LGD** - The Loss Given Default is an estimate of the loss arising in the case where a default occurs at a given time. It is based on the difference between the contractual cash flows due and those that the lender would expect to receive, including from the realisation of any collateral. It is usually expressed as a percentage of the EAD. The LGD is further explained in Note 35.

With the exception of credit cards and other revolving facilities, the maximum period for which the credit losses are determined is the contractual life of a financial instrument unless the Bank has the legal right to call it earlier.

Provisions for ECLs for undrawn loan commitments are assessed as set out in Note 7. The calculation of ECLs (including the ECLs related to the undrawn element) of revolving facilities such as credit cards is explained in Note 7.

The mechanics of the ECL method are summarised below:

- **Stage 1:** The 12mECL is calculated as the portion of LTECLs that represent the ECLs that result from default events on a financial instrument that are possible within the 12 months after the reporting date. The Bank calculates the 12mECL allowance based on the expectation of a default occurring in the 12 months following the reporting date. These expected 12-month default probabilities are applied to a forecast EAD and multiplied by the expected LGD and discounted by an approximation to the original EIR.
- **Stage 2:** When a loan has shown a significant increase in credit risk since origination, the Bank records an allowance for the LTECLs. The mechanics are similar to those explained above, but PDs and LGDs are estimated over the lifetime of the instrument. The expected cash shortfalls are discounted by an approximation to the original EIR.
- **Stage 3:** For loans considered credit-impaired, the Bank recognises the lifetime expected credit losses for these loans. The method is similar to that for Stage 2 assets, with the PD set at 100%.

FirstCaribbean International Bank (Jamaica) Limited

Notes to the Financial Statements
Year ended 31 October 2018
(Expressed in Jamaican dollars unless otherwise indicated)

2. Summary of Significant Accounting Policies (Continued)

(i) Impairment of financial assets (Policy applicable from 1 November 2017) (continued)

Purchased or originated credit impaired financial assets (POCI)

POCI assets are financial assets that are credit impaired on initial recognition. The Bank only recognises the cumulative changes in lifetime ECLs since initial recognition, based on a probability-weighting scenarios, discounted by the credit adjusted EIR, as follows:

- Loan commitments and letters of credit: When estimating 12mECL for undrawn loan commitments, the Bank applies the PD and LGD to the undrawn amount, and this amount is discounted at an approximation to the expected EIR on the loan.

For credit cards and revolving facilities that include both a loan and an undrawn commitment, ECLs are calculated and presented together with the loan. For loan commitments and letters of credit, the ECL is recognised within Provisions.

- Financial guarantee contracts: The Bank estimates ECLs by applying the PD and LGD to the exposure, and this amount is discounted at an approximation to the interest rate relevant to the exposure. The ECLs related to financial guarantee contracts are recognised within credit loss on financial assets.

Debt instruments measured at fair value through OCI

The ECLs for debt instruments measured at FVOCI do not reduce the carrying amount of these financial assets in the statement of financial position, which remains at fair value. Instead, an amount equal to the allowance that would arise if the assets were measured at amortised cost is recognised in OCI as an accumulated impairment amount, with a corresponding charge to profit or loss. The accumulated loss recognised in OCI is recycled to the profit and loss upon derecognition of the assets.

Credit cards and other revolving facilities

The Bank's product offering includes a variety of corporate and retail overdraft and credit cards facilities, in which the Bank has the right to cancel and/or reduce the facilities with one day's notice. The Bank does not limit its exposure to credit losses to the contractual notice period, but, instead calculates ECL over a period that reflects the Bank's expectations of the customer behaviour, its likelihood of default and the Bank's future risk mitigation procedures, which could include reducing or cancelling the facilities.

FirstCaribbean International Bank (Jamaica) Limited

Notes to the Financial Statements
Year ended 31 October 2018
(Expressed in Jamaican dollars unless otherwise indicated)

2. Summary of Significant Accounting Policies (Continued)

(i) Impairment of financial assets (Policy applicable from 1 November 2017) (Continued)

The ongoing assessment of whether a significant increase in credit risk has occurred for revolving facilities is similar to other lending products. This is based on shifts in the customer's internal credit grade or history of delinquency, as explained in Note 35 but greater emphasis is also given to qualitative factors such as changes in usage.

The interest rate used to discount the ECLs for credit cards is based on the average effective interest rate that is expected to be charged over the expected period of exposure to the facilities.

The calculation of ECLs, including the estimation of the expected period of exposure and discount rate is made, as explained in Note 35, on an individual basis for corporate and on a collective basis for retail products. The collective assessments are made separately for portfolios of facilities with similar credit risk characteristics.

Forward looking information

In its ECL models, the Bank relies on a broad range of forward looking information as economic inputs, such as:

- GDP growth
- Consumer price index and inflation
- Interest rates

The inputs and models used for calculating ECLs may not always capture all characteristics of the market at the date of the financial statements. To reflect this, qualitative adjustments or overlays are occasionally made as temporary adjustments when such differences are significantly material. Detailed information about these inputs and sensitivity analysis are provided in Note 35.

Collateral valuation

To mitigate its credit risks on financial assets, the Bank seeks to use collateral, where possible. The collateral comes in various forms, such as cash, securities, letters of credit/guarantees, real estate, receivables, inventories, other non-financial assets and credit enhancements such as netting agreements. The Bank's accounting policy for collateral assigned to it through its lending arrangements under IFRS 9 is the same as it was under IAS 39. Collateral, unless repossessed, is not recorded on the Bank's statement of financial position. However, the fair value of collateral affects the calculation of ECLs. It is generally assessed, at a minimum, at inception and re-assessed on a quarterly basis. Details of the impact of the Bank's various credit enhancements are disclosed in Note 35(b).

The Bank's credit risk management policies include requirements relating to collateral valuation and management, including verification requirements and legal certainty. Valuations are updated periodically depending upon the nature of the collateral. Management monitors the market value of collateral and requests additional collateral in accordance with the underlying agreement during its periodic review of loan accounts in arrears. Policies are in place to monitor the existence of undesirable concentration in the collateral supporting the Bank's credit exposure.

FirstCaribbean International Bank (Jamaica) Limited

Notes to the Financial Statements
Year ended 31 October 2018
(Expressed in Jamaican dollars unless otherwise indicated)

2. Summary of Significant Accounting Policies (Continued)

(i) Impairment of financial assets (Policy applicable from 1 November 2017) (continued)

Collateral repossessed

The Bank's accounting policy under IFRS 9 remains the same as it was under IAS 39. The Bank's policy is to determine whether a repossessed asset can be best used for its internal operations or should be sold. Assets determined to be useful for the internal operations are transferred to their relevant asset category at the lower of their repossessed value or the carrying value of the original secured asset. Assets for which selling is determined to be a better option are transferred to assets held for sale at their fair value (if financial assets) and fair value less cost to sell for non-financial assets at the repossession date in, line with the Bank's policy.

In its normal course of business, the Bank does not physically repossess properties or other assets in its retail portfolio, but engages external agents to recover funds, generally at auction, to settle outstanding debt. Any surplus funds are returned to the customers/obligors. As a result of this practice, the residential properties under legal repossession processes are not recorded on the statement of financial position.

Write-offs

The Bank's accounting policy under IFRS 9 remains the same as it was under IAS 39. Financial assets are written off, either partially or in their entirety, only when the Bank has stopped pursuing the recovery. If the amount to be written off is greater than the accumulated loss allowance, the difference is first treated as an addition to the allowance that is then applied against the gross carrying amount. Any subsequent recoveries are credited to credit loss expense.

Forborne and modified loans

The Bank sometimes makes concessions or modifications to the original terms of loans as a response to the borrower's financial difficulties, rather than taking possession or to otherwise enforce collection of collateral. The Bank considers a loan forborne when such concessions or modifications are provided as a result of the borrower's present or expected financial difficulties and the Bank would not have agreed to them if the borrower had been financially healthy. Indicators of financial difficulties include defaults on covenants, or significant concerns raised by the Credit Risk Department.

Forbearance may involve extending the payment arrangements and the agreement of new loan conditions. Once the terms have been renegotiated, any impairment is measured using the original EIR as calculated before the modification of terms. It is the Bank's policy to monitor forborne loans to help ensure that future payments continue to be likely to occur. Derecognition decisions and classification between Stage 2 and Stage 3 are determined on a case-by-case basis. If these procedures identify a loss in relation to a loan, it is disclosed and managed as an impaired Stage 3 forborne asset until it is collected or written off.

FirstCaribbean International Bank (Jamaica) Limited

Notes to the Financial Statements

Year ended 31 October 2018

(Expressed in Jamaican dollars unless otherwise indicated)

2. Summary of Significant Accounting Policies (Continued)

(i) Impairment of financial assets (Policy applicable from 1 November 2017) (continued)

Forborne and modified loans (continued)

From 1 November 2017, when the loan has been renegotiated or modified but not derecognised, the Bank also reassesses whether there has been a significant increase in credit risk, as set out in Note 36(b). The Bank also considers whether the assets should be classified as Stage 3. Once an asset has been classified as forborne, it will remain forborne for a minimum probation period of one year, over which the asset must be serviced in line with contractual obligations. In order for the loan to be reclassified out of the forborne category, the customer has to meet all of the following criteria:

- All of its facilities has to be considered performing
- The probation period has passed from the date the forborne contract was considered performing
- Regular payments of more than an insignificant amount of principal or interest have been made during at least half of the probation period
- The customer does not have any contract that is more than 30 days past due.

Details of forborne assets are disclosed in Note 35(d). If modifications are substantial, the loan is derecognised, as explained in Note 2(j).

The Bank assesses at each reporting date whether there is objective evidence that a financial asset or a group of financial assets is impaired. A financial asset or a group of financial assets is impaired and impairment losses are incurred if there is objective evidence of impairment as a result of one or more events that occurred after the initial recognition of the asset (a 'loss event') and that loss event (or events) has an impact on the future cash flows of the financial asset or group of financial assets that can be reliably estimated. Objective evidence that a financial asset or group of financial assets is impaired includes observable data that comes to the attention of the Bank about the following loss events:

- (i) significant financial difficulty of the issuer or obligor;
- (ii) a breach of contract, such as a default or delinquency in interest or principal payments;
- (iii) the Bank granting to a borrower, for economic or legal reasons relating to the borrower's financial difficulty, a concession that the lender would not otherwise consider;
- (iv) it becoming probable that the borrower will enter bankruptcy or other financial reorganisation;
- (v) the disappearance of an active market for that financial asset because of financial difficulties; or
- (vi) observable data indicating that there is a measurable decrease in the estimated future cash flows from a group of financial assets since the initial recognition of those assets, although the decrease cannot yet be identified with the individual financial assets in the Bank, including:
 - adverse changes in the payment status of borrowers in the Bank; or
 - national or local economic conditions that correlate with default on the assets in the Bank.

If there is objective evidence that an impairment loss on loans and receivables carried at amortised cost has been incurred, the amount of the loss is measured as the difference between the carrying amount and the recoverable amount, being the estimated present value of expected cash flows, including amounts recoverable from guarantees and collateral, discounted based on the original effective interest rate.

FirstCaribbean International Bank (Jamaica) Limited

Notes to the Financial Statements
Year ended 31 October 2018
(Expressed in Jamaican dollars unless otherwise indicated)

2. Summary of Significant Accounting Policies (Continued)

(i) Impairment of financial assets (Policy applicable before 1 November 2017) (continued)

In certain instances, the terms of advances to customers are restructured or renegotiated. These facilities are subject to the impairment review noted above, and where there is objective evidence of impairment, the amount of any impairment loss is measured as the difference between the carrying value of the facility and the present value of estimated future cash flows based on the renegotiated terms and conditions discounted at the original effective interest rate before restructuring.

Loans are written off, in whole or in part, against the related allowance for credit losses upon settlement (realisation) of collateral or in advance of settlement (no realisation) where the determination of the recoverable value is completed and there is no realistic prospect of recovery above the recoverable value. Any subsequent recoveries are credited to the statement of income. If the amount of the impairment subsequently decreases due to an event occurring after the write-down, the release of the provision is credited to the statement of income.

In circumstances where Central Bank guidelines and regulatory rules require provisions in excess of those calculated under IFRS, the difference is disclosed as an appropriation of retained earnings and is included in a non-distributable general banking reserve.

(j) Derecognition of financial assets and liabilities

Derecognition due to substantial modification of terms and conditions

The Bank derecognises a financial asset, such as a loan to a customer, when the terms and conditions have been renegotiated to the extent that, substantially, it becomes a new loan, with the difference recognised as a derecognition gain or loss, to the extent that an impairment loss has not already been recorded. The newly recognised loans are classified as Stage 1 for ECL measurement purposes, unless the new loan is deemed to be POCI.

When assessing whether or not to derecognise a loan to a customer, amongst others, the Bank considers the following factors:

- Change in currency of the loan
- Introduction of an equity feature
- Change in counterparty
- If the modification is such that the instrument would no longer meet the SPPI criterion.

If the modification does not result in cash flows that are substantially different, the modification does not result in derecognition. Based on the change in cash flows discounted at the original EIR, the Bank records a modification gain or loss, to the extent that an impairment loss has not already been recorded.

FirstCaribbean International Bank (Jamaica) Limited

Notes to the Financial Statements

Year ended 31 October 2018

(Expressed in Jamaican dollars unless otherwise indicated)

2. Summary of Significant Accounting Policies (Continued)

(j) Derecognition of financial assets and liabilities (continued)

Derecognition other than for substantial modification

Financial assets

A financial asset (or, where applicable, a part of a financial asset or part of a group of similar financial assets) is derecognised when the rights to receive cash flows from the financial asset have expired. The Bank also derecognises the financial asset if it has both transferred the financial asset and the transfer qualifies for derecognition.

The Bank has transferred the financial asset if, and only if, either:

- The Bank has transferred its contractual rights to receive cash flows from the financial asset, or
- It retains the rights to the cash flows, but has assumed an obligation to pay the received cash flows in full without material delay to a third party under a 'pass-through' arrangement. Pass-through arrangements are transactions whereby the Bank retains the contractual rights to receive the cash flows of a financial asset (the 'original asset'), but assumes a contractual obligation to pay those cash flows to one or more entities (the 'eventual recipients'), when all of the following three conditions are met:
 - The Bank has no obligation to pay amounts to the eventual recipients unless it has collected equivalent amounts from the original asset, excluding short-term advances with the right to full recovery of the amount lent plus accrued interest at market rates
 - The Bank cannot sell or pledge the original asset other than as security to the eventual recipients
 - The Bank has to remit any cash flows it collects on behalf of the eventual recipients without material delay. In addition, the Bank is not entitled to reinvest such cash flows, except for investments in cash or cash equivalents including interest earned, during the period between the collection date and the date of required remittance to the eventual recipients.

A transfer only qualifies for derecognition if either:

- The Bank has transferred substantially all the risks and rewards of the asset, or
- The Bank has neither transferred nor retained substantially all the risks and rewards of the asset, but has transferred control of the asset

FirstCaribbean International Bank (Jamaica) Limited

Notes to the Financial Statements
Year ended 31 October 2018
(Expressed in Jamaican dollars unless otherwise indicated)

2. Summary of Significant Accounting Policies (Continued)

(j) Derecognition of financial assets and liabilities (continued)

The Bank considers control to be transferred if and only if, the transferee has the practical ability to sell the asset in its entirety to an unrelated third party and is able to exercise that ability unilaterally and without imposing additional restrictions on the transfer.

When the Bank has neither transferred nor retained substantially all the risks and rewards and has retained control of the asset, the asset continues to be recognised only to the extent of the Bank's continuing involvement, in which case, the Bank also recognises an associated liability. The transferred asset and the associated liability are measured on a basis that reflects the rights and obligations that the Bank has retained.

Continuing involvement that takes the form of a guarantee over the transferred asset is measured at the lower of the original carrying amount of the asset and the maximum amount of consideration the Bank could be required to pay.

If continuing involvement takes the form of a written or purchased option (or both) on the transferred asset, the continuing involvement is measured at the value the Bank would be required to pay upon repurchase. In the case of a written put option on an asset that is measured at fair value, the extent of the entity's continuing involvement is limited to the lower of the fair value of the transferred asset and the option exercise price.

Financial liabilities

A financial liability is derecognised when the obligation under the liability is discharged, cancelled or expires. Where an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as a derecognition of the original liability and the recognition of a new liability. The difference between the carrying value of the original financial liability and the consideration paid is recognised in profit or loss.

(k) Sale and repurchase agreements and lending of securities

Securities sold under agreements to repurchase (repurchase agreements) and securities purchased under agreements to resell (reverse repurchase agreements) are treated as collateralised financing transactions. The difference between the sale/purchase and repurchase/resale price is treated as interest and accrued over the life of the agreements using the effective yield method.

FirstCaribbean International Bank (Jamaica) Limited

Notes to the Financial Statements
Year ended 31 October 2018
(Expressed in Jamaican dollars unless otherwise indicated)

2. Summary of Significant Accounting Policies (Continued)

(l) Leases

(i) *As lessee*

Leases where a significant portion of the risks and rewards of ownership are retained by the lessor are classified as operating leases. Payments under operating leases are charged to the statement of income on a straight-line basis over the period of the lease.

(ii) *As lessor*

When assets are held subject to a finance lease, the present value of the lease payments is recognised as a receivable. The difference between the gross receivable and the present value of the receivable is recognised as unearned finance income. Lease income is recognised over the term of the lease using the net investment method, which reflects a constant periodic rate of return.

(m) Financial guarantees

Financial guarantees are financial contracts that require the issuer to make specified payments to reimburse the holder for a loss it incurs because a specified debtor fails to make payment when due in accordance with the original or modified terms of a debt instrument.

Financial guarantee contracts issued by the Bank are treated as contingent liabilities and not recognised in the statement of financial position until a payment under the guarantee has been made, at which time the payment is treated as a loan and advance to customers.

(n) Property and equipment

Land and buildings comprise mainly branches and offices and are shown at deemed cost, less subsequent depreciation for buildings. Under IFRS 1, a first time adopter may elect to use a previous GAAP revaluation of an item of property and equipment as its deemed cost. The Bank elected to apply this provision on transition to IFRS on 1 November 2002.

All other property and equipment are stated at historical cost less accumulated depreciation. Historical cost includes expenditure that is directly attributable to the acquisition of the items.

Subsequent costs are included in the asset's carrying amount or are recognised as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the item will flow to the Bank and the cost of the item can be measured reliably. All other repairs and maintenance are charged to the statement of income during the financial period in which they are incurred.

Land is not depreciated. Depreciation on other property and equipment is computed on the straight line method at rates considered adequate to write-off the cost of depreciable assets, less salvage, over their useful lives.

The annual rates used are:

- Buildings	2½%
- Leasehold improvements	10% or over the life of the lease
- Equipment, furniture and vehicles	6.67% - 50%

FirstCaribbean International Bank (Jamaica) Limited

Notes to the Financial Statements
Year ended 31 October 2018
(Expressed in Jamaican dollars unless otherwise indicated)

2. Summary of Significant Accounting Policies (Continued)

(n) Property and equipment (continued)

Assets that are subject to depreciation are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. Where the carrying amount of an asset is greater than its estimated recoverable amount, it is written down immediately to its recoverable amount. The asset's recoverable amount is the higher of the asset's fair value less costs to sell and the value in use.

An item of property and equipment is derecognised upon disposal or when no future economic benefits are expected from its use or disposal. Gains and losses on disposal of property and equipment are determined by reference to its carrying amount and are taken into account in determining net income.

Depreciation methods, useful lives and residual values are reviewed at each annual reporting date and are adjusted if appropriate.

(o) Transactions with jointly controlled entities

IFRS 3 Business Combinations does not apply to a business combination of entities or businesses under common control. A business combination involving entities or businesses under common control is a business combination in which all of the combining entities or businesses are ultimately controlled by the same party or parties both before and after the business combination, and that control is not transitory. The Bank accounts for the acquisition of commonly controlled entities as follows:

- The assets, liabilities, income and expenses of a subsidiary are included in the financial statement prospectively from the date of acquisition.
- The assets and liability of the subsidiaries are reflected in the financial statements at their carrying amounts and are not revalued to fair value.
- No new goodwill is recognized as a result of the combination. Instead, any difference between the value of consideration and the carrying value of the assets acquired is reflected as an adjustment to retained earnings.

(p) Provisions

Provisions are recognised when the Bank has a present legal or constructive obligation as a result of past events; it is more than likely that an outflow of resources embodying economic benefits will be required to settle the obligation, and a reliable estimate of the amount of the obligation can be made.

(q) Income taxes

Taxation expense in the statement of income comprises current and deferred tax charges.

Current tax charges are based on taxable income for the year, which differs from the income before tax reported because taxable income excludes items that are taxable or deductible in other years, and items that are never taxable or deductible. The Bank's liability for current tax is calculated at tax rates that have been enacted at the reporting date.

FirstCaribbean International Bank (Jamaica) Limited

Notes to the Financial Statements

Year ended 31 October 2018

(Expressed in Jamaican dollars unless otherwise indicated)

2. Summary of Significant Accounting Policies (Continued)

(q) Income taxes (continued)

Deferred tax is the tax that is expected to be paid or recovered on differences between the carrying amounts of assets and liabilities and the corresponding tax bases. Deferred income tax is provided in full, using the liability method, on temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the financial statements. Currently enacted tax rates are used in the determination of deferred income tax.

Deferred tax assets are recognised to the extent that it is probable that future taxable income will be available against which the temporary differences can be utilised. Management's judgement is required to determine the amount of the deferred tax asset that can be recognised, based upon the likely timing and level of future taxable profits together with future tax planning strategies. Deferred tax assets are reviewed at each reporting date to determine whether it is probable that the related tax benefit will be realized. Deferred tax is charged or credited in the statement of income, except where it relates to items charged or credited to other comprehensive income, in which case deferred tax is also dealt with in the statement of comprehensive income.

(r) Customer loyalty programme

The Bank offers customer points programmes through its credit card products. A portion of the net fee revenues are deferred in relation to award credits under customer loyalty programmes as a separately identifiable revenue component. The amount deferred represents the fair value of the award credits and is recognised when the awards are utilised or expire.

(s) Retirement benefit obligations

(i) Pension obligations

The Bank operates a defined benefit plan and a defined contribution plan, the assets of which are generally held in separate trustee-administered funds. The pension plans are generally funded by payments from the Bank, taking account of the recommendations of independent qualified actuaries.

A defined benefit plan is a pension plan that defines an amount of pension benefit to be provided, usually as a function of one or more factors such as age, years of service or compensation. The asset recognised in the statement of financial position in respect of the defined benefit pension plan is the difference between the present value of the defined benefit obligation at the reporting date and the fair value of plan assets, together with adjustments for unrecognised actuarial gains and losses and past service cost. The defined benefit obligation is calculated annually by independent actuaries using the projected unit credit method. The present value of the defined benefit obligation is determined by the estimated future cash outflows using interest rates of government securities which have terms to maturity approximating the terms of the related liability.

Re-measurements, comprising where applicable actuarial gains and losses, the effect of the asset ceiling, excluding net interest and the return on plan assets (excluding net interest), are recognised immediately in the statement of financial position with a corresponding debit or credit to retained earnings through OCI in the period in which they occur. Re-measurements are not reclassified to profit or loss in subsequent periods.

Past service costs are recognised in profit or loss on the earlier of:

- The date of the plan amendment or curtailment, and
- The date that the Bank recognises restructuring-related cost.

FirstCaribbean International Bank (Jamaica) Limited

Notes to the Financial Statements
Year ended 31 October 2018
(Expressed in Jamaican dollars unless otherwise indicated)

2. Summary of Significant Accounting Policies (Continued)

(s) Retirement benefit obligations (continued)

(i) Pension obligations (continued)

Net interest is calculated by applying the discount rate to the net defined benefit liability or asset. The Bank recognises the following changes in the net defined benefit obligation as part of staff costs expenses in the statement of income:

- Service costs comprising current service costs, past-service costs, gains and losses on curtailments and non-routine settlements.
- Net interest expense or income.

A defined contribution plan is a pension plan under which the Bank pays fixed contributions into a separate entity (a fund) and will have no legal or constructive obligations to pay further contributions if the fund does not hold sufficient assets to pay all employee benefits relating to employee service in the current and prior periods. The regular contributions constitute net periodic costs for the year in which they are due and as such are included in staff costs. The Bank's contributions to defined contribution pension plans are charged to the statement of income in the year to which they relate.

(ii) Other post-retirement obligations

The Bank provides post-retirement health care benefits to its retirees. The entitlement to these benefits is usually based on the employee remaining in service up to retirement age and the completion of a minimum service period. The expected costs of these benefits are accrued over the period of employment, using a methodology similar to that for defined benefit pension plans. These obligations are valued annually by independent qualified actuaries.

(iii) Annual leave and other benefits

Employee entitlements to annual leave and other benefits are recognised when they accrue to employees. A provision is made for the established liability for annual leave and other benefits as a result of services rendered by employees up to the statement of financial position date.

(t) Borrowings

Borrowings are recognised initially at fair value less transaction costs and are subsequently stated at amortised cost and any difference between net proceeds and the redemption value is recognised in the statement of income over the period of the borrowings, using the effective interest method.

FirstCaribbean International Bank (Jamaica) Limited

Notes to the Financial Statements

Year ended 31 October 2018

(Expressed in Jamaican dollars unless otherwise indicated)

2. Summary of Significant Accounting Policies (Continued)

(u) Recognition of income and expenses

(i) *Interest and similar income and expense*

Interest and similar income and expense are recognised in the statement of income for all interest bearing instruments on an accrual basis using the effective interest method based on the actual purchase price or estimated recoverable amount. Interest income includes coupons earned on fixed income investments and accrued discount or premium on treasury bills and other discounted instruments.

Where collection of interest income is considered doubtful, or payment is outstanding for more than 90 days, the banking regulations stipulate that interest should be taken into account on the cash basis. IFRS requires that when loans become doubtful of collection, they are written down to their recoverable amounts and interest income is thereafter recognised based on the rate of interest that was used to discount the future cash flows for the purpose of measuring the recoverable amount. The difference between the regulatory and IFRS bases of interest recognition was assessed to be immaterial.

Under both IFRS 9 and IAS 39, interest income is recorded using the effective interest rate (EIR) method for all financial instruments measured at amortised cost and financial instruments designated at FVPL. Interest income on interest bearing financial assets measured at FVOCI under IFRS 9, similarly to interest bearing financial assets classified as available-for-sale or held to maturity under IAS 39 are also recorded by using the EIR method. The EIR is the rate that exactly discounts estimated future cash receipts through the expected life of the financial instrument or, when appropriate, a shorter period, to the net carrying amount of the financial asset.

The EIR (and therefore, the amortised cost of the asset) is calculated by taking into account any discount or premium on acquisition, fees and costs that are an integral part of the EIR. The Bank recognises interest income using a rate of return that represents the best estimate of a constant rate of return over the expected life of the loan. Hence, it recognises the effect of potentially different interest rates charged at various stages, and other characteristics of the product life cycle (including prepayments, penalty interest and charges). If expectations regarding the cash flows on the financial asset are revised for reasons other than credit risk, the adjustment is booked as a positive or negative adjustment to the carrying amount of the asset in the statement of financial position with an increase or reduction in interest income. The adjustment is subsequently amortised through Interest and similar income in the income statement.

The Bank calculates interest income by applying the EIR to the gross carrying amount of financial assets other than credit-impaired assets. When a financial asset becomes credit-impaired (as set out in Note 7) and is, therefore, regarded as 'Stage 3', the Bank calculates interest income by applying the effective interest rate to the net amortised cost of the financial asset. If the financial assets is reclassified out of foreborne asset (as outlined in Note 2(i)) and is no longer credit-impaired, the Bank reverts to calculating interest income on a gross basis.

2. Summary of Significant Accounting Policies (Continued)

(u) Recognition of income and expenses (continued)

(i) *Interest and similar income and expense (continued)*

Interest income on financial assets mandatorily required to be measured at FVPL is recognised using the contractual interest rate in net gains/(losses) on financial assets at fair value through profit or loss, respectively.

(ii) *Fee and commission income*

Fees and commissions are generally recognised on an accrual basis when the service has been provided. Loan origination fees, which have a high probability of being drawn down, are deferred (together with related direct costs) and recognised as an adjustment to the effective interest yield on the loan. Fees and commission arising from origination, negotiating, or participating in the negotiation of a transaction for a third party, such as the acquisition of loans, shares or other securities or the purchase or sale of businesses, are recognised on completion of the underlying transaction. Portfolio and other management advisory and service fees are recognised based on the applicable service contracts, usually on a time-apportioned basis. Asset management fees related to investment funds are recognised rateably over the period the service is provided. The same principle is applied for wealth management, financial planning and custody services that are continuously provided over an extended period of time.

(v) Earnings per stock unit

Basic earnings per stock unit is calculated by dividing the net profit attributable to equity holders of the parent by the weighted average number of common shares outstanding during the year.

2. Summary of Significant Accounting Policies (Continued)

(w) Fair value measurement

The Bank measures financial instruments, such as, derivatives, and FVOCI debt securities at fair value at each statement of financial position date. Also, fair values of financial instruments measured at amortised cost are disclosed in Note 35. Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date.

The fair value measurement is based on the presumption that the transaction to sell the asset or transfer the liability takes place either:

- In the principal market for the asset or liability, or
- In the absence of a principal market, in the most advantageous market for the asset or liability.

The principal or the most advantageous market must be accessible to the Bank.

The fair value of an asset or a liability is measured using the assumptions that market participants would use when pricing the asset or liability, assuming that market participants act in their economic best interest.

A fair value measurement of a non-financial asset takes into account a market participant's ability to generate economic benefits by using the asset in its highest and best use or by selling it to another market participant that would use the asset in its highest and best use.

The Bank uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximising the use of relevant observable inputs and minimising the use of unobservable inputs.

All assets and liabilities for which fair value is measured or disclosed in the financial statements are categorized within the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

- Level 1 - Quoted (unadjusted) market prices in active markets for identical assets or liabilities
- Level 2 - Valuation techniques for which the lowest level input that is significant to the fair value measurement is directly or indirectly observable
- Level 3 - Valuation techniques for which the lowest level input that is significant to the fair value measurement is unobservable.

For assets and liabilities that are recognised in the financial statements on a recurring basis, the Bank determines whether transfers have occurred between levels in the hierarchy by re-assessing categorisation (based on the lowest level input that is significant to the fair value measurement as a whole) at the end of each reporting period.

3. Cash and Balances with Central Bank

	2018	2017
	\$'000	\$'000
Cash	1,243,188	1,063,796
Deposits with Central Bank – interest bearing	13,454,242	13,557,460
Deposits with Central Bank – non-interest bearing	5,178,805	4,368,602
	<u>19,876,235</u>	<u>18,989,858</u>
Interest receivable	6,269	5,168
	<u>19,882,504</u>	<u>18,995,026</u>

Under Section 43 of the Banking Services Act, 2014, the Bank is required to place deposits with the Bank of Jamaica (“Central Bank”) which are held substantially on a non-interest-bearing basis as a cash reserve; accordingly, these amounts are not available for investment or other use by the Bank. These reserves represent the required ratio of the Bank’s prescribed liabilities as follows:

	2018	2017
Jamaica dollar denominated cash reserves	12%	12%
Foreign currency denominated reserves	<u>15%</u>	<u>15%</u>

For the purposes of the statement of cash flows, cash and cash equivalents comprise the following:

	2018	2017
	\$'000	\$'000
Cash and balances with Central Bank	19,876,235	18,989,858
Less: Mandatory reserve deposits with Central Bank (Note 33)	<u>(10,594,963)</u>	<u>(8,873,056)</u>
	9,281,272	10,116,802
Due from other banks (Note 4)	<u>12,876,341</u>	<u>11,136,281</u>
	22,157,613	21,253,083
Less: Balances with maturity dates over 90 days	<u>(3,190,433)</u>	<u>(3,544,910)</u>
	<u>18,967,180</u>	<u>17,708,173</u>

4. Due From Other Banks

	2018	2017
	\$'000	\$'000
Money market placements (Note 3)	12,876,341	11,136,281
Interest receivable	<u>29,234</u>	<u>15,038</u>
	<u>12,905,575</u>	<u>11,151,319</u>

Included in money market placements are deposits with the ultimate parent company of \$515,780,000 (2017 – \$834,147,000) (Note 30).

7. Loans and Advances to Customers (Continued)

Ageing analysis of past due but not impaired loans is as follows:

As at 31 October 2018	Mortgages \$'000	Personal Loans \$'000	Business & Government \$'000	Total \$'000
Less than 30 days	24,480	94,988	462,060	581,528
31 – 60 days	324,615	185,767	209,100	719,482
61- 90 days	129,285	89,377	21,038	239,700
	<u>478,380</u>	<u>370,132</u>	<u>692,198</u>	<u>1,540,710</u>

As at 31 October 2017	Mortgages \$'000	Personal Loans \$'000	Business & Government \$'000	Total \$'000
Less than 30 days	31,878	134,596	102,339	268,813
31 – 60 days	277,920	133,711	188,106	599,737
61- 90 days	140,162	67,804	15,812	223,778
	<u>449,960</u>	<u>336,111</u>	<u>306,257</u>	<u>1,092,328</u>

ECL allowances comprise:-

	2018 \$'000	2017 \$'000
Specific allowance	481,274	65,947
General allowance	<u>411,648</u>	<u>638,483</u>
	<u>892,922</u>	<u>704,430</u>

As at 31 October 2018, loans with principal balances outstanding of \$659,309,000 (2017 - \$718,010,000) were in non-performing status. Interest receivable on these loans amounted to \$101,221,000 (2017 - \$123,742,000). Interest taken to income in respect of these loans amounted to \$41,805,000 (2017 - \$126,643,000).

The provision for credit losses determined under the Bank of Jamaica regulatory requirements is as follows:

	2018 \$'000	2017 \$'000
Specific provision	552,697	466,292
General provision	<u>494,892</u>	<u>638,483</u>
	<u>1,047,589</u>	<u>1,104,775</u>
Excess of regulatory provision over IFRS provision reflected in non-distributable loan loss reserve (Note 19)	<u>154,667</u>	<u>400,345</u>

Net book value					
31 October 2017	55,000	166,253	147,364	1,134,768	1,503,385

Included in the table above are amounts totaling \$14,430,000 (2017 – \$14,430,000) representing the revalued amount of land and buildings which has been used as the deemed cost of these assets under the provision of IFRS 1 on transition to IFRS on 1 November 2002. Subsequent additions and other property and equipment are shown at cost. Equipment, furniture and vehicles include \$147,298,000 (2017 - \$238,050,000) relating to work-in-progress on which no depreciation has been charged.

Notes to the Financial Statements

Year ended 31 October 2018

(Expressed in Jamaican dollars unless otherwise indicated)

9. Deferred Income Taxes

Deferred income taxes are calculated on all temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for taxation purposes using the statutory tax rate of 33 $\frac{1}{3}$ % (2017 - 33 $\frac{1}{3}$ %).

Deferred income tax assets and liabilities are offset when there is a legally enforceable right to set off current tax assets against current tax liabilities.

The movement in the deferred income tax account was as follows:

	2018	2017
	\$'000	\$'000
Balance as at 1 November	407,715	399,307
(Charge)/Credit to the statement of income (Note 27)	(243,920)	92,381
Prior year adjustment - impact of IFRS 9 adoption (Note 27)	66,803	-
Charge to other comprehensive income (Note 29)	<u>(250,851)</u>	<u>(83,973)</u>
Balance as at 31 October	<u>(20,253)</u>	<u>407,715</u>

Deferred income tax assets and liabilities were attributable to the following items:

	2018	2017
	\$'000	\$'000
Deferred tax assets:		
Accelerated tax depreciation	-	40
Expected credit loss allowances	225,602	212,828
Post-retirement medical and insurance benefits	28,880	25,242
Unearned fees	171,542	148,140
Foreign exchange revaluation losses	3,052	36,915
Other provisions	15,887	16,839
Tax losses carried forward	<u>98,326</u>	<u>218,683</u>
	<u>543,289</u>	<u>658,687</u>
Deferred tax liabilities:		
Accelerated tax depreciation	18,116	-
Retirement benefit asset	508,146	243,114
Available for sale investments	-	7,829
Debt securities at FVOCI	37,280	-
Other provisions	<u>-</u>	<u>29</u>
	<u>563,542</u>	<u>250,972</u>
Net deferred tax (liability)/asset	<u>(20,253)</u>	<u>407,715</u>

FirstCaribbean International Bank (Jamaica) Limited

Notes to the Financial Statements

Year ended 31 October 2018

(Expressed in Jamaican dollars unless otherwise indicated)

9. Deferred Income Taxes (Continued)

Deferred income taxes are recognized on tax losses carried forward only to the extent that realization of the related tax benefit is probable.

The Bank has tax losses, subject to agreement with the Commissioner General of Tax Administration Jamaica, amounting to \$294,978,000 (2017 - \$656,050,000). If unutilized, these tax losses can be carried forward indefinitely, however, the amount that can be utilized is restricted to 50% of chargeable income (before prior year losses) in any one year.

10. Retirement Benefit Asset (Obligation)

Plan Characteristics, funding and risks

The Bank operates a pension scheme covering all permanent employees. The pension benefit is based on the average of the best five consecutive years' earnings in the last ten years, multiplied by the years of credited service. The assets of the plan are held independently of the Bank's assets in a separate trustee fund. The scheme is valued by independent actuaries annually using the Projected Unit Credit Method. The latest actuarial valuation for IFRS purposes was carried out as at 31 October 2018.

Benefit changes

There were no material changes to the terms of the defined benefit pension or post-retirement medical benefit plans in 2018 or 2017.

Risks

The defined benefit pension and post-retirement medical benefit plans expose the Bank to actuarial risks, such as longevity risk, currency risk, interest rate risk, market (investment risks) and health care cost inflation risks arising in the relevant sectors.

Plan Governance

The Bank is responsible for the establishment of the plan and has oversight of its management and administration. The Bank's Board of Directors has delegated powers and authorities to a Pension Steering Committee ("PSC") and an Investment Sub-Committee ("ISC") as advisory sub-committees and delegated to each of them certain of its responsibilities in connection with the management and administration of the plan and the investment of plan assets. These are set out in the documented mandates for these committees. The day to day oversight of the management and administration of the plan is the responsibility of the Board of Trustees who ensures the plan is operated in accordance with the Trust Deed and Rules and local legislation and that all benefits are calculated and paid in accordance with the plan Rules. The Trustees have appointed an Investment Manager who holds the funds on behalf of the Trustees and invests the plan assets as directed by the Trustees. The PSC and ISC provide support and guidance to the Board of Trustees on matters such as investment strategy, risk management, funding and administration. The Trustees set the contribution rates, in consultation with the PSC, based on the results of the triennial actuarial funding valuation. The last actuarial valuation to determine the adequacy of funding done as at 31 October 2015 revealed that the scheme was adequately funded at that date. The investment strategy for the plan, as set out in the Statement of Investment Objectives, Policies and Procedures, is reviewed annually the Trustees in consultation with the ISC. The current plan assets include investments in locally quoted equities, bonds and real estate.

Notes to the Financial Statements

Year ended 31 October 2018

(Expressed in Jamaican dollars unless otherwise indicated)

10. Retirement Benefit Asset (Obligation) (Continued)

(a) Defined benefit pension scheme (continued)

Changes in the fair value of plan asset are as follows:

	2018 \$'000	2017 \$'000
Fair value of plan asset at start of year	4,487,954	4,110,997
Asset transferred out of the plan	(99,885)	(86,739)
Actual return on plan asset	1,012,669	597,694
Contributions	50	50
Benefits paid during year	(101,211)	(111,700)
Administration and other non-plan investment management expenses	(21,028)	(22,348)
Fair value of plan asset at end of year	<u>5,278,549</u>	<u>4,487,954</u>

Changes in the present value of obligation are as follows:

	2018 \$'000	2017 \$'000
Present value of obligation at start of year	3,758,612	3,474,715
Interest cost	333,721	307,698
Current service cost	107,272	98,511
Benefits paid during year	(101,211)	(111,700)
Actuarial gain on plan obligation	(344,283)	(10,612)
Present value of obligation at end of year	<u>3,754,111</u>	<u>3,758,612</u>

The Bank expects to contribute \$50,000 (2017 - \$50,000) to its defined benefit pension plan in the next year.

Notes to the Financial Statements

Year ended 31 October 2018

(Expressed in Jamaican dollars unless otherwise indicated)

10. Retirement Benefit Asset (Obligation) (Continued)

(a) Defined benefit pension scheme (continued)

The net remeasurement gains recognized in statement of other comprehensive income were as follows:

	2018 \$'000	2017 \$'000
Actuarial gains/(losses) on defined benefit obligation arising from:		
- Financial assumptions	319,014	76,293
- Experience adjustments	25,269	(65,681)
Return on plan assets excluding interest income	617,860	232,728
	<u>962,143</u>	<u>243,340</u>
Net remeasurement gains recognized in OCI	<u>962,143</u>	<u>243,340</u>

The breakdown of the net obligations between active members and inactive and retired members is as follows:

	2018 \$'000	2017 \$'000
Active members	2,431,088	2,462,225
Inactive and retired members	1,323,023	1,296,387
	<u>3,754,111</u>	<u>3,758,612</u>

The average duration of the net asset/(obligations) at the end of the reporting period is as follows:

	2018	2017
Average duration, in years	<u>18</u>	<u>19</u>

The major categories of plan assets as a percentage of the fair value of total plan assets were as follows:

	2018 %	2017 %
Quoted equity instruments:		
Local	20	17
International	1	1
Quoted debt instruments:		
Government bonds	31	32
Corporate bonds	7	7
Real estate	23	26
Other assets	18	17
	<u>100</u>	<u>100</u>

Notes to the Financial Statements
Year ended 31 October 2018
(Expressed in Jamaican dollars unless otherwise indicated)

10. Retirement Benefit Asset (Obligation) (Continued)

(a) Defined benefit pension scheme (continued)

The principal actuarial assumptions used were as follows:

	2018	2017
	%	%
Discount rate	7.50	9.00
Future salary increases	5.50	7.50
Future pension increases	3.25	4.75

Defined benefit pension plan amounts for the current and previous four years were as follows:

	2018	2017	2016	2015	2014
	\$'000	\$'000	\$'000	\$'000	\$'000
Fair value of plan assets	5,278,549	4,487,954	4,110,997	3,606,573	3,332,615
Present value of obligation	(3,754,111)	(3,758,612)	(3,474,715)	(2,962,087)	(2,668,245)
	<u>1,524,438</u>	<u>729,342</u>	<u>636,282</u>	<u>644,486</u>	<u>664,370</u>

A quantitative sensitivity analysis for significant assumptions as at 31 October 2018 is shown below:

Assumption	Sensitivity level	Impact on net defined benefit pension plans	
		Increase	Decrease
		\$'000	\$'000
Discount rate	1.00%	3,166,375	4,507,499
Future salary increases	0.50%	3,867,334	3,647,260
Future pension increases	0.50%	3,977,054	3,550,073
Existing retiree age	1 year	3,860,909	N/A

FirstCaribbean International Bank (Jamaica) Limited

Notes to the Financial Statements

Year ended 31 October 2018

(Expressed in Jamaican dollars unless otherwise indicated)

10. Retirement Benefit Asset (Obligation) (Continued)

(a) Defined benefit pension scheme (continued)

A quantitative sensitivity analysis for significant assumptions as at 31 October 2017 is shown below:

Assumption	Sensitivity level	Impact on net defined benefit pension plans	
		Increase	Decrease
		\$'000	\$'000
Discount rate	1.00%	3,149,456	4,543,600
Future salary increases	0.50%	3,882,123	3,642,309
Future pension increases	0.50%	3,980,111	3,555,726
Existing retiree age	1 year	3,973,107	N/A

The sensitivity analyses above have been determined based on a method that extrapolates the impact on net defined benefit obligation as a result of reasonable changes in key assumptions occurring at the end of the reporting period.

The following payments are expected benefit payments to be made in future years out of the defined benefit plan:

	2018	2017
	\$'000	\$'000
Within the next 12 months	84,870	71,623
Between 1 and 5 years	458,160	409,723
Between 5 and 10 years	968,350	966,372
Total expected payment	<u>1,511,380</u>	<u>1,447,718</u>

FirstCaribbean International Bank (Jamaica) Limited

Notes to the Financial Statements

Year ended 31 October 2018

(Expressed in Jamaican dollars unless otherwise indicated)

10. Retirement Benefit Asset (Obligation) (Continued)

(b) Post-retirement medical benefits

In addition to pension benefits, the Bank offers medical benefits that contribute to the health care and life insurance coverage of employees and beneficiaries after retirement. The method of accounting and frequency of valuations are similar to those used for the defined benefit pension scheme.

In addition to the assumptions used for the pension scheme, the main actuarial assumption is a long-term increase in health costs of 6% per year (2017: 6% - 7%).

A quantitative sensitivity analysis for significant assumptions as at 31 October 2018 is as shown below:

Assumption	Sensitivity level	Impact on post-retirement medical benefits	
		Increase \$'000	Decrease \$'000
Discount rate	1.00%	79,545	95,999
Medical premium inflation	1.00%	95,935	79,470
Existing retiree age	1 year	90,477	N/A

A quantitative sensitivity analysis for significant assumptions as at 31 October 2017 is as shown below:

Assumption	Sensitivity level	Impact on post-retirement medical benefits	
		Increase \$'000	Decrease \$'000
Discount rate	1.00%	69,632	82,808
Medical premium inflation	1.00%	82,850	69,503
Existing retiree age	1 year	78,217	N/A
		2018 \$'000	2017 \$'000
Present value of unfunded obligations and liability in the statement of financial position		86,641	75,727

FirstCaribbean International Bank (Jamaica) Limited

Notes to the Financial Statements
Year ended 31 October 2018
(Expressed in Jamaican dollars unless otherwise indicated)

10. Retirement Benefit Asset/(Obligation) (Continued)

(b) Post-retirement medical benefits (continued)

The following payments are expected benefit payments to be made in future years out of the benefit plan:

	2018	2017
	\$'000	\$'000
Within the next 12 months	5,940	5,891
Between 1 and 5 years	27,530	27,502
Between 5 and 10 years	36,560	35,662
Total expected payment	<u>70,030</u>	<u>69,055</u>
	2018	2017
	\$'000	\$'000
Obligation at beginning of year	75,727	82,939
Charge for the year (Note 25)	6,697	7,341
Employer contributions	(3,110)	(3,040)
Effect of statement of other comprehensive income (Note 29)	7,327	(11,513)
Obligation at end of year	<u>86,641</u>	<u>75,727</u>

The amounts recognised in the statement of income are as follows:

	2018	2017
	\$'000	\$'000
Interest cost	6,697	7,341
Total included in staff costs (Note 25)	<u>6,697</u>	<u>7,341</u>

The net re-measurement (losses)/gains recognized in the statement of other comprehensive income was as follows:

	2018	2017
	\$'000	\$'000
Actuarial (losses)/gains on defined benefit obligation arising from:		
- Financial adjustments	(10,280)	(3,215)
- Experience adjustments	2,953	14,728
Net re-measurement (losses)/gains recognized in OCI	<u>(7,327)</u>	<u>11,513</u>

(Expressed in Jamaican dollars unless otherwise indicated)

14. Share Capital and Reserves (Continued)

At an Extra-Ordinary General Meeting of the Bank, held on 6 April 2017, a resolution was passed approving the purchase and subsequent cancellation of 264 million of "A Ordinary Shares" for a total consideration of US\$35 million. After meeting all regulatory and other requirements, the return of capital to the Parent was completed in October 2017. The consideration was paid in United States dollars. (Note 21).

It is expected that the Bank will continue to be adequately capitalized to meet its growth needs as well as satisfy its supervisory capital requirements.

Objectives, policies and procedures

Capital strength provides protection for depositors and creditors, allows the Bank to undertake profitable business opportunities as they arise and helps maintain favourable credit ratings.

The Bank's objective is to employ a strong and efficient capital base. It manages capital in accordance with policies established by the Board. These policies relate to capital strength, capital mix, dividends and return of capital, and the capital adequacy requirements applicable to a regulated entity. Each policy has associated guidelines, and capital is monitored continuously for compliance.

There were no significant changes made in the objectives, policies and procedures during the year.

Regulatory requirements

The Bank's regulatory capital requirements are determined in accordance with the Banking Services Act, 2014, and Regulations issued thereunder, primarily, The Banking Services (Deposit Taking Institutions) (Capital Adequacy) Regulations, 2015. Capital adequacy is measured by the ratio of regulatory capital to risk-weighted assets.

Regulatory capital consists of Tier 1 capital plus Tier 2 capital, less certain prescribed deductions.

- Tier 1 capital is comprised substantially of ordinary shares or stock, non-redeemable non-cumulative preference shares, plus certain eligible reserves, less: aggregate net losses as defined; goodwill, start-up expenses and other intangible assets; and any other designated deductions.
- Tier 2 capital principally comprises hybrid capital instruments (such as non-redeemable cumulative preference shares and qualifying redeemable preference shares having an original term to maturity of five years or more), and general provisions (subject to certain limitations).
- A deduction from Tier 1 and 2 Capital is required for certain prescribed items such as investments in, and share of accumulated losses in unconsolidated subsidiaries.

Risk-weighted assets is the sum of on-balance sheet assets, off-balance sheets assets (contingent accounts), and foreign currency positions.

- On-balance sheet assets are classified in one of four broad risk-weighting categories. Classification is dependent on the Regulator's assessment of the nature of the counter-party or where applicable, the guarantor or the collateral.
- Off-balance sheet assets (contingent accounts) are first assigned a credit conversion factor to determine an on-balance sheet credit equivalent amount, which is then risk weighted in a manner similar to on-balance sheet assets.

A capital charge is assessed for foreign currency risk, being the higher of aggregated long/short foreign currency positions.

FirstCaribbean International Bank (Jamaica) Limited

Notes to the Financial Statements

Year ended 31 October 2018

(Expressed in Jamaican dollars unless otherwise indicated)

14. Share Capital and Reserves (Continued)

Objectives, policies and procedures (Continued)

Global capital standards require that banks maintain minimum Tier 1 and Capital Adequacy Ratio of 4% and 8%, respectively. Under the Banking Services Act, 2014, Jamaican deposit-taking financial institutions are required to maintain a minimum capital adequacy ratio of 10% and Tier 1 capital should be not less than 50% of regulatory capital. During the year, the Bank complied in full with all of its regulatory capital requirements, as follows:

Tier 1 and Total Capital ratios were 13.84% and 13.84%, respectively (2017: 15.57% and 15.57%).

Reserves

	2018	2017

Realised –		
Profit on sale of property and equipment	7,340	7,340
Balance at end of year	<u>12,833</u>	<u>12,833</u>

16. Retirement Benefit Reserve

	2018	2017
	\$'000	\$'000
Balance at beginning of year	152,681	(17,221)
Re-measurement gains on retirement benefit plans during the year (Note 29)	636,544	169,902
Balance at end of year	<u>789,225</u>	<u>152,681</u>

Gains and losses arising from re-measurement of retirement benefit plans in other comprehensive income are reflected in this reserve.

FirstCaribbean International Bank (Jamaica) Limited

Notes to the Financial Statements

Year ended 31 October 2018

(Expressed in Jamaican dollars unless otherwise indicated)

17. Statutory Reserve Fund

	2018 \$'000	2017 \$'000
Balance at beginning of the year	2,646,667	2,576,667
Transfer from retained earnings	<u>20,000</u>	<u>70,000</u>
Balance at end of the year	<u><u>2,666,667</u></u>	<u><u>2,646,667</u></u>

The fund is maintained in accordance with the Banking Services Act, 2014. The Bank is required to make transfers of a minimum of 15% of net profit until the amount in the fund is equal to 50% of the paid-up capital of the Bank and thereafter 10% of the net profits until the reserve fund is not less than paid up share capital. On 20 December 2018 the Board of Directors approved the transfer of \$90,000,000 (2017: \$20,000,000) from retained earnings to the statutory reserve fund effective 31 January 2019. The transfer will be done based on the net profits for the year ended 31 October 2018.

18. Retained Earnings Reserve

	2018 \$'000	2017 \$'000
Balance at beginning of the year	2,616,163	2,616,163
Transfer from other share capital reserve (Note 21)	<u>(910,000)</u>	<u>-</u>
Balance at end of year	<u><u>1,706,163</u></u>	<u><u>2,616,163</u></u>

Section 42(1) of the Banking Services Act, 2014, permits the transfer of any portion of net profit to a retained earnings reserve. This reserve constitutes a part of the capital base for the purpose of determining the maximum level of deposit liabilities and lending to customers.

Transfers to the retained earnings reserve are made at the discretion of the Board; such transfers must be reported to the Bank of Jamaica.

During the year, the Bank sought and received supervisory non-objection to the transfer of \$910,000,000 from the Retained Earning Reserve to cover the deficit on the Other Share Capital Reserve.

19. Loan Loss Reserve

	2018 \$'000	2017 \$'000
Balance at beginning of year	400,345	743,030
Transfer to retained earnings	<u>(245,678)</u>	<u>(342,685)</u>
Balance at end of the year	<u><u>154,667</u></u>	<u><u>400,345</u></u>

This is a non-distributable reserve representing the excess of the provision for loan losses determined using the Bank of Jamaica's regulatory requirements over the amount determined under IFRS (Note 7).

FirstCaribbean International Bank (Jamaica) Limited

Notes to the Financial Statements
Year ended 31 October 2018
(Expressed in Jamaican dollars unless otherwise indicated)

20. General Reserve

	2018 \$'000	2017 \$'000
Balance at beginning and end of the year	45,522	45,522

This represents a transfer by the former subsidiary, FirstCaribbean International Building Society, on amalgamation for amounts transferred from retained earnings to a general reserve on a tax free basis.

21. Other Share Capital Reserve

	2018 \$'000	2017 \$'000
Balance at beginning of year	(910,000)	-
Foreign exchange loss on return of capital recognized in equity	-	(910,000)
Transfer from retained earnings reserve (Note 18)	910,000	-
Balance at end of the year	-	(910,000)

The 'A' ordinary shares were denominated in United States Dollars when issued. The rate of exchange used to record the US\$70 million capital injection on 29 August 2013 was J\$101/US\$1, and equity is not set to revalue with changes in exchange rates. The rate of exchange on 26 October 2017 used to retranslate the 264,000,000 'A' ordinary shares that were repurchased and cancelled, was J\$127/US\$1. The effect of the change in the exchange rate from J\$101 to J\$127 was, therefore, recognized directly in equity in accordance with IFRS (Note 14). During the year, the Bank sought and received supervisory non-objection to the transfer of \$910,000,000 from the Retained Earning Reserve to cover the deficit on the Other Share Capital Reserve.

22. Fair Value Reserves

(a) Available-for-sale-securities:

	2018 \$'000	2017 \$'000
Balance at beginning of year	15,659	17,615
Net losses on available-for-sale securities during the year (Note 29)	-	(1,956)
Reclassification to debt securities measured at FVOCI	(15,659)	-
Balance at end of the year	-	15,659

(b) Debt instruments at fair value through OCI:

	2018 \$'000	2017 \$'000
Balance at beginning of year on adopting IFRS 9	-	-
Reclassification from available-for-sale securities	15,659	-
Recognition of expected credit losses under IFRS 9 (Note 2(b)(i))	193,744	-
Opening balance restated under IFRS9 [Note 2(b)(i)]	209,403	-
Net losses on debt securities measured at FVOCI during the year (Note 29)	(134,843)	-
Balance at end of the year	74,560	-

FirstCaribbean International Bank (Jamaica) Limited

Notes to the Financial Statements

(Expressed in Jamaican dollars unless otherwise indicated)

23. Net Interest Income

	2018 \$'000	2017 \$'000
Interest and similar income:		
Cash and balances due from banks	468,095	324,006
Investment securities	218,115	329,446
Loans and advances	4,700,663	4,337,906
	<u>5,386,873</u>	<u>4,991,358</u>
Interest and similar expense:		
Customer deposits	(1,333,018)	(1,226,943)
Debt securities in issue	(207,473)	(376,679)
Other	-	(765)
	<u>(1,540,491)</u>	<u>(1,604,387)</u>
Net interest income	<u>3,846,382</u>	<u>3,386,971</u>

24. Other Operating Income

	2018 \$'000	2017 \$'000
Net fees and commissions	995,692	938,324
Foreign exchange transactional net gains	1,129,722	638,453
Foreign exchange revaluation net losses	(9,156)	(110,751)
Securities net losses	(6,421)	(9,831)
Other operating income	98,504	76,963
	<u>2,208,341</u>	<u>1,533,158</u>

Foreign exchange transactional net gains include gains and losses arising from foreign currency trading activities.

FirstCaribbean International Bank (Jamaica) Limited

Notes to the Financial Statements

Year ended 31 October 2018

(Expressed in Jamaican dollars unless otherwise indicated)

25. Operating Expenses

	2018	2017
	\$'000	\$'000
Staff costs	1,516,554	1,384,060
Depreciation	350,819	306,389
Occupancy costs	422,374	392,609
Other operating expenses	<u>2,605,343</u>	<u>2,462,560</u>
	<u>4,895,090</u>	<u>4,545,618</u>

Analysis of staff costs:

	2018	2017
	\$'000	\$'000
Wages and salaries	1,032,632	950,161
Pension costs –		
Defined benefit plan (Note 10)	67,212	63,591
Defined contribution plan	46,693	40,520
Other post retirement benefits (Note 10)	6,697	7,341
Other share and cash-based benefits (Note 37)	9,622	7,295
Severance	14,025	-
Other staff-related costs	<u>339,673</u>	<u>315,152</u>
	<u>1,516,554</u>	<u>1,384,060</u>

26. Profit Before Taxation

Profit before taxation is stated after charging:

	2018	2017
	\$'000	\$'000
Depreciation	350,819	306,389
Directors' emoluments-		
Fees	9,575	9,625
Management remuneration	48,351	43,170
Management fees (Note 30)	770,478	821,141
Auditor's remuneration	<u>14,094</u>	<u>14,347</u>

FirstCaribbean International Bank (Jamaica) Limited

Notes to the Financial Statements
Year ended 31 October 2018
(Expressed in Jamaican dollars unless otherwise indicated)

27. Income Tax Expense

(a) The taxation expense is based on the profit for the year adjusted for taxation purposes and comprises:

	2018 \$'000	2017 \$'000
Current year income tax	112,900	160,081
Prior year under accrual	29	3
Tax on income at source	3,901	2,024
	116,830	162,108
Deferred tax charge/(credit) (Note 9)	243,920	(92,381)
	<u>360,750</u>	<u>69,727</u>

Income tax is calculated at the rate of 33 $\frac{1}{3}$ %.

(b) Tax on the Bank's income before tax differs from the theoretical amount that would arise using the statutory tax rate for the Bank as follows:

	2018 \$'000	2017 \$'000
Profit before taxation	<u>1,232,988</u>	<u>181,007</u>
Tax calculated at 33 $\frac{1}{3}$ %	410,996	60,336
Effect of :		
Income not subject to tax	(50,605)	(54,274)
Expenses not deductible for tax	70,719	61,643
Dividend income tax at 15%	(3,527)	-
Prior year under accrual on corporation tax liability	29	3
Prior year adjustment for impact of IFRS 9 adoption (Note 9)	(66,803)	-
Other charges and allowances	(59)	2,019
	<u>360,750</u>	<u>69,727</u>

28. Earnings Per Stock Unit

Earnings per ordinary stock unit for the Bank is calculated by dividing the net profit for the year by the weighted average number of ordinary stock units in issue:

	2018	2017
Net profit for the year (\$'000)	<u>872,238</u>	<u>111,280</u>
Weighted average number of ordinary stock units in issue ('000)	<u>529,757</u>	<u>790,140</u>
Earnings per stock unit (\$)	<u>1.65</u>	<u>0.14</u>

FirstCaribbean International Bank (Jamaica) Limited

Notes to the Financial Statements
Year ended 31 October 2018
(Expressed in Jamaican dollars unless otherwise indicated)

29. Components of Other Comprehensive Income

	2018 \$'000	2017 \$'000
Available-for-sale investment securities:		
Gains/(losses) arising during the year (Note 6)	-	(2,934)
Less: Deferred tax	-	978
Other comprehensive losses for the year (Note 22(a))	<u>-</u>	<u>(1,956)</u>
Debt instruments at fair value through OCI:		
Losses arising during the year	(202,264)	-
Less: Deferred tax	67,421	-
Other comprehensive losses for the year (Note 22(b))	<u>(134,843)</u>	<u>-</u>
Re-measurement on retirement benefit plans:		
Gains arising during the year	954,816	254,853
Less: Deferred tax	(318,272)	(84,951)
Other comprehensive gains for the year (Note 16)	<u>636,544</u>	<u>169,902</u>
Total other comprehensive gains for the year, net of tax	<u>501,701</u>	<u>167,946</u>

30. Related Party Transactions

In the ordinary course of business, the Bank provides to its connected persons normal banking services on terms similar to those offered to persons not connected to the Bank.

(a) Transactions and balances with FirstCaribbean entities and their associates

	2018 \$'000	2017 \$'000
The Parent, FirstCaribbean International Bank Limited:		
Net receivable	195,193	23,862
Management fee expense (Note 26)	770,478	821,141
Affiliates, other FirstCaribbean entities:		
Interest income	106,986	102,598
Interest expense	366,872	354,504
Net receivable	13,797	9,350
Deposits by other FirstCaribbean entities	10,117,122	11,229,749
Money market placements	6,329,001	4,135,660
The ultimate parent, CIBC:		
Interest income	1,080	12,487
Customer deposits	11,810	12,635
Money market placements (Note 4)	515,780	834,147
Loans and advances to customers	<u>95</u>	<u>95</u>

FirstCaribbean International Bank (Jamaica) Limited

Notes to the Financial Statements

Year ended 31 October 2018

(Expressed in Jamaican dollars unless otherwise indicated)

30. Related Party Transactions (Continued)

(b) Transactions and balances with directors

	2018 \$'000	2017 \$'000
Loans outstanding	19,196	22,201
Deposits	35,263	32,228
Interest income	928	800
Interest expense	73	1,118
Directors' fees	9,575	9,625
Post retirement benefits	5,426	4,846
Management remuneration paid (included below)	48,351	43,170

(c) Key management remuneration paid during the year

	2018 \$'000	2017 \$'000
Wages and salaries	98,056	92,079
Statutory contributions	9,573	9,086
Post retirement benefits	12,850	11,304
	<u>120,479</u>	<u>112,469</u>

31. Commitments

(a) Future rental commitments under operating leases

At 31 October 2018, the Bank held leases on buildings for extended periods. The future rental commitments under these leases were as follows:

	2018 \$'000	2017 \$'000
Not later than 1 year	298,985	276,483
Later than 1 year and less than 5 years	859,256	796,037
Later than 5 years	45,702	30,605
	<u>1,203,943</u>	<u>1,103,125</u>

During the year, \$286,614,000 (2017 - \$277,979,000) of lease payments was charged to net income.

(b) Other

The following table indicates the contractual amounts of financial instruments not presented in the statement of financial position that commit the Bank to extend credit to customers:

	2018 \$'000	2017 \$'000
Guarantees and indemnities	1,444,894	1,476,946
Letters of credit	3,136,468	3,014,268
Loan commitments	13,305,893	9,319,245
	<u>17,887,255</u>	<u>13,810,459</u>

FirstCaribbean International Bank (Jamaica) Limited

Notes to the Financial Statements

Year ended 31 October 2018

(Expressed in Jamaican dollars unless otherwise indicated)

32. Contingencies

The Bank, because of the nature of its business, is subject to various threatened or filed legal actions. At 31 October 2018 material claims filed amounted to approximately \$2,090,855,000 (2017 - \$2,136,943,000). The majority of this amount relates to a specific counter claim of approximately \$2,002,923,000 (2017 - \$2,002,734,000), filed by a former customer against the Bank. Another counter claim was brought against the former customer by the Bank for approximately \$605,362,000 (2017 - \$600,614,000). Although the amount of the ultimate exposure, if any, cannot be determined at this time, the Directors are of the opinion, based upon the advice of Counsel, that the final outcome of threatened or filed suits will not have a material adverse effect on the financial position of the Bank.

33. Pledged Assets

Mandatory reserve deposits are held at the Bank of Jamaica in accordance with statutory requirements. These deposits are not available to finance the Bank's day to day operations. Additionally, assets are pledged as collateral to third parties.

	2018	2017
	\$'000	\$'000
Cash and balances with Central Bank		
Statutory reserves at Bank of Jamaica (Note 3)	10,594,963	8,873,056
Investment securities – bonds & debentures:		
Pledged as collateral for clearing services	166,324	155,858
	<u>10,761,287</u>	<u>9,028,914</u>

FirstCaribbean International Bank (Jamaica) Limited

Notes to the Financial Statements

Year ended 31 October 2018

(Expressed in Jamaican dollars unless otherwise indicated)

34. Business Segments

The Bank's operations are organised into two business segments, Retail, Business Banking (RBB); and Corporate and Investment Banking (CIB) which are supported by the functional units within the Administration (Admin) segment (which includes Finance, Human Resources, Technology and Operations, Treasury, Risk and Other). The Administration segment results include credits or capital charges for Treasury market-based cost of funds on assets, liabilities and capital; the offset of the same for RBB and CIB earnings unattributed capital remains in Administration.

Retail and Business Banking

This line of business provides a full range of financial products and services to individuals and small businesses. Clients can access the Bank's services and products through its network of branches as well as, use the convenience of ABMs, Internet Banking and Telephone Banking as well as Cards Issuing and Card Merchant Acquiring services.

Corporate and Investment Banking

This line of business comprises three sub-segments: Corporate Banking, Investment Banking and Forex & Derivatives Sales.

Corporate Banking provides a full range of corporate and commercial banking services, including Cards Merchant Acquiring business, to large and mid-size corporate businesses, governments, financial institutions, international trading companies and private wealth vehicles throughout Jamaica. Investment Banking provides debt and equity capital markets and corporate finance products and services to large corporations, financial institutions and governments. Forex & Derivatives Sales deals with transactions relating to financial instruments (derivatives) and foreign exchange.

Management monitors the operating results of its business segments separately for the purpose of making decisions about resource allocation and performance assessment.

Transfer prices between operating segments are on an arm's length basis in a manner similar to transactions with third parties. The Bank reviews its transfer pricing methodologies on an ongoing basis to ensure they reflect changing market environments and industry practices.

Income taxes are managed on a Bank basis. Transactions between the business segments are on normal commercial terms and conditions.

Segment assets and liabilities comprise operating assets and liabilities, being the majority of the statement of financial position, but exclude items such as taxation and intangible assets. Securities and cash placements are normally held within the Treasury unit within the Administration segment.

There were no changes made to business performance measurement during the year.

The Bank's operations are located solely in Jamaica.

(Expressed in Jamaican dollars unless otherwise indicated)

35. Financial Risk Management

(a) Strategy in using financial instruments

Risk is inherent in the Bank's activities, but is managed through a process of ongoing identification, measurement and monitoring, subject to risk limits and other controls. This process of risk management is critical to the Bank's continuing profitability and each individual within the Bank is accountable for the risk exposures relating to his or her responsibilities. The Bank is exposed to credit risk, liquidity risk, market risk, and operating risk.

By its nature, the Bank's activities are principally related to the use of financial instruments. The Bank accepts deposits from customers at both fixed and floating rates and for various periods and seeks to earn above average interest margins by investing these funds in high quality assets. The Bank seeks to increase these margins by consolidating short-term funds and lending for longer periods at higher rates whilst maintaining sufficient liquidity to meet all claims that might fall due.

The Bank also seeks to raise its interest margins by obtaining above average margins, net of provisions, through lending to commercial and retail borrowers with a range of credit standing. Such exposures involve not just loans and advances which are disclosed on the statement of financial position, but the Bank also enters into guarantees and other commitments such as letters of credit and performance and other bonds.

(b) Credit risk

Credit risk primarily arises from direct lending activities, as well as from trading, investment and hedging activities. Credit risk is defined as the risk of financial loss due to a borrower or counter party failing to meet its obligations in accordance with agreed terms.

Process and Control

The Risk Management Team is responsible for the provision of the Bank's adjudication, oversight and management of credit risk within its portfolios. The Credit Executive Committee (CrExCo) has responsibility for monitoring credit metrics, providing direction on credit issues and making recommendations on credit policy.

The Risk Management Team is guided by the Bank's Delegation of Authority policy which is based on the levels of exposure and risk. Credits above the discretion delegated to certain front line employees are approved by Risk Management and where applicable by the Credit Committee and the Finance Risk & Conduct Review Committee of the Board (FRCRC). The FRCRC also has the responsibility for approving credit policies and key risk limits including portfolio limits, which are reviewed annually.

(b) Credit risk (continued)

Credit Risk Limits

Credit risk limits are established for all loans (mortgages, personal, business & sovereign) for the purposes of diversification and managing concentration. Limits are also established for individual borrowers, groups of related borrowers, industry sectors, individual countries and geographic regions and also for products and portfolios. Such risks are monitored on a revolving basis and the limits are subject to an annual or more frequent review.

The exposure to any one counterparty including banks and brokers is further restricted by sub-limits, which include exposures not recognised in the statement of financial position, and daily delivery risk limits in relation to trading items such as forward foreign exchange contracts. Actual exposures against limits are monitored daily.

Exposure to credit risk is managed through regular analysis of the ability of borrowers and potential borrowers to meet interest and capital repayment obligations and by changing these lending limits where appropriate. Exposure to credit risk is also managed in part by obtaining collateral including corporate and personal guarantees.

Collateral

The Bank employs a range of policies and practices to mitigate credit risk. The most traditional of these is the taking of security for funds advanced, which is common practice. The Bank implements guidelines on the acceptability of specific classes of collateral or credit risk mitigation. The principal collateral types for loans and advances to customers are:

- Mortgages over residential properties;
- Charges over business assets such as premises, inventory and accounts receivable;
- Charges over financial instruments such as debt securities and equities.

The Bank's credit risk management policies include requirements relating to collateral valuation and management, including verification requirements and legal certainty. Valuations are updated periodically depending upon the nature of the collateral. Management monitors the market value of collateral, requests additional collateral in accordance with the underlying agreement during its periodic review of loan accounts in arrears. Policies are in place to monitor the existence of undesirable concentration in the collateral supporting the Bank's credit exposure.

As at 31 October 2018, 67% of stage 3 impaired loans were either fully or partially collateralized.

Total	55,108,139	17,887,255	72,995,394	51,156,906	13,810,459	64,967,365
ECL allowances			(892,922)			(704,430)
			<u>72,102,472</u>			<u>64,262,935</u>

Impaired Financial Assets and ECL Allowances

The Bank takes on exposure to credit risk, which is the risk that a counter party will be unable to pay amounts in full when due. The Bank structures the levels of credit risk it undertakes by placing limits on the amount of risk accepted in relation to one counterparty, borrower, or groups of borrowers, and to industry segments. Such risks are monitored on a revolving basis and subject to an annual or more frequent review.

The exposure to any one counterparty, including banks and brokers, is further restricted by sub-limits, which include exposures not recognised in the statement of financial position. Actual exposures against limits are monitored daily.

Exposure to credit risk is managed through regular analysis of the ability of borrowers and potential borrowers to meet interest and capital repayment obligations and by changing these lending limits where appropriate. Exposure to credit risk is also managed in part by obtaining collateral including corporate and personal guarantees.

Impairment assessment (Policy applicable for November 1, 2017)

The references below show where the Bank's impairment assessment and measurement approach is set out in this report. This section should be read in conjunction with the Summary of significant accounting policies (Note 2).

Definition of default and cure

The Bank considers a financial instrument defaulted and therefore Stage 3 (credit-impaired) for ECL calculations in all cases when the borrower becomes 90 days past due on its contractual payments.

As a part of a qualitative assessment of whether a customer is in default, the Bank also considers a variety of instances that may indicate unlikelihood to pay. When such events occur, the Bank carefully considers whether the event should result in treating the customer as defaulted and therefore assessed as Stage 3 for ECL calculations or whether Stage 2 is appropriate. Such events include:

- Internal rating of the borrower indicating default or near-default
- The borrower requesting emergency funding from the Bank
- The borrower having past due liabilities to public creditors or employees
- The borrower is deceased
- A material decrease in the underlying collateral value where the recovery of the loan is expected from the sale of the collateral
- A material decrease in the borrower's turnover or the loss of a major customer
- A covenant breach not waived by the Bank
- The debtor (or any legal entity within the debtor's group) filing for bankruptcy application/protection
- Debtor's listed debt or equity suspended at the primary exchange because of rumours or facts about financial difficulties

It is the Bank's policy to consider a financial instrument as 'cured' and, therefore, re-classified out of Stage 3 when none of the default criteria have been present for at least twelve consecutive months. The decision whether to classify an asset as Stage 2 or Stage 1 once cured depends on the obligor risk rating (ORR); if available, or the days past due and delinquency criteria in the Bank's policy, at the time of the cure, and whether this indicates there has been a significant increase in credit risk compared to initial recognition.

The Bank's internal rating and PD estimation process

The Bank's Credit Risk Department operates its internal rating models. The Bank monitors all corporate facilities with a value exceeding US\$250,000 which are assigned an ORR of 1 to 9 under the Bank's internal rating system. The models used incorporate both qualitative and quantitative information and, in addition to information specific to the borrower, utilise supplemental external information that could affect the borrower's behaviour. This internal rating system is also mapped to Moody's and Standard and Poor's ratings. Movement in a facility's ORR from origination to the reporting date is what determines the stage assigned to that facility. Staging for facilities that do not have an ORR is based on historical days past due and delinquency.

The Bank calculates 12-month and lifetime PDs on a product by country basis. 12-month PDs are determined using historical default data and then incorporate forward looking information. Lifetime PDs are determined using historical data.

35. Financial Risk Management (Continued)

(b) Credit risk (continued)

Treasury, trading and interbank relationships

The Bank's treasury, trading and interbank relationships and counterparties comprise financial services institutions, Groups, broker-dealers, exchanges and clearing-houses. For these relationships, the Bank's credit risk department analyses publicly available information such as financial information and other external data, e.g., the rating of Moody's and Standard and Poors, and assigns the internal rating, as shown in the table below.

Corporate and small business lending

For corporate and investment banking loans, the borrowers are assessed by specialised credit risk employees of the Bank. The credit risk assessment is based on a credit scoring model that takes into account various historical, current and forward-looking information such as:

- Historical financial information, together with forecasts and budgets prepared by the client. This financial information includes realised and expected results, solvency ratios, liquidity ratios and any other relevant ratios to measure the client's financial performance. Some of these indicators are captured in covenants with the clients and are, therefore, measured with greater attention.
- Any publicly available information on the clients from external parties. This includes external rating grades issued by rating agencies, independent analyst reports, publicly traded bond or press releases and articles.
- Any macro-economic or geopolitical information, e.g., GDP growth relevant for the specific industry and geographical segments where the client operates.
- Any other objectively supportable information on the quality and abilities of the client's management relevant for the company's performance.

Consumer lending and retail mortgages

Consumer lending comprises unsecured personal loans, credit cards and overdrafts. These products along with retail mortgages and some of the less complex small business lending are rated by an automated scorecard tool primarily driven by days past due. Other key inputs into the models are:

- Consumer lending products: use of limits and volatility thereof, GDP growth, unemployment rates, changes in personal income/salary levels based on records of current accounts, personal indebtedness and expected interest repricing
- Retail mortgages: GDP growth, unemployment rates, changes in personal income/salary levels based on records of current accounts, personal indebtedness and expected interest repricing.

Derivatives

The Bank maintains strict control limits on net open derivative positions, i.e., the difference between purchase and sale contracts, by both amount and term. At any one time, the amount subject to credit risk is limited to the current fair value of instruments that are favourable to the Bank (i.e. assets), which, in relation to derivatives, is only a small fraction of the contract or notional values used to express the volume of instruments outstanding. This credit risk exposure is managed as part of the overall lending limits with customers, together with potential exposures from market movements. Collateral or other security is usually obtained for credit risk exposures on these instruments.

FirstCaribbean International Bank (Jamaica) Limited

Notes to the Financial Statements
Year ended 31 October 2018
(Expressed in Jamaican dollars unless otherwise indicated)

35. Financial Risk Management (Continued)

(b) Credit risk (continued)

Master Netting Arrangements

The Bank further restricts its exposure to credit losses by entering into master netting arrangements with counterparties with which it undertakes a significant volume of transactions. Master netting arrangements do not generally result in an offset of assets and liabilities presented on the statement of financial position, as transactions are usually settled on a gross basis. However, the credit risk associated with favourable contracts is reduced by a master netting arrangement to the extent that if an event of default occurs, all amounts with the counterparty are terminated and settled on a net basis. The Bank's overall exposure to credit risk on derivative instruments subject to master netting arrangements can change substantially within a short period since it is affected by each transaction subject to the arrangement.

Credit Related Commitments

The primary purpose of these instruments is to ensure that funds are available to a customer as required. Guarantees and standby letters of credit, which represent irrevocable assurances that the Bank will make payments in the event that a customer cannot meet its obligations to third parties, carry the same credit risk as loans. Documentary and commercial letters of credit, which are written undertakings by the Bank on behalf of a customer authorizing a third party to draw drafts on the Bank up to a stipulated amount under specific terms and conditions, are collateralized by the underlying shipments of goods to which they relate and, therefore, carry less risk than a direct borrowing.

Commitments to extend credit represent unused portions of authorizations to extend credit in the form of loans, guarantees or letters of credit. With respect to credit risk on commitments to extend credit, the Bank is potentially exposed to loss in an amount equal to the total unused commitments. However, the likely amount of loss is less than the total unused commitments since most commitments to extend credit are contingent upon customers maintaining specific credit standards. The Bank monitors the term of maturity of credit commitments because longer-term commitments generally have a greater degree of credit risk than shorter-term commitments.

Maximum Exposure to Credit Risk

The maximum exposure to credit risk would be all statement of financial position carrying values of all financial assets plus the contingent liabilities and commitments [these disclosures are shown in Note 31(b)] not recognised in the statement of financial position. The gross maximum exposure would be before ECL allowances and the effect of mitigation through the use of master netting and collateral arrangements. The maximum exposure to credit risk within the customer loan portfolio would be all the statement of financial position carrying values plus the loan commitments [these disclosures are shown in Note 31(b)] not recognised in the statement of financial position. The gross maximum exposure within the customer loan portfolio would be before ECL allowances and the effect of mitigation through the use of master netting and collateral arrangements, plus the loan commitments amount not recognised in the statement of financial position.

FirstCaribbean International Bank (Jamaica) Limited

(Expressed in Jamaican dollars unless otherwise indicated)

35. Financial Risk Management (Continued)

(c) Geographical concentration of assets, liabilities, off-balance sheet items, revenues and capital expenditure

The Bank operates in only the Jamaican geographical market.

(d) Credit rating system and credit quality per class of financial assets

Credit Quality

A mapping between the Bank's internal ratings and the ratings used by external agencies is shown in the table below. As part of the Bank's risk-rating methodology, the risk assessed includes a review of external ratings of the obligor. The obligor rating assessment takes into consideration the Bank's financial assessment of the obligor, the industry, and the economic environment of the country in which the obligor operates. In certain circumstances, where a guarantee from a third party exists, both the obligor and the guarantor will be assessed.

Grade Description	Loans and advances to customers	Investment securities	
	Days past due	Standards & Poor's equivalent	Moody's Investor Services
High grade	0-7	AAA to BBB-	Aaa to Baa3
Standard	8-60	BB+ to B-	Ba to B3
Substandard	61-89	CCC+ to CC	Caa1 to Ca
Impaired	90+	D	C

A credit scoring methodology is used to assess personal customers and a grading model is used for Corporate clients. As well, an ageing analysis of the portfolio assists in the development of a consistent internal-risk rating system. This risk rating system is used for portfolio management, risk limit setting, product pricing, and in the determination of economic capital.

The effectiveness of the risk rating system and the parameters associated with the risk ratings are monitored within Credit Risk Management and are subject to an annual review.

At the reporting date, investment securities were all rated standard or high grade. Cash balances and amounts due from banks are held with counterparties that are standard, high grade or CIBC group entities.

The table below shows the credit quality by class of asset for gross loans and advances to customers, based on our internal credit rating system. Amounts provided are before allowance for credit losses, and after credit risk mitigation, valuation adjustments related to the financial guarantors, and collateral on agreements.

Notes to the Financial Statements
Year ended 31 October 2018
(Expressed in Jamaican dollars unless otherwise indicated)

35. Financial Risk Management (Continued)

(d) Credit rating system and credit quality per class of financial assets (continued)

Credit Quality (Continued)

Grade description	2018				
	Performing			Impaired \$'000	Total \$'000
	High Grade \$'000	Standard Grade \$'000	Sub Standard Grade \$'000		
Loans and advances to customers:					
Mortgages	9,475,602	346,105	129,501	265,193	10,216,401
Personal loans	10,139,196	215,714	86,607	290,142	10,731,659
Business & government loans	33,663,572	371,298	21,235	103,974	34,160,079
Total	53,278,370	933,117	237,343	659,309	55,108,139

Grade description	2017				
	Performing			Impaired \$'000	Total \$'000
	High Grade \$'000	Standard Grade \$'000	Sub Standard Grade \$'000		
Loans and advances to customers:					
Mortgages	9,100,635	305,244	140,162	353,089	9,899,130
Personal loans	8,795,958	196,861	66,405	255,384	9,314,608
Business & government loans	31,553,651	264,072	15,908	109,537	31,943,168
Total	49,450,244	766,177	222,475	718,010	51,156,906

For business and government loans, the Bank further employs risk ratings in managing the credit portfolio. Business and government borrowers with elevated default risk are monitored on the Early Warning List. Early Warning List characteristics include borrowers exhibiting a significant decline in revenue, income, or cash flow or where the Bank has doubts as to the continuing viability of the business. Early Warning List customers are often also delinquent, but this is not always the case. As of 31 October 2018, Early Warning List customers in the medium to high risk category amounted to \$1,828,930,000 (2017 - \$589,490,000).

The Bank also applies a secondary qualitative method for triggering a significant increase in credit risk for an asset which involves assessment of a customer's historical days past due and delinquency pattern. If contractual payments are more than 30 days past due, the credit risk is deemed to have increased significantly.

When estimating ECLs on a collective basis for a group of similar assets, the Bank applies the same principles for assessing whether there has been a significant increase in credit risk since initial recognition.

FirstCaribbean International Bank (Jamaica) Limited

Notes to the Financial Statements
 Year ended 31 October 2018
 (Expressed in Jamaican dollars unless otherwise indicated)

35. Financial Risk Management (Continued)

(d) Credit rating system and credit quality per class of financial assets (continued)

Model adjustments

The Bank considers the use and nature of material additional adjustments which are used to capture factors not specifically embedded in the models used. While many adjustments are part of the normal modelling process (e.g., to adjust PDs as defined for capital purposes to accounting requirements or to incorporate forward-looking information), management may determine that additional, post-modelling adjustments are needed to reflect macro-economic or other factors which are not adequately addressed by the current models such as management overlays for unexpected events e.g. hurricanes. Such adjustments would result in an increase or decrease in the overall ECLs.

Impact on regulatory capital

Annually, the base Capital Plan is assessed under a central stress scenario with ranges (mild & severe) as part of stress testing. Stress ranges determined by regulators are reviewed and approved annually by management. The results of the stress tests are taken into consideration when setting the annual capital targets and may, by extension, have an effect on the quantum or timing of planned capital initiatives. However, stress testing results that drive the capital ratio below threshold(s) do not immediately imply an automatic increase in required capital, provided there is comfort that the Bank would remain well-capitalized even under plausible stressed ranges.

The recession scenario ranges are as follows:

- i. mild recession;
- ii. severe recession

Under each range within the recession scenario, the following key assumptions are varied adversely/negatively to arrive at Capital Plan results:

- i. Changes in GDP growth rates are assumed to directionally affect performing loan growth rates and fee & commission income levels.
- ii. Changes in interest rate are assumed to impact net interest income based on the proportion of hard vs. soft currency balance split for interest earning and bearing assets and liabilities, namely cash placements, securities, loans and deposit liabilities.
- iii. Changes in GDP growth rates are assumed to impact non-performing loans growth rates which in turn affect interest income and loan loss expenses.

Changes in inflation rates are assumed to directionally impact expense growth.

The Bank meets each key regulatory ratio such as the net stable funding ratio, liquidity coverage ratio and leverage ratio.

- Net Stable Funding Ratio and the Liquidity Coverage Ratio: The Bank is not required to monitor these ratios during 2018 and is currently in the process of developing an automated solution for calculation of the ratios.
- Leverage Ratio: The Bank reports the leverage ratio monthly. The leverage ratio is also provided to the Board of Directors in quarterly reporting.

35. Financial Risk Management (Continued)

(d) Credit rating system and credit quality per class of financial assets (continued)

Modified financial assets

From time to time, we may modify the contractual terms of loans classified as stage 2 and stage 3 for which the borrower has experienced financial difficulties, through the granting of a concession in the form of below-market rates or terms that we would not otherwise have considered. Changes to the present value of the estimated future cash payments through the expected life of the modified loan discounted at the loan's original effective interest rate are recognised through changes in the ECL allowance and provision for credit losses. During the year ended 31 October 2018, loans classified as stage 2 with an amortised cost of \$9,180,000 before the time of modification, were modified through the granting of a financial concession in response to the borrower having experienced financial difficulties. In addition, the gross carrying amount of previously modified stage 2 or stage 3 loans that have returned to stage 1 during the year ended 31 October 2018 was \$4,208,000.

(e) Market risk

Market risk is the risk that the fair value or future cash flows of financial instruments will fluctuate due to changes in market variables. Market risk arises from positions in securities and derivatives as well as from the core retail, wealth and corporate businesses. The key risks to the Bank are foreign exchange, interest rate and credit spread. Management of market risk within the Bank is centralized at the Parent which mirrors the way that the hard currencies are managed by Treasury and although the local currency exposures are managed in their respective geographic regions, these exposures are still monitored, measured and controlled centrally from a market risk perspective. The following sections give a comprehensive review of the Bank's entire exposures.

Policies and Standards:

The Parent has a comprehensive policy for market risk management related to its identification and to the measurement, monitoring and control of those risks. This policy is reviewed and approved every two years by the Finance, Risk and Conduct Review Committee. The Board limits, which are approved annually, are used by the Bank to establish explicit risk tolerances expressed in terms of the three main risk measures mentioned below. There is a three tiered approach to limits at the Bank. The highest level is set at the Board. The second tier is delegated by the Chief Risk Officer and the third tier to the Business Unit, which limits traders to specific products and size of deals. Trading limits are documented through a formal delegation letter and monitored using the Bank's treasury system.

Process and Control:

Market risk measures are monitored with differing degrees of frequency dependent upon the relative risk and speed with which the risk changes. Foreign exchange (FX) positions, Value at Risk (VaR) and certain profit & loss measures are all measured daily whereas others such as stress tests and credit spread sensitivity are performed on either a weekly or monthly basis. Detailed market risk compliance reports are produced and circulated to senior management on a daily, weekly and monthly basis and a summary version is reported quarterly to the Parent Board. A summary of key risks is also presented to the local Board on a quarterly basis.

FirstCaribbean International Bank (Jamaica) Limited

Notes to the Financial Statements

Year ended 31 October 2018

(Expressed in Jamaican dollars unless otherwise indicated)

35. Financial Risk Management (Continued)

(e) Market risk (continued)

Risk Measurement:

The Bank has three main measures of market risk:

- Outright position, used predominantly for FX,
- Sensitivity to a 1 basis point move in a curve, used for both interest rate and credit spread risk,
- Stress scenarios based upon a combination of theoretical situations and historical events.

Position:

This risk measurement is used predominantly for the Bank's foreign exchange business. The measure produced and reported daily focuses upon the outright long or short position in each currency from both a pre-structural and post structural basis. Any forward contracts or FX swaps are also incorporated.

Sensitivity:

The main two measures utilized by the Bank are the DV01 (delta value of a 1 basis point move, also known as the PV01 or Present value of a 1 basis point move) and the CSDV01 (Credit Spread Delta of a 1 basis point move). The DV01 measure is calculated for a 1 basis point move down in the yield curve. This generates the effect on earnings by individual currency of a parallel shift down in the related yield curve. As curves rarely move in a parallel fashion it is measured across different tenors to ensure that there is no further curve risk of having for example a long position in the short end of the curve offset by a short position in the longer tenors. This is then utilized within the scenario analysis. The sensitivities are calculated using a post-structural basis that considers core balances for non contractual maturities as well as assigning risk to capital and non product general ledger accounts as well as considering market specific pricing situations that exist in the region.

Stress Testing & Scenario Analysis:

Stress testing and scenario analysis are designed to add insight to possible outcomes of abnormal (or tail event) market conditions and to highlight where risk concentrations could be a concern.

The Bank has two distinct approaches as follows:

- For the hard currency testing, it sends its position sensitivity to CIBC and utilizes the suite of measures that the parent company has developed. The stress testing measures the effect on the Bank's hard currency portfolio values over a wide range of extreme moves in market prices. The stress testing methodology assumes no actions are taken or are able to be taken during the event to mitigate the risk, reflecting the decreased liquidity that frequently accompanies market shocks. The scenario analysis approach for the Bank's hard currency exposures simulate an impact on earnings of extreme market events up to a period of one quarter. Scenarios are developed using actual historical data during periods of market disruption, or are based upon hypothetical occurrence of economic or political events or natural disasters and are designed by the parent company's economists, business leaders and risk managers. These tests are run on a weekly basis.
- The local currency stress tests are designed on a similar but smaller scale. For interest rate stresses, Market risk in conjunction with Treasury consider the market data over approximately the last ten years and identify the greatest curve or data point moves over both sixty day and single day periods. These are then applied to the existing positions/sensitivities of the Bank. This is performed and reported on a monthly basis as they do not tend to change rapidly.

FirstCaribbean International Bank (Jamaica) Limited

Notes to the Financial Statements

Year ended 31 October 2018

(Expressed in Jamaican dollars unless otherwise indicated)

35. Financial Risk Management (Continued)

(e) Market risk (continued)

Foreign Exchange Risk

Foreign exchange (or currency) risk is defined as the risk that the value of a financial instrument will fluctuate as a result of changes in foreign exchange rates. Since the JMD is not pegged to the USD, the VaR measure can be used. However, due to some of the known inherent weaknesses of the VaR methodology, emphasis is placed particularly on the overall position limit and the related stress tests. The Parent Board has set limits on Total Positions (Structural plus country) by currency while Credit Risk Officer limits are utilized at the country or trading level. Positions are monitored on a daily basis and the Forex & Derivative Sales department is solely responsible for the hedging of the exposure of the Bank.

The following table highlights large currency exposures of the Bank in USD. It also highlights the measures used to monitor, measure and control that risk.

Foreign exchange exposure and risk

31 October 2018:

Currency	Position Long (Short) vs USD \$'000	4% Deval \$'000	2% Reval \$'000	Average Position \$'000
Jamaican dollar	8,436	(337)	169	2,132

31 October 2017:

Currency	Position Long (Short) vs USD \$'000	6% Deval \$'000	2% Reval \$'000	Average Position \$'000
Jamaican dollar	9,980	(599)	30	1,428

The Bank utilizes a measure to quantify non-trading foreign exchange risk, also referred to as post-structural foreign exchange risk. This considers the effect of currency changes on the Bank's retained earnings and profit derived throughout the year in non-USD currencies. Full details of the structural positions are included in the Parent's financial statements.

The Bank will occasionally trade non-USD/JMD currencies, but these are quickly hedged. There were no material balances at either 2018 or 2017 fiscal year end.

Notes to the Financial Statements

Year ended 31 October 2018

(Expressed in Jamaican dollars unless otherwise indicated)

35. Financial Risk Management (Continued)

(e) Market risk (continued)

Foreign Exchange Risk (Continued)

Analysis was conducted to determine the sensitivity to reasonable possible movements of selected currencies against the Jamaican dollar to which the Bank had significant exposure at 31 October 2018 in respect of its assets and liabilities holding all other variables constant. The results revealed that as of 31 October 2018, if the Jamaican dollar had depreciated by 4% (2017 – 6%) against foreign currencies, profit before tax for the year would have been \$200,232,000 higher (2017 - \$204,000,000 higher) and shareholders' equity would have been \$200,509,000 higher (2017 - \$204,000,000 higher). Similarly, if the Jamaican dollar had revalued by 2% (2017 – 2%) against foreign currencies, profit before tax for the year would have been \$100,116,000 lower (2017 - \$68,000,000 lower) and shareholders' equity would have been \$100,255,000 lower (2017 - \$67,528,000 lower).

(f) Liquidity risk

Liquidity risk arises from the Bank's general funding activities in the course of managing assets and liabilities. It is the risk of having insufficient cash resources to meet current financial obligations without raising funds at unfavourable rates or selling assets on a forced basis.

The Bank's liquidity management strategies seek to maintain sufficient liquid financial resources to continually fund our financial position under both normal and stressed market environments.

Process and Control

Actual and anticipated inflows and outflows of funds generated from exposures, including those not recognised in the statement of financial position, are managed on a daily basis within specific short term asset/liability mismatch limits by operational entity.

Potential cash flows under various stress scenarios are modelled using amounts recognised in the statement of financial position. Prescribed liquidity levels under a selected benchmark stress scenario are maintained for a minimum time horizon.

Risk Measurement

The Bank's liquidity measurement system provides daily liquidity risk exposure reports for monitoring and review by the Treasury department. The Bank's Assets and Liabilities Committee – ALCO is responsible for recommending the liquidity ratio targets, the stress scenarios and the contingency funding plans. The Bank's Board of Directors is ultimately responsible for the Bank's liquidity.

The Bank manages liquidity risk by maintaining a significant base of core customer deposits, liquid assets and access to contingent funding as part of its management of risk. Each operational entity has internally established specific liquidity requirements that are approved by the Bank ALCO and reviewed annually.

FirstCaribbean International Bank (Jamaica) Limited

Notes to the Financial Statements

Year ended 31 October 2018

(Expressed in Jamaican dollars unless otherwise indicated)

35. Financial Risk Management (Continued)

(g) Interest rate risk

Interest rate risk arises from the changes in interest rate affecting the future cash flows of financial instruments. For the Bank, there is currently no trading interest rate risk. Non-trading interest rate risk consists primarily of a combination of the risks inherent in asset and liability management activities and the activities of the core retail and corporate businesses. Interest rate risk results from differences in the maturities or re-pricing dates of assets inclusive of those not recognised in the statement of financial position.

As at 31 October 2018, there are no market risk limits against the VaR.

The following table highlights the other key interest rate risk measures utilised by the Bank:

31 October 2018

Currency	Post Structural DV01 \$	Increase 100 basis points \$'000	Decrease 100 basis points \$'000	60-day Stressed Loss \$'000
Jamaican dollar	2,734	(273)	273	3,191

31 October 2017

Currency	Post Structural DV01 \$	Increase 100 basis points \$'000	Decrease 100 basis points \$'000	60-day Stressed Loss \$'000
Jamaican dollar	(5,326)	536	(536)	1,530

FirstCaribbean International Bank (Jamaica) Limited

Notes to the Financial Statements
 Year ended 31 October 2018
 (Expressed in Jamaican dollars unless otherwise indicated)

35. Financial Risk Management (Continued)

(g) Interest rate risk (continued)

The Bank's sensitivity did not move significantly throughout the year. Generally the contractual sensitivities are marginally long, but the effect of the structural interest rate assumptions, particularly with regard to core deposit balances, generate the relatively small net short position reflected above.

USD Interest Rate Exposure

The USD interest rate risk exposure is calculated for the Bank and reported monthly at both a product and tenor level at the Assets and Liabilities Committee. As at 31 October the risk sensitivity and related stress results to a 1 basis point drop in the underlying USD yield curve are as follows:

31 October 2018

Currency	Post Structural DV01 \$'000	Increase 100 basis points \$'000	Decrease 50 basis points \$'000	60-Day Stressed Loss \$'000
USD	(6,493)	649	(649)	1,353

31 October 2017

Currency	Post Structural DV01 \$'000	Increase 100 basis points \$'000	Decrease 50 basis points \$'000	60-Day Stressed Loss \$'000
USD	(17,787)	1,779	(889)	3,632

The main components of this risk on the asset side, are fixed rate loans and mortgages offset by core deposit and transactional accounts and inter-company borrowing on the liability side.

FirstCaribbean International Bank (Jamaica) Limited

Notes to the Financial Statements

Year ended 31 October 2018

(Expressed in Jamaican dollars unless otherwise indicated)

35. Financial Risk Management (Continued)

(g) Interest rate risk (continued)

Derivatives held for ALM purposes

Where derivatives are held as hedges against either sizeable loans from core businesses or to reduce interest risk exposure to USD denominated local bond issues and the transactions meet the accounting criteria, then the Bank applies hedge accounting. Derivative hedges that do not qualify for hedge accounting treatment are considered to be economic hedges and are recorded at fair value on the statement of financial position with changes in the fair value recognised through profit or loss. It should be noted that these are only interest rate risk hedges and other risks such as credit spread on the underlying still exist and are measured separately.

(h) Cash flow and fair value interest rate risk

Cash flow interest rate risk is the risk that the future cash flows of a financial instrument will fluctuate because of changes in market interest rates. Fair value interest rate risk is the risk that the value of a financial instrument will fluctuate because of changes in market interest rates. The Bank takes on exposure to the effects of fluctuations in the prevailing levels of market interest rates on both its fair value and cash flow risks. Interest margins may increase as a result of such changes' but may reduce or create losses in the event that unexpected movements arise. Limits are set on the level of mismatch of interest rate repricing that may be undertaken, which are monitored on an ongoing basis.

Expected repricing and maturity dates do not differ significantly from the contract dates, except for the maturity of deposits up to 1 month, which represent balances on current accounts considered by the Bank as a relatively stable core source of funding of its operations.

35. Financial Risk Management (Continued)

(i) Fair value of financial instruments

Fair value is defined as the price that would be received to sell an asset, or paid to transfer a liability, between market participants in an orderly transaction in the principal market at the measurement date under current market conditions (i.e., the exit price).

The determination of fair value requires judgment and is based on market information, where available and appropriate. Fair value measurements are categorized into three levels within a fair value hierarchy (Level 1, 2 or 3) based on the valuation inputs used in measuring the fair value, as outlined below:

- Level 1 - Unadjusted quoted market prices in active markets for identical assets or liabilities we can access at the measurement date. Bid prices, ask prices or prices within the bid and ask, which are the most representative of the fair value, are used as appropriate to measure fair value. Fair value is best evidenced by an independent quoted market price for the same instrument in an active market. An active market is one where transactions are occurring with sufficient frequency and volume to provide quoted prices on an ongoing basis.
- Level 2 - Quoted prices for identical assets or liabilities in markets that are inactive or observable market quotes for similar instruments, or use of valuation technique where all significant inputs are observable. Inactive markets may be characterized by a significant decline in the volume and level of observed trading activity or through large or erratic bid/offer spreads. In instances where traded markets do not exist or are not considered sufficiently active, we measure fair value using valuation models.
- Level 3 - Non-observable or indicative prices or use of valuation technique where one or more significant inputs are non-observable.

The following table shows an analysis of financial instruments recorded at fair value by level of the fair value hierarchy:

	Level 1 \$'000	Level 2 \$'000	Level 3 \$'000	Total \$'000
31 October 2018				
Financial assets				
Investment securities:				
Government debt securities	-	4,200,550	-	4,200,550
Total financial assets	-	4,200,550	-	4,200,550
31 October 2017				
Financial assets				
Investment securities:				
Government debt securities	-	5,099,582	-	5,099,582
Total financial assets	-	5,099,582	-	5,099,582

There were no transfers between levels in the fair value hierarchy during the year.

35. Financial Risk Management (Continued)

(i) Fair value of financial instruments (continued)

Financial instruments recorded at fair value

The following is a description of the determination of fair value for financial instruments which are recorded at fair value using valuation techniques. These incorporate the Bank's estimate of assumptions that a market participant would make when valuing the instruments:

a) *Debt instruments at FVOCI*

Debt instruments at FVOCI are valued using a valuation technique or pricing models primarily consist of debt securities. These assets are valued using models which sometimes only incorporate data observable in the market and at other times use both observable and non-observable data. The non-observable inputs to the models include assumptions about liquidity and price disclosure, counterparty credit spreads and sector specific risks.

Fair value of financial instruments not carried at fair value

The following describes the methodologies and assumptions used to determine fair values for those financial instruments which are not already recorded at fair value in the financial statements:

i. Due from other banks

Loans and advances to banks include inter-bank placements and items in the course of collection. The fair value of floating rate placements and overnight deposits is their carrying amount. The estimated fair value of fixed interest bearing deposits is based on discounted cash flows using prevailing money market interest rates for debts with similar credit risk and remaining maturity. Their carrying values approximate their fair values.

ii. Loans and advances to customers

The estimated fair value of loans and advances represents the discounted amount of estimated future cash flows expected to be received. Expected cash flows are discounted at current market rates to determine fair value. The balances are net of specific and other provisions for impairment.

iii. Customer deposits

The estimated fair value of deposits with no stated maturity, which includes non-interest-bearing deposits, is the amount repayable on demand. The estimated fair value of fixed interest bearing deposits and other borrowings without quoted market price is based on discounted cash flows using interest rates for new debts with similar remaining maturity.

iv. Debt securities in issue

The fair value of debt securities in issue is calculated using a discounted cash flow model based on a current interest rate yield curve appropriate for the remaining term to maturity.

v. Financial assets and liabilities with carrying values that approximate fair values

For financial assets and liabilities that are liquid or have a short-term maturity, it is assumed that the carrying amounts approximate to their fair values. This assumption is also applied to demand deposits savings accounts without a specific maturity and variable rate financial instruments.

35. Financial Risk Management (Continued)

(i) Fair value of financial instruments (continued)

Fair value of financial instruments not carried at fair value (continued)

The following tables set out the fair values of the financial instruments of the Bank not shown on the statement of financial position at fair value:

	<u>Carrying value</u> 2018 \$'000	<u>Fair value</u> 2018 \$'000	<u>Carrying value</u> 2017 \$'000	<u>Fair value</u> 2017 \$'000
Loans and advances to customers (1)	53,988,020	52,117,578	50,402,324	49,767,600
Customer deposits (1)	79,983,242	80,380,463	72,212,855	72,619,304
Debt securities in issue (2)	1,936,575	2,030,096	4,996,922	5,125,633

(1) These financial instruments are all Level 3 items by level of the fair value hierarchy.

(2) These financial instruments are all Level 2 items by level of the fair value hierarchy.

Transfers between levels in the fair value hierarchy are deemed to have occurred at the beginning of the year in which the transfer occurred. Transfers between levels can occur as a result of additional or new information regarding valuation inputs and changes in their observability. There were no transfers between levels during the year.

Quantitative information about significant non-observable inputs

Valuation techniques using one or more non-observable inputs are used for a number of financial instruments. The following table discloses the valuation techniques and quantitative information about the significant non-observable inputs used in Level 3 financial instruments:

			Range of inputs			
			2018		2017	
As at 31 October	Valuation technique	Key non-observable inputs	Low	High	Low	High
Loans and advances to customers	Market proxy or direct broker quote	Market proxy or direct broker quote	0%	38.0%	0%	40.0%
Customer deposits	Market proxy or direct broker quote	Market proxy or direct broker quote	-	10.0%	-	14.5%

36. Critical Accounting Judgements and Estimates in Applying Accounting Policies

Estimates and judgements are continually evaluated and are based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances. The estimates and judgements that have a significant risk of causing material adjustments to the carrying amounts of assets and liabilities within the next financial year are discussed below:

(a) Impairment losses on loans and advances

Management has established a policy to perform an assessment, at the end of each reporting period, of whether a financial instrument's credit risk has increased significantly since initial recognition, by considering the change in the risk of default occurring over the remaining life of the financial instrument.

Based on the above process, the Bank groups its loans into Stage 1, Stage 2, Stage 3 and POCI, as described in detail in Note 2.

(b) Retirement benefit obligation

Accounting for some retirement benefit obligation requires the use of actuarial techniques to make a reliable estimate of the amount of benefit that employees have earned in return for their service in the current and prior periods. These actuarial assumptions are based on management's best estimates of the variables that will determine the ultimate cost of providing post-employment benefits and comprise both demographic and financial assumptions. This includes assumptions about discount rates, expected rates of return on assets, future salary increases, mortality rates and future pension increases. Variations in the financial assumptions can cause material adjustments in future years, if it is determined that the actual experience differed from the estimate.

(c) Property and equipment

Management exercises judgement in determining whether costs incurred can accrue significant future economic benefits to the Bank to enable the value to be treated as a capital expense.

Further judgement is applied in the annual review of the useful lives and residual values of all categories of property and equipment and the resulting depreciation determined thereon.

(d) Income taxes

The Bank is subject to taxation and significant estimates are required in determining the provision for income taxes. Where the final tax outcome is different from the amounts that were initially recorded, such differences will impact the income tax and deferred tax provisions in the period in which such determination is made.

Deferred tax assets are recognised for all unused tax losses to the extent that it is probable that taxable profits will be available against which the losses can be utilised. Management's judgement is required to determine the amount of the deferred tax asset that can be recognised, based upon the likely timing and level of future taxable profits together with future tax planning strategies.

36. Critical Accounting Judgements and Estimates in Applying Accounting Policies (Continued)

(e) Impairment of debt securities at fair value through OCI

Management has established a policy to perform an assessment, at the end of each reporting period, of whether a financial instrument's credit risk has increased significantly since initial recognition, by considering the change in the risk of default occurring over the remaining life of the financial instrument.

Based on the above process, the Bank groups its loans into Stage 1, Stage 2, Stage 3 and POCI, as described in detail in Note 2.

(f) Fair value of financial instruments

Certain financial instruments are recorded at fair value using valuation techniques in which current market transactions or observable market data are not available. Their fair value is determined using a valuation model that has been tested against prices of or inputs to actual market transactions and using the Bank's best estimates of the most appropriate model assumptions. Models are adjusted to reflect the spread for bid and ask prices to reflect costs to close out positions, counterparty credit, liquidity spread and limitations in the model.

37. Employee Share Ownership Plan

Under the employee share ownership plan, qualifying employees can choose each year to have up to 6% of their eligible earnings withheld to purchase common shares in the Parent. The Bank matches 50% of the employee contribution amount, up to a maximum contribution of 6% of eligible earnings, depending upon length of service and job level. The Bank's contributions vest after employees have two years of continuous participation in the plan. All contributions are paid into a trust and used by the plan trustees to purchase common shares in the open market. The Bank's contributions are expensed as incurred and totalled \$9,622,000 (2017 - \$7,295,000) (Note 25).
