FirstCaribbean International Bank (Bahamas) Limited
Chairman's Review
Of the Results

For the nine months ended July 31, 2011

Consolidated net income for the nine months ended July 31, 2011 was \$39.4 million, compared to \$50.5 million in 2010.

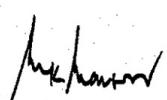

Total revenues were \$1.7 million up year on year with an increase in net interest income being partially offset by a decline in operating income. Net interest income was up \$6.5 million due to lower deposit and hedging instrument volumes, combined with lower interest rates on deposits. Conversely, operating income was down by \$4.9 million due to lower gains on the sale of investment securities and lower credit related fee income.

Operating expenses were \$8.6 million higher against the prior year, driven by general operating costs, including business license fees, while loan loss expenses increased by \$4.2 million over the previous year.

Management remains focused on cost and loan delinquency containment during this protracted economic downturn which continues to limit revenue generation opportunities.

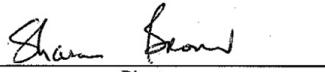

Capital ratios remain well in excess of regulatory requirements, placing the Bank in a solid position to take advantage of opportunities that may arise in the future.

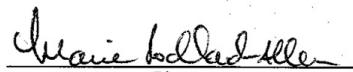

I thank the Board, management, staff and our customers for their continuing support.
